ABOUT US

Robotics and AI 2020 collaborates artificial intelligence with robots to allow robots to react and respond to their surroundings in real time, without guidance other than computer programming. The conference will create a huge opportunity and possibility of growth in robotics and artificial intelligence. The will event provides a great platform by gathering eminent professors, Researchers, Students and delegates to exchange new ideas. Robotics is a combination of engineering and technology, which includes different kind of engineering domains. Robotics is one of the emerging fields now in the industry. Now in approximately every sector robots are using for making simple the situations. For a robotic process, the system requires a combination of software and physical components such as; power supply, actuators, sensors, locomotive parts, storage devices, and control software. Robotics is now widely used in military, security, construction, and field of medical, agriculture, household operation, and education. This conference will also provide an insightful understanding to the problems arising out of the Artificial Intelligence and Robotics. The conference will cover a wide range of topics and allow participants to discuss about the new technologies developed in Robotics and Artificial intelligence field. The conference will help to understand different aspects in this field.

WHO SHOULD ATTEND

- Engineering Students, Scientists and professors
- Robotics and artificial Intelligence Researchers
- technical Faculty
- Robotics and Engineering Colleges
- Robotics-Artificial Intelligence Associations and Societies
- Business Entrepreneurs
- Training Institutes
- Software developing companies
- Robotics and AI companies

CALL FOR ABSTRACTS

Don't miss this chance to present research on Mechatronics, Artificial Intelligence, Machine Learning and many other researches at **"Robotics and AI 2020"** in Prague, Czech Republic during July 20-21,2020.

It is an opportunity for the young talents to network in a formal setting with the plenary speakers and top scientists in the field.

"Poster and Oral presentation slots are available"

Participation in these sessions is upon submission of an abstract (see details below). Applicants will be selected based on the quality of their abstract.

OBJECTIVES

After participating in this meeting, attendees should be able to

- Discuss emerging research prospects
- Discuss and apply recent research findings
- Disseminate the diverse voices of breakthrough innovators with visionary and practical solutions

MATERIALS SCIENCE OUTLOOK

- Explore the best in Cutting edge Research
- Change to learn beyond your field of Interest
- Keynote sessions by world's most eminent and distinguished researchers
- Conference Participation Inspires, Rejuvenate and Energize participants
- Learning and Knowledge in a single package
- Speaker's representation from 30+ Countries
- Conference | 2 Days

TOPICS TO BE DISCUSSED

Track 1 : Introduction to Robotics
Track 2 : Robot Locomotion
Track 3 : Robot Controlling
Track 4 : Nano and Micro Robotics
Track 5 : Motor and Sensor
Track 6 : Robotics in Defense System
Track 7 : Artificial intelligence
Track 8 : Security and Surveillance
Track 9 : Machine learning
Track 10 : Robotics in Medical and Healthcare
Track 11 : Robotics and AI in industries
Track 12 : Robotics in Agriculture
Track 13 : Humanoid robotics
Track 14 : Network in robotics
Track 15 : Data Science in Robotics
Track 16 : Human Machine Interface
Track 17 : Future of Robotics
