Market Analysis

PULSUS

Smart materials are those materials which have properties to react to changes in their environment.This means that one of their properties can be changed by an external condition such as light, pressure, temperature.So Smart Materials are defi ned as “Materials that can signifi cantly change their mechanical, thermal, optical, or electromagnetic properties, in a predictable or controllable manner in response to their environment” as there are many possibilities for such materials and structures in the man made world many innovations are happening in the fi eld of material science that are enough smart to help human beings in an any of the ways like structural health monitoring, self repair, Defense and Space, Nuclear Industries, Reducing wastes. Smart materials also have many applications in different fi elds of medicine and engineering and and the rise in demand for the smart materials is enough to believe that there is a great scope for the smart materials in the future. So this conference is about bringing out the new smart and innovative ideas from the people belonging to the material sciences from all over the world for the smart future.

About City and Venue

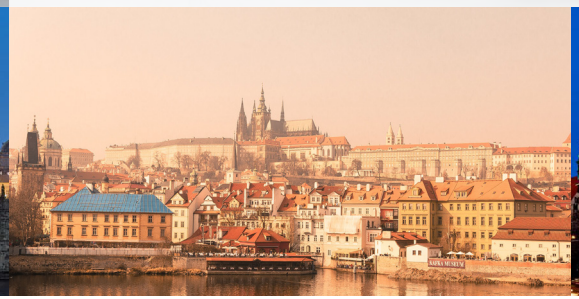

PULSUS
WWW.PULSUSCONFERENCE.COM

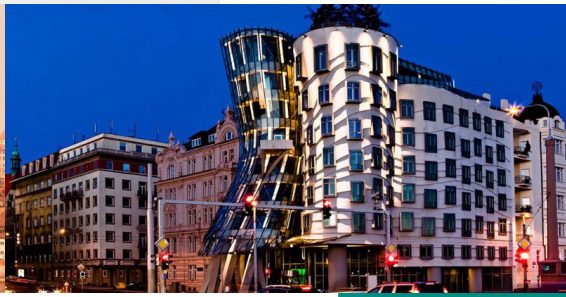

Prague is one of the photogenic urban communities and it is the biggest city in the Czech Republic. It is situated on the Vltava river. Prague is home to a few well-known societies, a significant number of which endure the brutality and devastation of twentieth-century Europe. Primary attractions of this city include Prague Castle, Charles Bridge, Old Town Square with the Prague galactic clock, the Jewish Quarter and Vyšehrad. It is one of the continent's best urban areas and the significant Czech monetary and social centre. The city has a rich architectural heritage that reflects both the questionable flows of history in Bohemia and an urban life stretching outback over 1,000 years. Prague is often called the city of a Hundred Spires because its horizon is epic which is dispersed with points and peaks toward each path. The river in this city is fixed with lovely bridges that lead the eye up to Prague Castle at the highest point of a slope.
