MARKET ANALYSIS

Handheld surgery instruments are being used more frequently in France as a result of the growing number of operations. In France, for example, there were approximately 62,206 laparoscopic appendectomy procedures, 110,848 laparoscopy, cholecystectomy treatments, and 147,553 cesarean section procedures in 2020, according to data from the Organization for Economic Co-operation and Development (OECD) in 2022. So, the need for handheld equipment is projected to rise in the future as more surgery procedures are performed.

Anesthesia is one of the most important components of any surgical procedure. Anesthesia results in a temporary loss of consciousness and defence mechanisms. General anesthesia medications that stop central nervous system activity and provide complete anaesthesia. The market for anesthesia devices in France is predicted to expand at a CAGR of about 6.08% over the course of the forecast period consists of two sections: Disposables and Accessories (Device Type) and By Anesthesia Circuits (Breathing Circuits), Anesthesia Masks, Endotracheal Tubes (ETTs), and Laryngeal Mask Airways (LMAs) (Anesthesia Workstation, Anesthesia Delivery Machines, Anesthesia Ventilators, and Anesthesia Monitors).

ABOUT VENUE

Paris is the capital and largest city of France. In a northern bend of the Seine in north-central France, the two islands Île Saint-Louis and the larger Île de la Cité make up the oldest part of Paris. The normal oceanic climate of Western Europe is affected by the North Atlantic Current in Paris. All year long, the climate is pleasant and moderately humid. Paris has long been one of Europe's primary centres for commerce, diplomacy, fashion, science, and the arts. Among the most visited sites in downtown Paris are The Louvre, Sainte-Chapelle, and Notre-Dame Cathedral. On the left bank, southwest of the city, lie Les Invalides, home to Napoleon's grave, and the Eiffel Tower. Paris has drawn artists from all over the world for centuries, who flock to the city to train and find inspiration in its extensive collection of creative resources and galleries. As a result, Paris earned the moniker "City of Art." Particularly in sculpture and reliefs, Italian painters had a significant impact on the growth of art in Paris in the 16th and 17th century. During the French Baroque and Classical eras, when painting and sculpture were the glory of the French monarchy, the French royal family hired several Parisian painters to beautify their palaces.
