MARKET ANALYSIS

The Global Market for Toxicology Services is anticipated to develop at a high single-digit CAGR to reach $14,343 million by 2025. The market for toxicity testing covers evaluations of the safety of chemicals, medications, cosmetics, food additives, etc., without using animals as test subjects. The test substances are examined for their potential to cause toxicity, including genotoxicity, skin irritation and sensitization, cytotoxicity, ocular toxicity, organ toxicity, phototoxicity, dermal toxicity, and other toxicities, on advanced cell and tissue models to determine their safety.

The global market for in vivo toxicology is expected to increase by US$2.6 billion, a combined growth of 6.6 percent. One of the segments analyzed and sized in this analysis, instruments, has the potential to grow by more than 6.3 percent. Businesses operating in this sector must constantly monitor the changing forces driving this growth to remain competitive.

ABOUT VENUE

London is the capital and largest city of England and the United Kingdom, with a population of just under 9 million. It stands on the river Thames in south-east England at the head of a 50-mile (80 km) estuary down to the North Sea, and has been a major settlement for two millennia. The City of London, its ancient core and financial centre, was founded by the Romans as Londinium and retains its medieval boundaries. As one of the world's major global cities, London exerts a strong influence on its arts, entertainment, fashion, commerce and finance, education, health care, media, science and technology, tourism, and transport and communications. Its GDP (€801.66 billion in 2017) makes it the largest urban economy in Europe and it is one of the major financial centres in the world. With Europe's largest concentration of higher education institutions, it is home to some of the highest-ranked academic institutions in the world—Imperial College London in natural and applied sciences, the London School of Economics in social sciences, and the comprehensive University College London. London is the most visited city in Europe and has the busiest city airport system in the world. The London Underground is the oldest rapid transit system in the world. London is home to the most 5-star hotels of any city. London's diverse cultures encompass over 300 languages. The mid-2018 population of Greater London of about 9 million made it Europe's third-most populous city, accounting for 13.4% of the population of the United Kingdom and over 16% of the population of England. The Greater London Built-up Area is the fourth-most populous in Europe with about 9.8 million inhabitants at the 2011 census. The London metropolitan area is the third-most populous in Europe with about 14 million inhabitants in 2016 granting London the status of a megacity.
