Market Analysis

PULSUS
WWW.PULSUSCONFERENCE.COM

According to the industry insights, in 2018, the market size for global vascular grafts was valued at $2.01 billion and it is expected to witness a CAGR of 6.4% over the forecast period. According to American Heart Association, 7.9 million people suffered myocardial infarction and 7,20,000 people suffered heart attack in 2018. Research shows that increasing incidence of vascular occlusions and cardiac diseases be the major factor for market growth. It also suggests that unhealthy food habits and sedentary lifestyle would boost the product demand. Since vascular grafts are used to treat cardio-vascular diseases (CVD), high prevalence of CVD would drive the market from 2019 to 2026. According to the product insights, endovascular stent grafts led the overall market in 2018 and peripheral vascular grafts is expected to emerge as fastest growing product segment with CAGR of 7.0% from 2019 to 2026. According to the experts, global vascular imaging market is also expected to grow due to the launch of new products. New studies also reveal that the peripheral vascular devices market is projected to increase from $10.3 billion in 2019 to $14.4 billion by 2024 with a CAGR of 6.8%.
