About City and Venue

In the United Arab Emirates, Dubai is the most populous city. It is one of the seven emirates that make up the country, and it is situated on the Persian Gulf's southeast coast. The emirate's northern shore is home to Dubai, which serves as the hub of the Dubai-Sharjah-Ajman metropolitan area.

Dubai has established itself as the Middle East's global city and business hub. It serves as a major passenger and cargo transportation hub. By the 1960s, Dubai's economy had been built on trade and, to a lesser extent, oil exploration concessions, but oil wasn't discovered until 1966. Oil money began to flow in 1969. Oil revenues supported Dubai's early development, but reserves are limited, and production levels are low: oil money provides for less than 5% of the emirate's overall revenue. The emirate's economy, which is centered on a Western-style corporate model, currently relies heavily on tourism, aviation, real estate, and financial services. Due to a spate of innovative large-scale building projects and sporting events, Dubai has recently attracted international notice. The city's skyscrapers and high-rise buildings have become iconic, particularly the world's tallest building, the Burj Khalifa.

Dubai offers world-class education as well as numerous work prospects. American University in Dubai, Hult International Business School, Al Ghurair University, The American College of Dubai, the University of Wollongong in Dubai, and British University in Dubai are the most well-known universities in Dubai, offering courses in Business Administration, Engineering, Architecture, and Interior Design.
