Market Analysis

PULSUS
WWW.PULSUSCONFERENCE.COM

Obstetricians and gynecologists face a wide variety of challenges: managing the care of patients of all ages from puberty through menopause and beyond; treating both acute and chronic health conditions; and of course, managing risk through the pregnancy and childbirth process. The United States has a higher ratio of maternal deaths than at least 40 other countries, even though it spends more money per capita for maternity care than any other. The lack of a comprehensive, confidential system of ascertainment of maternal death designed to record and analyze every maternal death continues to subject U.S. women to unnecessary risk of preventable mortality. Maternal deaths must be reviewed to make motherhood safer.The status of maternal deaths in the United States was part of a larger report on the global, regional, and national levels and causes of maternal mortality from 1990-2013. The findings suggest that only 16 countries will achieve a target of a 75% reduction in the maternal mortality ratio (or number of maternal deaths per 100,000 live births) by 2015.

About City and Venue

PULSUS
WWW.PULSUSCONFERENCE.COM

Tokyo is the capital city of Japan and one of its 47 prefectures. The Greater Tokyo Area is the most populous metropolitan area in the world. It is the seat of the Emperor of Japan and the Japanese government. Tokyo is in the Kantō region on the southeastern side of the main island Honshu and includes the Izu Islands and Ogasawara Islands. Formerly known as Edo, it has been the de facto seat of government since 1603 when Shōgun Tokugawa Ieyasu made the city his headquarters. It officially became the capital after Emperor Meiji moved his seat to the city from the old capital of Kyoto in 1868; at that time Edo was renamed Tokyo. Tokyo Metropolis was formed in 1943 from the merger of the former Tokyo Prefecture and the city of Tokyo. Tokyo is often referred to as a city, but is officially known and governed as a “metropolitan prefecture”, which differs from and combines elements of a city and a prefecture, a characteristic unique to Tokyo. The Tokyo Metropolitan Government administers the 23 Special Wards of Tokyo (each governed as an individual city), which cover the area that was the city of Tokyo before it merged and became the metropolitan prefecture in 1943, the 30 municipalities in the western part of the prefecture, and the two outlying island chains.
