# Market Analysis

PULSUS
WWW.PULSUSCONFERENCE.COM

Gynecology and obstetrics are wide and a multiple branch of science that includes Gynecologic care, monitoring and care of the pregnant women, oncology, surgery and also primary health care treatments for women. The diagnose and treatment for female genital disease is provided by a Gynecologists and the medical need and care for women when they are pregnant is given by Obstetricians. Along the historical paths these Obstetricians are referred as Mid-wives for a long time. These OB-GYN doctors face a wide variety of challenges in managing the patients of all ages starts from puberty through menopause and beyond. Most of the OB-GYNs are specialists and well trained in treating both acute and chronic health conditions; and of course, managing risk through the pregnancy and childbirth process. They initially proceed with some preventive examination in order to diagnose Gynecologic problems and generally evaluate pelvic pain, endometrial biopsy, abnormal uterine bleeding, endometriosis, urinary incontinence, infertility, pelvic masses, abnormal Pap smears, leiomyomata and the primary duties of gynecologist includes vulvar biopsy, colposcopy, and smears. In both Gynecologic and Obstetric conditions ultrasound is performed generally. In developing countries one of the threating cause for maternal death is being indiscreet of pregnancy complications this leads to death and disability between the women of reproductive age. Maternal deaths must be reviewed to make motherhood safer. The status of maternal deaths in the United States was part of a larger report on the global, regional, and national levels and causes of maternal mortality from 1990-2013. Women's health issues have attained higher international perceptibility in the recent decades. The transformation of women lives has changed over the decades this is because the lifespan of a women is gradually decreasing from 1970's- 1990's with a age of 85 to 50 years respectively. The famous slogan "Healthy Women, Healthy World" illustrates the fact that women act as a protector of their family and also, she plays a major role in the society by helping her communities to maintain the heath and overall wellbeing.

# About City and Venue

PULSUS
WWW.PULSUSCONFERENCE.COM

**Paris** is a city with a proud and very ancient history. Originally founded in the third century BC, on an island in the middle of the Seine, it was the capital city of a tribe known as the Parisii, who gave it their name. In Roman times, the city expanded beyond the islands in the Seine, and became known as Lutetia. During the decline of the Roman Empire, northern France was overrun by a Germanic tribe called the Franks, whose new kingdom - part of the Holy Roman Empire - became known as West Francia, with its capital at Paris. Though the city walls are long gone, central Paris is now known as “Paris intra-muros”, or Paris within the walls, which is the area with almost all the main tourist attractions.
