Market Analysis

Gynecology and obstetrics are wide and a multiple branch of science that includes Gynecologic care, monitoring and care of the pregnant women, oncology, surgery and also primary health care treatments for women. The diagnose and treatment for female genital disease is provided by a Gynecologists and the medical need and care for women when they are pregnant is given by Obstetricians. Along the historical paths these Obstetricians are referred as Mid-wives for a long time. These OB-GYN doctors face a wide variety of challenges in managing the patients of all ages starts from puberty through menopause and beyond. Most of the OB-GYNs are specialists and well trained in treating both acute and chronic health conditions; and of course, managing risk through the pregnancy and childbirth process. They initially proceed with some preventive examination in order to diagnose Gynecologic problems and generally evaluate pelvic pain, endometrial biopsy, abnormal uterine bleeding, endometriosis, urinary incontinence, infertility, pelvic masses, abnormal Pap smears, leiomyomata and the primary duties of gynecologist includes vulvar biopsy, colposcopy, and smears. In both Gynecologic and Obstetric conditions ultrasound is performed generally. In developing countries one of the threating cause for maternal death is being indiscreet of pregnancy complications this leads to death and disability between the women of reproductive age. Maternal deaths must be reviewed to make motherhood safer. The status of maternal deaths in the United States was part of a larger report on the global, regional, and national levels and causes of maternal mortality from 1990-2013. Women's health issues have attained higher international perceptibility in the recent decades. The transformation of women lives has changed over the decades this is because the lifespan of a women is gradually decreasing from 1970's- 1990's with a age of 85 to 50 years respectively. The famous slogan "Healthy Women, Healthy World" illustrates the fact that women act as a protector of their family and also, she plays a major role in the society by helping her communities to maintain the heath and overall wellbeing.

About City and Venue

PULSUS
WWW.PULSUSCONFERENCE.COM

Paris is the capital and most populous city of France, with an estimated population of 2,175,601 residents as of 2018, in an area of more than 105 square kilometers (41 square miles) Since the 17th century, Paris has been one of Europe's major centers of finance, diplomacy, commerce, fashion, gastronomy, science, and arts. The City of Paris is the Centre and seat of government of the region and province of Île-de-France, or Paris Region, which has an estimated population of 12,174,880, or about 18 percent of the population of France as of 2017. According to the

Economist Intelligence Unit Worldwide Cost of Living Survey in 2018, Paris was the second most expensive city in the world, after Singapore and ahead of Zürich, Hong Kong, Oslo, and Geneva. Another source ranked Paris as most expensive, on par with Singapore and Hong Kong, in 2018. Paris is a major railway, highway, and air-transport hub served by two international airports: Paris–Charles de Gaulle. Paris is especially known for its museums and architectural landmarks: the Louvre remained the most-visited museum in the world with 2,677,504 visitors in 2020, despite the long museum closings caused by the COVID-19 virus. Other popular tourist sites include the Gothic royal chapel of Sainte-Chapelle, also on the Île de la Cité; the Eiffel Tower, constructed for the Paris Universal Exposition of 1889; the Grand Palais and Petit Palais, built for the Paris Universal Exposition 1900; the Arc de Triomphe on the ChampsÉlysées, and the hill of Montmartre with its artistic history and its Basilica of Sacré-Coeur.
