ABSTRACT

PAIN MANAGEMENT

Pain remains one of humanity's great concerns. From the beginnings of the human being, he always tried to clarify the reasons that justified the occurrence of pain and the procedures destined to its control.

The expression of pain varies not only from one individual to another, but also according to different cultures "

The occurrence of pain, especially chronic pain, is increasing, perhaps due to:

• New habits of life;

• Greater longevity of the individual;

• Prolonged survival of patients with naturally fatal clinical conditions;

• Modifications of the environment in which we live; And probably the recognition of new painful pictures and the application of new concepts that reflect their meaning.

In addition to generating physical and emotional stresses for patients and their caregivers, pain is an economic and social burden for society.

With this technique shown by Dr. Lin Pin Chuan, we can have total control of the pain, with a fast and effective technique, using in most cases only a needle for the treatments.
