

Title: Endodontic Emergency

Name: Dr. Mashael AlQallaf
Henry M. Goldman school of Dental Medicine
Boston University , MA 02118, USA

The lecture will be involving Endodontic Emergency in the dental practice. It will include a detailed anatomical explanation of transmission of pain, causes of facial swellings, and last but not least differential diagnosis of fascial space infections before and after Root Canal Treatments. It will also include the emergency management(non-surgical and surgical) of such cases with explaining each procedure. Additionally, there will be a list of medications to be used after the initiation of treatment. The lecture will be supported with appropriate Literature.

Biography

I finished Bachelor of Dental Science and Bachelor of Arts on December/2000 from Trinity College Dublin (University of Dublin). I went back home to Kuwait and worked for six years as a General dental Practitioner. On 2008, I received a Certificate of Advanced Education in General Dentistry from University of Maryland, School of Dentistry. Then I succeeded in pursuing my Endodontics Specialty and Masters of Dental Science from Henry M. Goldman School of Dental Medicine on September, 2011. I work now as an Endodontist at Ministry of Health of Kuwait from my graduation till now.
