

Automated Embedded Artificial Intelligence

Tellmeplus: company overview

Predictive Objects helps companies to create Asset Intelligence

Disruptive SaaS platform
to help customers
leverage AI
&
dramatically improve
efficiency & performance
of
Assets & Operations

Automation

Edge/Fog computing

Asset Intelligence

Predictive Objects

Predictive Objects Scope

What makes Predictive Objects unique?

AUTOMATING MACHINE LEARNING

FEATURE ENGINEERING

EMBEDDING PREDICTIVE MODEL

EDGE COMPUTING

ASSET VIEW

ACTIONABLE PREDICTION

LIFECYCLE MODEL MANAGEMENT

BUSINESS USERS ORIENTED PLATFORM

SAVE TIME

INCREASE PERFORMANCE

SAVE MONEY

Automating Predictive Analytics

Predictive Objects improves the outcome of business and industrial processes through actionable asset intelligence.

Data Acquisition

Predictive Objects

Use Cases

Industries	Use Cases
Aviation	• In-flight predictive maintenance • Embedded risk monitoring
Industry 4.0	• Prediction of production defects • Embedded predictive maintenance in the production line • Procurement prediction
Agriculture	• Crop yield prediction • Sales forecasts
Construction	• On-board predictive maintenance • Embedded risk monitoring
Energy	• Utilities consumption prediction • Oil & gas production security risk prediction
Fleet	• On-board predictive maintenance • QoS prediction • Insurance risk prediction
Equipment	• On-board predictive maintenance • Embedded risk monitoring
Mining	• Mining field output • Equipment predictive maintenance • Embedded risk monitoring
Rail	• On-board predictive maintenance • Embedded risk monitoring
Oil & Gas	• Oil well output • Equipment predictive maintenance • Embedded risk monitoring
Wind	• Wind turbine predictive maintenance • Embedded risk monitoring
Retail	• Sales forecasts • Procurement prediction • Fraud detection prediction

Value Proposition

- Super fast, Agile
- Simple, easy to use
- Seamless deployment anywhere
- Designed for business Experts
- Drastic increase of assets' efficiency
