TITLE: **DIVERSE INSANITY- AN EMERGING HORIZON**

DR. MANISH GOYAL
KOTHIWAL DENTAL COLLEGE AND RESEARCH CENTRE, MORADABAD, INDIA

Evolving from an ancient era of EXTRACTION v/s NON EXTRACTION, Orthodontics today is a blend of multiple schools of thoughts as displayed by my cases. Perfection of one lies in his ability to harmonize maximally with nature's beauty. Thus, potential of growth modulation in harnessing this irreplaceable elegance can't be left unattempted on the pretext of few controversial literatures. Science is no more a self-oriented department. We need to be more liberal, appreciative and inculcative of the achievements of other specialities. Thus, an interdisciplinary approach is today's need to enrich our speciality and make it reach the zenith.

BIOGRAPHY
