Abstract:

Honorable Speaker, I am from Bangladesh, I feel proud participating at the BREAST CANCER CARE CONFERENCE and I wish you along with all participant greetings & thanks. Honorable Speaker, the brief description of by discussion regarding,`` **Breast cancer clinical trials and research"** is: At this stage I want to remember that, it is very urgent to find out a latest Modern Technology studying clinical research, to find out the cause of breast cancer and treat clinical trial. I believe that, the patent will safe 100% if they get proper treatment instantly, when they found symptoms of this disease. It is seen by a trial/research on some patent that, being apply therapy on the infected cellular tissue area (less than Carcinoma infected area) that, they live smoothly (100 risk free) for a long time. Honorable Speaker, It is very urgent to create public awareness, as they will meet to doctor to take treatment immediately after finding the primary symptoms of breast cancer, it will be possible to treat & proper diagnosis by Modern Technology. Honorable Speaker, I think that, if the doctor can start the treatment by proper diagnosis and apply Modern Medicine after finding the symptoms of the breast cancer disease, it is possible to improve. More important issue that, It should be noted that, the applied medicine, therapy or research materials must be side effect free, we have to study more and more regarding this. Honorable Speaker, I want to propose in the World Breast Cancer Care Conference herby that, it is very urgent to find out a Vaccine of Breast Cancer from Clinical Research, which will save the people from this fatal disease. Thank you honorable Speaker and thanks to all.
