

Title: Management in Chemical engineering Resources.

Name: Ali ghelich khani, Najmeh Bashiri
TEHRAN PAYMENT COMPANY

The development of industrial technology has provided the transformation of the environment in several ways that coused changing the nature and extent of the environmental impacts of industrial activities. Resource discharge, air, water and earth pollution, are examples of the environmental problems which have transpired as a result of intensified interventions into the environment. One of the main problems associated with these activities is that they may not have an immediate effect and some may have a more global impact on the environment. Therefore we should consider next generations life quality in our industrial activities. In this work we studied ways to achieved target by some ideas on Resource planning, Resource Execution and change and Resource Tracking and Measurment.

Key words: Management, chemical engineering, environment.

Biography

Ali ghelichkani has completed his B.S at the age of 23 years from Azad University in Ian and postdoctoral. He is the director of SRC, amanger in payment and environment team.
