Abstract Submission

Child Health and Psychology

People can not live alone in the history human beings ever. The forever truth made by the creator so that the child born in the family. As because of consistent reason, he has to be grown up from the family. From there his child and juvenile life gets evaluated and grows up his (child) first step of life. In that level I am presenting my main presentation on "Child Health and Psychology" as within the family the first step of child has to be spent. Child health and psychology the important role of parents or guardian to comply is very important. In clinical research some of the tips are presenting here- as soon as age of the child and self evaluation happens the activates to the health f child is needed- construction of food list of child, dividing healthy food beside teaching child regarding health, so that as soon as age of the child grows the do not suffer any risks of malnutrition and there is created the power to prevent antibody diseases in the health. As a result the beautiful mind and heart and well health gets grown. At the time of growing, teaching them on regarding general knowledge. For evaluation of talent family and social awareness and values, ideology (ideal) education providing so that a juvenile and youth can best achieve to have evaluation of talent. To grow mind of the child the guardian ill have to take the role of friend. There can not be given pressure on any subject more than eligibility. The necessary steps will have to take entertain the children. The evaluation of unusual and autism children are to providing family (parents) and social supports. There has become eligible to prove on that, family and (ideal) psychology education taking that education a child gets self evaluated a great human beings in life. (Reference- Noor, Medical And Research Center) 'Father of children is sleeping in the heart of all children'. With this saying sentence the 31st international juvenile medicine and children psychology n the conference our convey is on that- our children in today to become the national leader, the noble laureate great human beings.
