Advisory Board Member - All Plastics Recyclers Association (APRA)
Special Invitee Member - Indian Plastics Institute, Mumbai
Editor in Chief - Modern Plastics India, Modern Plastics Global, Modern Plastics TV, Modern Plastics Weekly etc.

Multilayered Packaging Problem Challnges & Solutions
Plastics Recycling Opportunities & Challenges in India and Globally

Plastic Recycling Industry in India

India faces major environmental challenges associated with waste generation and inadequate waste collection, transport, treatment and disposal. Current systems in India cannot cope with the volumes of waste generated by an increasing urban population, and this impacts on the environment and public health. The challenges and barriers are significant, but so are the opportunities. India currently has no official systems for collecting and recycling plastic waste; nor are there overarching initiatives by private or public sector. Waste is collected and recycled very efficiently: waste pickers scour municipal dumps, and later sell plastic items to small local plastics processors or recyclers. It is estimated that millions of tonnes of plastic waste is reclaimed this way every year.

- Plastic recycling in India : highly efficient, but potentially hazardous
- Multilayered Packaging Problem Challnges & Solutions
- How Big is Plastics Industry in India?
- India wants to double consumption of Plastics in next 5 years, what about its plastic waste?
- Main challenges is complexity & lack of transparency of the informal recycling system.
- Amount of Plastic Waste Recycled, Recovery of Plastic Waste,
- Growth of Mega cities will need more recycling from the starting of the development.
- Where the Plastics Waste Goes ? Saving of Landfill Space:
- Let's give Second life to PLASTICS waste
- What are the opportunities for recycling machine manufactures or technology providers?
- Opportunities for Packaging and carry bags recycling in India and Globally

Biography
