COMICIZE THE COMICS MAKER

Dear son, I found a solution to the current pollution problems across our mighty planet. My invention is called 'The Tube Filter'. It purifies gasoline and cleans contaminated air. It is a more efficient fuel and when you go to the gas station, you get a fuel with which you can help the environment. It is pure gas and does not pollute the atmosphere or damage the ozone layer. This will vastly improve the quality of life on Earth now and for future generations. The company, Advanced Power Enterprise, controls fifty-percent of the market worldwide and you now control ninety-percent of the shares. I assume, by now, that your training is complete and you have received the Fast Cash bike. What you haven't seen yet is the power room. Go there and find the shield on the wall. Press the button that is encircled with a money sign. When the door opens, you will find the Fast Cash Mobile. These weapons and vehicles are now your for which to fight crime. I trust you will do the right thing. Now, I tell you that Ricky Cactus has ten-percent of the A.P.E, works on the Arch City stock exchange and is your enemy! His accomplice is Taxman and they will do everything possible to collapse the global economy with intentions focused solely on a hostile takeover of what is now your company. Sincerely, your father.

BILLY WIPES AWAY TEARS OF SADNESS AND ANGER, PUT THE LETTER AWAY.
