Dermatologist

High School:
I had been in chemistry and mathematics olympics team in Ankara Ataturk Anatolian High School. I was graduated high school with GPA 92.20/100 and in central university exam, which 1.7 million of students attend, i was 56th. As one of the best students of Turkey, i have been granted Government scholarship. And i was accepted to the one of the best medical schools in Turkey; Hacettepe University Medical School.

University and Graduate:
I had been head of the "War against AIDS" student comitee for 5 years while i was studying at Hacettepe University. And i was also an active attendant to the student comitee called TurkMSIC(Turkish medical students international comitee). In my second year of university, i applied to the MD-PhD program, which only accepts roughly 5-6 students every year all around the Turkey. Besides Medicine classes, I also took PhD classes each semester. The last year of university i did an Erasmus at Wroclaw/Poland and my grade of classes were 5(A). And my grade of medical school was 3.22, grade point average out of 4, i was graduated Hacettepe University Medical School at June 27th, 2015, as an Honour Student.
Residency:
After graduating the Medical School i was 65th in our national exam. All the doctors in Turkey have to enter this exam to choose a specialization. And i wanted to choose Bezmialem Vakif University Medical School as a dermatologist since January 25, 2016. I was at University of Miami Hospital for almost 2 months(from 19th September 2017 till 21th of November 2017) as a plastic surgery observer. After that I started the Sisli Hamidiye Etfal Training and Research Hospital at 29th of March 2018. I still work at this hospital.

Experiences, Courses, Congress and PhD Education:
-I have a certificate of experimantal animals usage. I went to 80 hours courses for this skill.
-I took lessons about Pharmacology for PhD programme while i was studying at Hacettepe University. The PhD Subjects i studied are: Laboratory Animals and Principles of Experimental Interventions, Selected Topics In Neuropharmacology I, Laboratory Techniques In Pharmacology, Research Techniques In Bıochemistry I, Computers In Pharmacological Research, Literature Screening Techniques in Pharmacology I, Basic Principles of Drugs Action.

I attended,
-1st International Dermatology and Cosmetology Congress-1st INDERCOS(İstanbul, 16-20 March, 2016)
-11th Çukurova Dermatology Congress(June 1-5, 2016 Adana)
