Avoiding Aesthetic Errors in Facial Volumization

Facial Volumization is an integral part of facial rejuvenation t
are increasingly common but can be reduced using a syster
of key facial aesthetic subunits(FAU) which develop as shad
aging face.

Objectives include: (1) description of FAU's unique to the ag
volume-deficient FAU's requiring treatment, (3) recognizing
pivotal role in setting the framework for mid-facial volumiza
"submalar abyss", (4) when to fill vs. lift in the aging face, (5
volumization errors.
