Chemistry fundamentals in Religions and its relations with

Summery

Chemistry discoveries, innovation and use to bless humanity and make life easier and healthy, the aim of this articles is the direction of research activity from impossible to possible inventions and to understand on sciences basis the secrets Lord Keep it away from Human Because Many scientists would like to uncover the impossible in the chemistry of elements reform and transformation Use the Drawing Tools tab to change the formatting of the sidebar text box.

By Dr Amr fawzy

Abstract

In Egypt:

the land of Chem, and science of substances myth and legend, the three "gifts" of Hermes Trismegistus and the doctrine of "as above so below." The times change but we share a need to understand the nature of substance with older and religious cultures.

The science of substance has a dark side: Frank Oppenheimer's concern during the making of the first atomic bomb and the blind rush to "get this thing to go." Contrasts in classical and modern thought, deductive and inductive reasoning. Greek philosophy and parallels to modern thought. Medieval alchemy and the Philosopher's Stone. Paracelsus the man and scientist. The advent of experimental medicine begins to break free of the philosophical school of science. Becher and the last fires of alchemy. Mithridates, saturated with poison. The ever-puzzling mystery of fire gives rise to the theory of phlogiston

The human being limits in the science of substance

To understand the sciences of huma limit in innovation first we will put an example

In Bible & In Holy Quran

It is He who created the heavens and the earth in six days, then settled over the Throne. He knows what penetrates the earth, and what comes out of it, and what descends from the sky, and what ascends to it. And He is with you wherever you may be. God is Seeing of everything you do.

We sent Our messengers with the clear proofs, and We sent down with them the Book and the Balance, that humanity may uphold justice. And We sent down iron, in which is violent force, and benefits for humanity. That God may know who supports Him and His messengers invisibly. God is Strong and Powerful.

Lord talks about the appearance of iron on earth as the iron does not make up on earth but, Iron came from extremely far places in the universe as iron Makeup need 10 million Celsius temperature and the only sun offer 6000 Celsius temperature so, the human cannot go through to manufacturer iron from the main nucleus of elements as our sun group did not have the required circumstances

This example to be in line with the way I would like to represent the idea and what is possible and what is impossible

As first of the article we will nominates both things

1- The Impossible

a. The transformation from metals to another as converting iron to copper or gold
b. Change the physical Atomic configuration for all elements
c. Creation of intelligent elements or materials or substances
d. Trying to discover the ultimate power required to change substance physical response by example (the power Moses stick when he opened the sea and change the physical properties of water against surrounding gravity
e. Abilities to creates the Bionic stem cells which able to create full organ or human
f. Abilities to manufacture glucose molecules or any uni sugar molecules from the basics carbon – hydrogen – oxygen
g. Abilities to simulates or read in full details the consequence of chemistry neuronal impulses which control the mind
h. Abilities to fasten the processes of energy expenditure by cells to have bionic extraordinarily strong muscles or bionic brain cells

2- The possible

a. Is to formulate slug from different elements to have the required physical or chemical properties
b. Abilities to simulate most of the cellular chemical reaction to produce what human need
c. Abilities to have green energy from certain chemical reactions
d. Using different wavelength lights on substances to produces energy or stimulates reactions
e. Abilities to produce or compositing therapeutic molecules for the benefits of humanity
f. Abilities to creates the therapeutic water elements
g. Abilities to change and modulates some elements molecular weights
h. Abilities to have cold energy
i. Using electromagnetics to modulates molecular behavior
j. Chemistry of aging and control the elements extend cellular and regenerative abilities
k. Abilities to creates the control chemical molecules which used in potentiating cellular regenerative abilities

l. Abilities to use the 100% pure carbon and using different photo and magnetic manipulations to produces many medical drugs, solutions
m. Abilities to creates and generates new gases which will be beneficial for human
n. Creating new chemicals makes shortcut pathway in metabolism to treat certain modern life diseases and its under name of therapeutic pathway chemicals
