

Title: FOOD SECURITY IN PAKISTAN

Name: Mr. Muhammad Yunas
Khalis 365 and Halal Research Council, PAKISTAN

Wheat is the main staple food and national diet in Pakistan. Pakistan maintains support price mechanism for Wheat crop. The wheat pricing mechanism is centralized through support price. It is analyzed that increased support price for wheat crop inflates the flour bread price.Pricing mechanism analysis shows that higher support Price is the basic factor for inefficiency. Positive impacts of Increasing the wheat yield and production for food are Nullified due to support price. Targeted subsidy on input cost Is more effective option for the nation rather than support Price. Acute rise in one side of the pricing equation which sets Flour price causes the nation and more exclusively vulnerable Group to suffer with appropriate magnitude pushing them Between food security and food insecurity.
