Alternative Healthcare Medicine

From Indian style Ayurveda to Chinese stone massage, alternative health practices are overlapping the mainstream healthcare systems. Regular medical treatments are being supplemented with alternative medical treatments such as herbal baths, Ayurvedic massage, and Chinese acupuncture. By themselves, they may not necessarily have appeal, but the incorporation of alternative treatments while undergoing surgery, taking diabetic medication, and other treatments, is resonating across the globe.

Modern fertility treatments are also embracing alternative medical treatments. Chinese acupuncture is being recommended as follow ups to knee surgeries, back pains, and various joint aches.

Alternative medicine is widely practiced in mental health. Meditation, music healing, Reiki, and Zen practices are some of them.

The future of medicine will be a combination of regular medicine and alternative therapies.

Topic for Consideration

- Alternative Healthcare Medicine
