You can make a medicine. I just need to isolate the immunoglobulin from my blood. . . Immunoglobulin is the most powerful weapon against influenza. It is the weapon of our body. I propose to make a medicine based on my immunity. Part of the immunoglobulin is artificially copied. We must start now so that it is not too late.

And if I have strong immunity, then maybe gamma globulin is also high. And I can cure measles.

Disabled person of 2 groups since childhood on 2 rare internal incurable diseases. For the first illness of 38 years, I take medicine 3 times a day
