2nd International Conference on Applied Physics and **Materials Science** in **June 30-July 01, 2021Amsterdam, Netherlands**.

Name- Mr. Nishant Kumar Sharma

Qualification- M.Sc. Physics (Advance Electronics).

Institution/ University -S.B.S Govt. P.G. College ,Rudrapur / Kumaun University.

E-mail – nkphysics11@gmail.com

Abstract- My motive is to present the new way in physics which are not being developed by the scientific community. This is a hidden or not considered part of physics. It has many parts few of them are

1. The theory of new type of particles called non-intractable particles, these are the particles which attend every mass state in universe, with it defining the statistic of Non-Intractable particles, the equations of Non-Interactive Mechanics, structure of Nucleus and Atom according to Non-Interactive Mechanics, proof of Dirac Particle-Antiparticle theory, Nishant Effect -The process by which Non-Interactive particles react with matter with this the proofs of Nishant effect 1. Linear harmonic oscillator 2. Plank's radiation law 3. Mass- energy equivalence relation E=mc^2 4. velocity of light 5. The Relativistic relation E^2=P^2C^2+m^2c^4.
2. The Law Of Gravitation According To Non-Interactive Mechanics, Application Of Non-interactive Mechanics And It's Gravitation Formula In Newton's Laws Of Motion , Non-Interactive Particle Is The First Force Of Each Action, Existence Of Non-Intractable Particles In Space And Solar System , why Graviton Should Be A Non-Interactive Particle. Why Any Mass State Can't Be In Rest In Universe According To Classical And Non-Interactive Mechanics, The Free Movement Of Non-Intractable Particles In Universe.
3. Then We Will Study About The Condition For Creation Of Non-Reacting Zero Space And Creation Of Always Reacting Infinite Space. Then We Will Study About The Infinite River Of Quant's, Then The Creation Of Space And Time By This River Of Quantum Domains , The Creation Of Space And Time In Universe Is Depended on The Adjustment Of Quantum Domains In Previously Created Space-Time, condition for space creation and it's formula With Satisfying The Condition , condition for appearance of time With Satisfying The Condition Theoretically And Experimentally ,Quantum Mechanical System Aatmamoul for the movement of Elementary And Non-Intractable particles in Physical And Universal Bodies, concept of Adjustment Of Quantum Domains. concepts of app. Stable systems (planets ,Stars) ,concept of consciousness, Then There is Discussion About Gravitation The Emergent Phenomena From Elementary and Non-Intractable Particles , How Newton To Einstein We Are On The Correct Path Of Gravitation And How Einstein Was Right About Cosmological Constant Even When Universe Is Expanding And Why We Need An Extension To Understand Gravitation Correctly, What Is Gravitation And How It Originate , Types Of Gravitation And Gravitational Waves, The Test About Contracting Gravitation That Could Be or May Be already detected In LIGO, The Equations To Describe The Behavior Of Gravitation, The Combined Field Equation Of Gravitation For Expanding And Contraction Nature With Satisfying The Equation, Conditions To Find Graviton.

4. Then We Described The Dramatic And Strange Behavior Of Particle And Matter Comes Under Dark Energy The Strange Behavior Is, That Holding The Properties To Interchange Their Conditions, And Varies Qualities Of Interchange Of Particles And Matter And Interchange With Mathematical Quantities, Then We Discussed That At Least 10Th Order Dark Energy Is Required To Free And Stable Existence in Universe Then We Shows The Higher Order Dark Energy Of 11th Order, Then There is Description of Cosmic Rays Shower of E10+2.n And E11+2.nOrders and higher level, At Two Ground Bases (i) 0.15012174857 (10)^18 And (ii) 4.465069415*(10)^18 Then Their Is Discussion About Contraction And Expansion Of Normal Matter Field By The Dark Energy At 14th And 15th Level. Then We Used The Kirchhoff's Radiation Law To explain the Unification of dark energy accepting and emitting bodies With The Dark Energy of universe Dark Energy. And the Absorption And Emitting Property of dark energy generator, Then The Stable State Of Systems For Uniting With The Universal Dark Energy.
5. Then We Will Discuss About The Improvement In Einstein's Photo Electric Effect Equation And Then we provide The Equation Of Improved Photo-Electric Effect. Quantum Mechanical Treatment of Modified Photo Electric Effect Equation And Mass of Non intractable particles with varies time lags. Mass of Non intractable Particle in Gev-sec / (C) ^2 at varies time (t), overcome from uncertainty principle and Schrodinger Cat Problem. Non interactive theory of photo electric effect, The Mass of light And Non Intractable particle, Matter Photon Interaction. And finally the conclusion of manuscript.
6. Then, we will discuss about the quantum mechanical system for the movement of non-intractable particle, non-intractable particle which attends every mass state in the universe, the form of a N-I particle is $n = -m$, this manuscript defines the stable cross system of n-i intractable particle for the movement particles and elementary particles with a perfect black body at center with proofs of super massive black-holes, the linear Hamiltonian of the cross quantum mechanical system and with this, it's co-related matrixes, then by the use of cross system of Non-Intractable Particles defining a new right angel theorem. Then the new black body relation free from plank constant depends on non interactive mechanics and m, which has already mentioned in non-interactive mechanics and it's relation with galaxies. The unique property of cross system is that it is surrounded by the energy of 10e + e always, and at last the relation between zero point energy and dark energy.
7. High Energy String body Figures with normal and super strings.
