About ICT Academy

ICT Academy is a not for profit social Enterprise initiated in the year 2009 under the public- private partnership model, by the Government of India in collaboration with the State Governments and Industries. The organisation was formed with representations from the Government, leading companies in the ICT industry and National Association of Software Services Companies (NASSCOM) in India.

ICT Academy enables a platform between Government, Corporate and Academia with the prime objective of developing the next generation teachers and industry ready students. ICT Academy executes through a 7 pillar approach that includes Faculty Development, Student Skill Development, Entrepreneurship Development, Youth Empowerment, Industry-Institute Interaction, Digital Empowerment and Research & Publications.

ICT Academy is endorsed and recommended by NITI Aayog (National Institution for Transforming India Aayog), the National Planning body of Government of India as one of the unique organization for dissemination and replication, which is aligned to the Skill India Vision of the Government of India.

Fostering India for Industry 4.0

With more than 50 per cent of its population is under the age of 27, India can play a pivotal role in shaping the global Fourth Industrial Revolution in a responsible, scalable and inclusive manner.

With one of the youngest labour forces in the world, a sizeable technical aptitude, the second largest number of internet users on mobile devices and the second largest English speaking population, India is well positioned to enhance its global leadership in a post Fourth Industrial Revolution era.

But in terms of workforce, India has low percentage (4.7%) of formally skilled workforce. Industry 4.0 likely to create number of new roles like supervisory, managerial and cross-functional, but lack of Industry 4.0-ready skilled labour force could make India less competitive on global scale. Therefore the right mix of accelerators - including regulatory frameworks and educational ecosystems, India can lead the Fourth Industrial Revolution, while simultaneously enhancing the quality, equity and sustainability of its own growth and development outcomes.

ICT Academy BRIDGE Conference themed "Fostering India for Industry 4.0" will bring together industry experts, academic leaders and Government policy makers to address the challenges faced by India Inc. in the era of Fourth Industrial Revolution and thus creating a correlated education ecosystem and formulating a strategic regulatory framework. It is the only event addressing the stakeholders and leaders in the process of bridging the government, industry & academia towards building the future India.

Event Format

- KEYNOTE SESSION BY POLICY MAKERS
