3D Printing and Additive Manufacturing

November 23-24, 2020 | Dubai, UAE

3D Printing 2020

Dear Colleagues

Conference Series LLC Ltd proudly announces the **3D Printing and Additive Manufacturing** scheduled during **November 23-24, 2020** in **Dubai, UAE**. The conference emphasizes the theme "**From Your Imagination to a 3D Model**".

The term "3D printing" is progressively utilized as an equivalent word for Additive Manufacturing. It transforms digital 3D models into strong solid by structure them up in layers. The innovation was first invented during the 1980s, and since that time has been utilized for rapid prototyping (RP). 3D Printing has been applied in engineering and healthcare since the beginning of 20th century. For the manufacturing of custom prosthetics and dental inserts, it was first utilized and after that on wards the medicinal applications for 3D printing has advanced essentially. 3D printing is the path towards making cell structures in a limited space using 3D printing innovation, where cell limit and suitability are spared inside the printed construct. 3D printing adds to huge advances in the medical field of tissue engineering by allowing for research to be done on innovative materials called biomaterials.. Thus this International Conference on 3D Printing and Additive Manufacturing will be focusing on all aspects for improving manufacturing industry.
