About Berlin

Berlin is the capital city of Germany and one of the 16 states of the Federal Republic of Germany. Berlin is the largest city in Germany and has a population of 4.5 million within its metropolitan area and 3.5 million from over 190 countries within the city limits. The city's mean annual temperature is about 48°F (9°C), and means temperatures range from 30°F (−1 °C) in winter to 65°F (18°C) in summer.

Berlin straddles the banks of the River Spree, which flows into the River Havel in the western borough of Spandau. Among the city's main topographical features are the many lakes in the western and southeastern boroughs formed by the Spree, Havel, and Dahme rivers. Due to its location in the European Plain, Berlin is influenced by a temperate seasonal climate. About one-third of the city's area is composed of forests, parks, gardens, rivers, canals and lakes.The city lies in the Central German dialect area, the Berlin dialect being a variant of the Lusatian-New Marchian dialects.

Berlin is best known for its historical associations as the German capital, internationalism and tolerance, lively nightlife, its many cafés, clubs, bars, street art, and numerous museums, palaces, and other sites of historic interest. Berlin's architecture is quite varied. Although badly damaged in the final years of World War II and broken apart during the Cold War, Berlin has reconstructed itself greatly, especially with the reunification push after the fall of the Berlin Wall in 1989.

It is now possible to see representatives of many different historic periods in a short time within the city centre, from a few surviving medieval buildings near Alexanderplatz, to the ultra-modern glass and steel structures at Potsdamer Platz. Because of its tumultuous history, Berlin remains a city with many distinctive neighbourhoods.
