Title: Advance xxxxxxxx of xxxxxxxx leads to lower percentage of same day cancellations, increasing positive xxxxxxxx experience

Name: xxxxxxxx

University/Organization; State, City, Country.

Abstract: **(Minimum 250 words Maximum 450 words)**

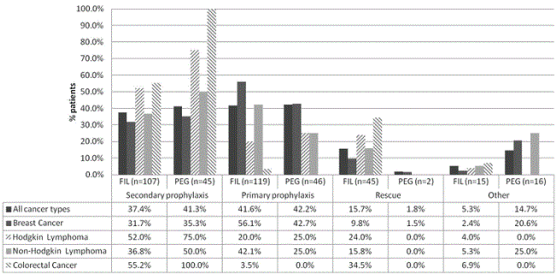

In 2017, an estimated xxxxxxxx new dental cases will be diagnosed (1). Many patients with a xxxxxx will need xxxxxxxx as part of their treatment. xxxxxxxx saw xxxxxxxx new patients in 2017, and performed over xxxxxxxx operating room anesthetics. Advanced assessment of xxxxxxxx for operating room procedures helps reduce the xxxxxxxx that occur on the same day of the scheduled procedure. Same day xxxxxxxx cause stress and frustration to all involved but most crucially for the patient and their family (2). The xxxxxxxx of a planned procedure has a negative impact on the xxxxxxxx.

Our xxxxxxxx assesses all patients with planned xxxxxxxx. All patients are screened using a xxxxxxxx, embedded into our xxxxxxxx and sent to our patients with the OR case is requested. All answers are validated with the patient by a xxxxxxxx. Patients are then either xxxxxxxx or called by xxxxxxxx to their planned procedure. xxxxxxxx have xxxxxxxx as indicated by their xxxxxxxx, and seen in clinic. Subspecialty xxxxxxxx are arranged as needed. The remaining xxxxxx had less complex medical history and are assessed by phone.

xxxxxxxx maintains a same day cancellation rate of xxxxxxxx assessing patients before their procedure date through xxxxxxxx with each patient by our providers. This contributes to xxxxxxxx experience in the xxxxxxxx.
