About Paris

Paris, city and capital of France, located in the north-central part of the country. People were living on the site of the present-day city, located along the Seine River some 233 miles (375 km) upstream from the river's mouth on the English Channel . The modern city has spread from the island and far beyond both banks of the Seine.

For centuries Paris has been one of the world's most important and attractive cities. It is appreciated for the opportunities it offers for business and commerce, for study, for culture, and for entertainment; its gastronomy, haute couture, painting, literature, and intellectual community especially enjoy an enviable reputation. Its sobriquet "the City of Light" earned during the Enlightenment, remains appropriate, for Paris has retained its importance as a centre for education and intellectual pursuits.
