An Exhibition will be held concurrently with the Conference. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Agricultural Sciences and Farming Technology.

About Sydney

Sydney, the capital of New South Wales, Australia. It is Australia's oldest and largest city with a population of around 4 million. Sydney is built around a huge harbour and hosts many tourist attractions as well as a number of beaches, bays and a couple of national parks. Sydney has many influences upon its style. Aboriginal sites and engravings can still be seen from the original occupiers, the Eora tribe. The city also has an anglo-mediterranean style and a growing Chinese and Asian influence.

The city is divided into North and South by the Sydney Harbour, with both Sydney Harbour Bridge and Tunnel connecting them. Most of the tourist attractions are in the South part of the city, with a large business and residential area in the North.The South part of the city consists of The Rocks and Circular Quay to the North, with the Central Station marking the South. Darling Harbour marks the West and there are a number of parks to the East.

The first sight of Sydney, whether from the sea or the air, is always spectacular. Built on low hills surrounding a huge harbour with innumerable bays and inlets, the city is dominated by the bulk of the Sydney Harbour Bridge, one of the longest steel-arch bridges in the world, and the Opera House, with its glittering white shell-shaped roofs that seem to echo the sails of the many yachts in the adjacent harbour. The intricate confusion of water and buildings makes a striking impression either by day or by night.
