ABOUT CONFERENCE

On behalf of the AGRIECONOMICS – 2023 Organizing Committee, we take great pleasure in inviting all participants from around the world to attend the "2nd International conference on Agriculture Economics" to be held from February 23-24, 2023 Singapore City, Singapore.on the theme "Cross-Sectoral Dialogue on the Adoption of Environmentally Sustainable Innovations".

Market analysis:

Traditional farming techniques based on naturally occurring biological processes are combined with current technology and ecological science in agriculture and organic farming systems. Recent advancements in fertilizers', chemicals, and seeds have made it possible for agricultural producers to keep up with the world's population's expanding demand for food. Despite the sharp advances in agricultural production, the agricultural sector has more hurdles than ever before in providing the expanding global economy with adequate supplies of agricultural staples.

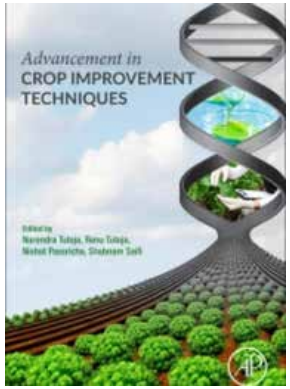

Market analysis
