Tentative Program

2nd International Conference on Microbiology

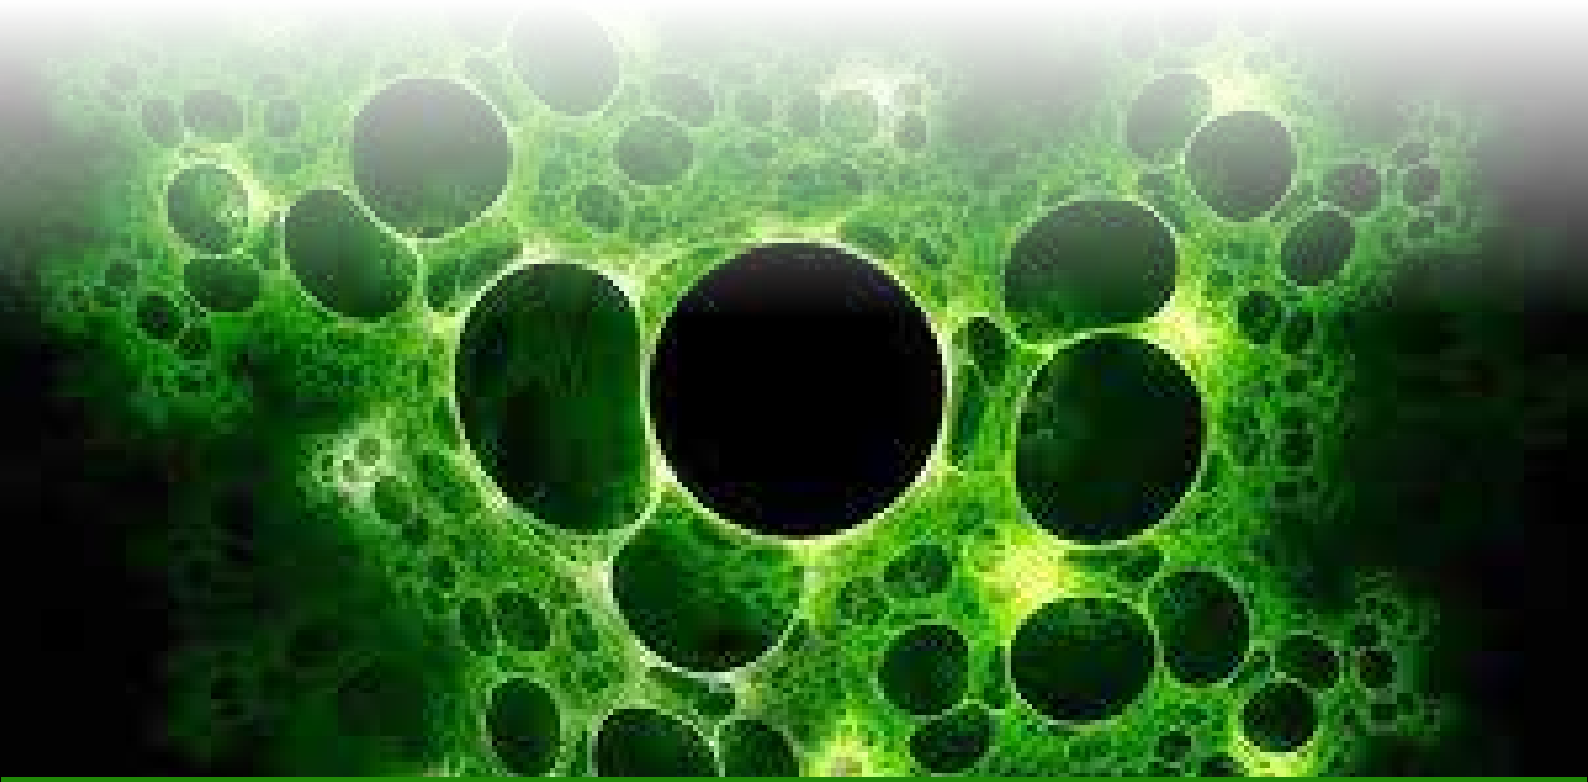

October 16-17, 2017, Baltimore, USA

Day 1
October 16, 2017
Opening Ceremony
Keynote Forum
Title: Cell wall stress response in Pseudomonas aeruginosa: involvement of the ECF sigma factor SigX
Normandy University, FRANCE
Title: Evolution by Tumor Neofunctionalization and Expression of Evolutionarily Novel Genes in Tumors.
A.P.Kozlov, St. Petersburg, Russia,
Title: Genetic Control and Regulation of the Biosynthesis of Isoprenoids in the Red Yeast Xanthophyllomyces dendrorhous.
Dr. Jennifer Alcaíno, Universidad de Chile - Santiago – Chile.
Coffee Break
Workshop
Title: Amino acid catabolism of Thermoanaerobacter and Caldanaerobacter species
Prof. Johann Orlygsson, University of Akureyri, Iceland
Speaker Forum
Title: The inflammatory infiltrate in the acute stage of the dextran sulphate sodium induced colitis and why it still matters
Dr. Liljana Stevceva, The Unviversity of Texas, USA
Title: The honey bee microbiota
Dr. Kirk E. Anderson, University of Arizona, Tucson.
Lunch
Title: Vaccines against HSV-2 and HSV-1 genital herpes: lessons from the cotton rat model
Dr. Marina Boukhvalova, Sigmovir Biosystems, Inc., USA
Title: Identification and characterization of alternative antimicrobials against Gardnerella vaginalis.
Megan Ross, Laurentian University, Sudbury, ON, Canada
Title: Expeditious Modus Operandi to Produce Commingled Single Cell Protein and its Uses in Intractable Diseases.
Bharat Kwatra, St. Marys School, India.
Title: Phosphylated Oximes Increase Organophosphate Toxicity
Sarah Eysoldt, Florida International University, Miami, Florida.
Coffee Break
Title: Low Temperature Extends Lifespan of Pine Wood Nematode (Bursaphelenchus xylophilus) through cGMP Pathway
Wang Bowen, Northeast Forestry University School of Forest, China
Title: H3N2 Influenza vaccine rates and other protective behaviors amongst college students
Dr. Narveen Jandu, Gannon University, Erie.
Title: Early proteomic changes induced by fusariotoxin single and combined exposures on human hepatocytes
Marie-Caroline Smith, Laboratoire Universitaire de Biodiversité et Ecologie Microbienne, France
Title: Transition metal complexes/organometallic compounds as anticancer/anti HIV drugs or in pharmaceutical industry
Dr. Prakash, Sri Vidyanikethan Engineering college, India
Closing Ceremony
Day 2
October 17 2017
Keynote Forum
Title: Imbalances in the Oral Mucosal Microbiota Associated with Oral Mucosal Diseases
Dr. Youngnim Choi, Seoul National University School of Dentistry, Seoul, Korea

Title: Variation in root nodules on Legume Root treated with rhizopine and inoculated with Rhizopine and Non-Rhizopine Rhizobia Species
Chikezie Owuama, Modibbo Adama University of Technology, Yola, Nigeria
Workshop
Speaker Forum
Title: Clinical findings after indoor micro-fungal and trichothecene exposure
Irene H, Jack D Thrasher, New York Medical College, USA
Coffee Break
Title: Prevalence of salmonella and shigella species in chicken eggs from different poultry farms in owerri, imo state, nigeria
Dr. Pauline Amaka, Nnamdi Azikiwe University, Awka, Nigeria
Title: Evidence for plasmid-conferring salt tolerance in root associated bacteria from halophytes (Haloxylon recurvum and Atriplex amnicola) and non-rhizospheric soil samples
Salma Mukhtar, National Institute for Biotechnology and Genetic Engineering, Pakistan
Exhibitions
Title: Analysis of more than 380 mycotoxins in 829 feed and raw material samples in 2016
Simone Schaumberger, University of Natural Resources and Life Sciences, Austria
Lunch
Title: Bacterial flora of Indian red jungle fowl (Gallus gallus murghi) semen and their sensitivity
Zartasha Zafara, Department of Zoology Pir Mehr Ali Shah Arid Agriculture University, Pakistan
Title: Development of diagnostic pathogen specific kits for monitoring of drinking water quality

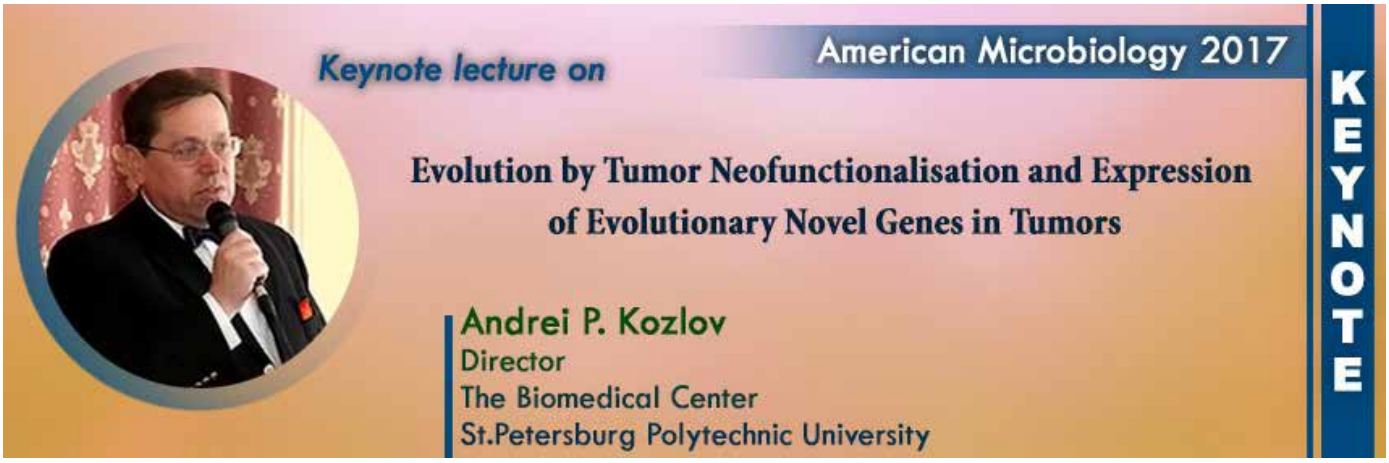

Dr. Parampal Sahota, Punjab Agricultural University, India

Title: Dengue seroprevalence, seroconversion and disease risk factors in Dhaka, Bangladesh
Parnali Dhar Chowdhury, U.S. Food and Drug Administration, U.S.A.
Coffee Break
Exhibitions
Awards & Closing Ceremony

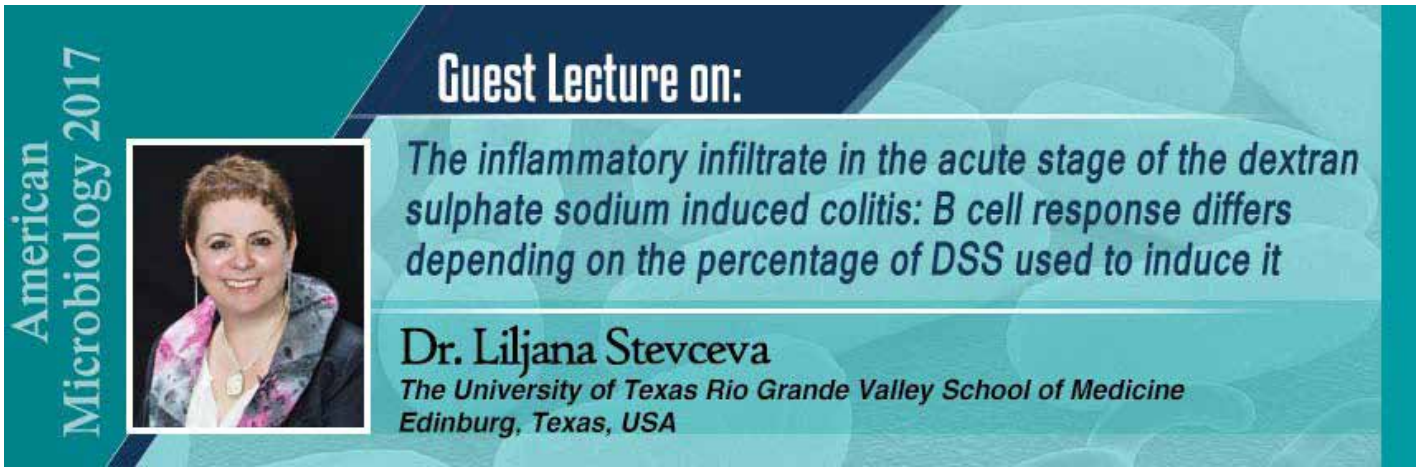

Keynote Speakers

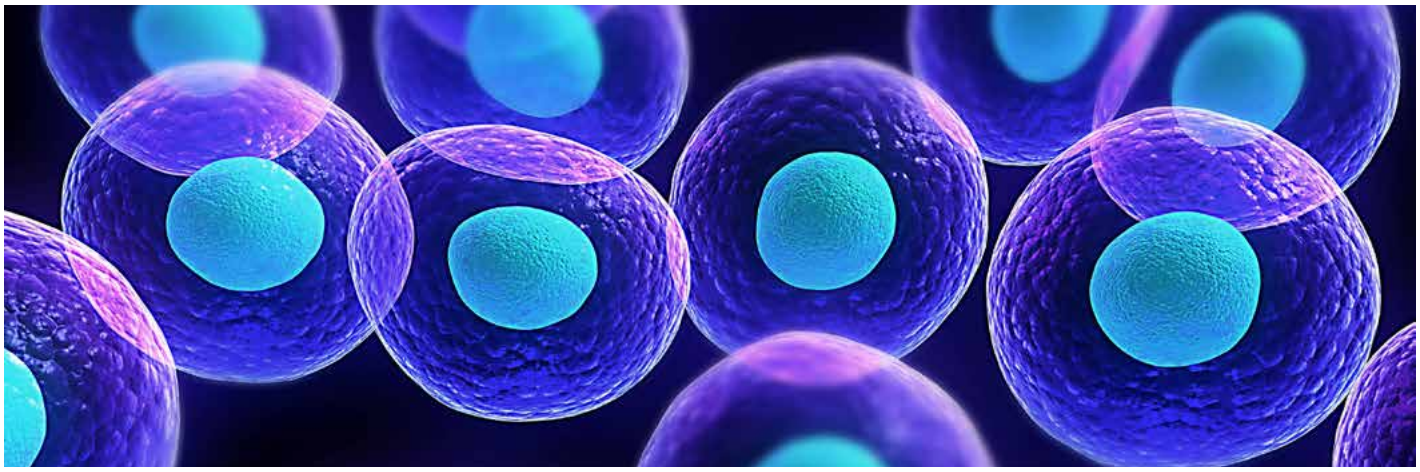

American Microbiology 2017
Exclusive session on :
Imbalances in the Oral Mucosal Microbiota Associated with Oral Mucosal Diseases
Prof. Youngnim Choi
Seoul National University School of Dentistry
Korea

Speech on
American Microbiology 2017
"Understanding dengue transmission by using participatory research and community-focused strategies for prevention and control in Bangladesh"
Parnali Dhar Chowdhury
University of Manitoba Winnipeg, Canada

Keynote Presentation on
American Microbiology 2017
Cell wall stress response in Pseudomonas aeruginosa: involvement of the ECF sigma factor SigX
Prof. Sylvie Chevalier
University of Rouen Normandy, FRANCE
http://microbiology.conferenceseries.com/america/

Major Scientific Sessions

- Microbiology
- Bacteriology
- Virology
- Parasitology
- Vaccines & Vaccinology
- Diagnostic-Microbiology
- Medical & Pharmaceutical Microbiology
- Clinical Microbiology & Microbial infections
- Water Microbiology
- Bacterial Pathogenesis
- Soil Microbiology & Agricultural Microbiology
- Industrial Microbiology & Food Microbiology
- Biofuels & Petroleum Microbiology
- Antimicrobials and Chemotherapy
- Microbial Ecology
- Veterinary Microbiology
- Mycology and Phycology
- Disease, Diagonosis and Prevention:
- Systems Biology & Bioinformatics
- Geo Microbiology
- Bioremediation, Biodegradation & Biodeterioration
- Microbial Biofilms
- Infection and Immunity

Best Poster Award

- You will be given about 5-7 minutes to present your poster including questions and answers. Judges may pose questions during the evaluation of the poster
- Judges will even evaluate the student's enthusiasm towards their study, interest and knowledge in the area of their research
- The winners will be announced at the closing ceremony of the conference. The decision of the winner will be withdrawn if the winner/winners is/are not present at the time of announcement
- Apart from the judging time you may also be present at the poster to share your research with interested delegates

Young Researchers Forum

- Present your research through oral presentations
- Learn about career development and the latest research tools and technologies in your field
- This forum will give pertinent and timely information to those who conduct research and those who use and benefit from research
- Develop a foundation for collaboration among young researchers
- The forum will provide an opportunity for collegial interaction with other young investigators and established senior investigators across the globe
- Interact and share ideas with both peers and mentors

About Baltimore, USA

Founded in 1729, Baltimore is the second largest seaport in the Mid-Atlantic. Baltimore's Inner Harbor was once the second leading port of entry for immigrants to the United States and a major manufacturing center. After a decline in major manufacturing, industrialization and rail transportation, Baltimore shifted to a service-oriented economy, with the Johns Hopkins Hospital (founded 1889), and Johns Hopkins University (founded 1876), now the city's top two employers. Baltimore is in north-central Maryland on the Patapsco River close to where it empties into the Chesapeake Bay. The city is also located on the fall line between the Piedmont Plateau and the Atlantic Coastal Plain, which divides Baltimore into "lower city" and "upper city". The city's elevation ranges from sea level at the harbor to 480 feet (150 m) in the northwest corner near Pimlico. The city is rich in architecturally significant buildings in a variety of styles. The Baltimore Basilica (1806–1821) is a neoclassical design by Benjamin Latrobe, and also the oldest Catholic cathedral in the United States. In 1813 Robert Cary Long, Sr., built for Rembrandt Peale the first substantial structure in the United States designed expressly as a museum. Restored, it is now the Municipal Museum of Baltimore, or popularly the Peale Museum. The streets of Baltimore are organized in a grid pattern, lined with tens of thousands of brick and formstone-faced rowhouses. In The Baltimore Rowhouse, Mary Ellen Hayward and Charles Belfoure considered the rowhouse as the architectural form defining Baltimore as "perhaps no other American city. In the mid-1790s, developers began building entire neighborhoods of the British-style rowhouses, which became the dominant house type of the city early in the 19th century. Under the Köppen classification, Baltimore lies within the humid subtropical climate zone (Cfa), with four distinct seasons, and is part of USDA plant hardiness zones 7b and 8a. Winters are chilly but variable, with sporadic snowfall: January has a daily average of 35.8 °F (2.1 °C),though temperatures reach 50 °F (10 °C) rather often and drop below 20 °F (−7 °C) when Arctic air masses affect the area.
