About the conference

The 26th Global Summit on Analytical and Bioanalytical Techniques will be held in Paris on July 17-18, 2025 in Paris, France. Keynote speeches, oral presentations, poster presentations, and exhibitions will also be held in a timely manner. The subject matter of the convention is “shaping the destiny with new studies in analytical chemistry”. It provides a platform for the critical analysis of new data, expands the reach of analytical chemists, and exchanges the latest research findings and results on all aspects of bioanalytical and analytical techniques.

The Analytical Conference offers research papers on analytical chemistry expertise from a variety of scientific backgrounds and is open to young researchers and students. The main purpose of the Analytical Techniques Conference is to spread knowledge about analytical and bioanalytical techniques, chromatography, separation techniques, mass spectroscopy, spectroscopy, and spectrometry. With research in both pharmaceutical and life sciences, Analytical 2025 is the perfect place to exchange and develop knowledge on critical analytical techniques and tools. Analytics 2025. deals with the study of all aspects of the substances that make up matter, their properties and reactions, and the use of such reactions to form new substances.

Theme: “ Analytical Frontiers: Shaping the Future of Bioanalytical Sciences ”.
