- Industrial and Microbial Biotechnology
- Algal Biotechnology
- Agricultural and Environment Biotechnology
- CRISPR
- Food Processing and Technology
- Marine Biotechnology
- BioInformatics
- Cell science and Cell Biology
- Biotechnology Industries in the Market

About Vancouver...

The town of Vancouver is a coastal seaport city on the mainland of British Columbia, Canada, and the most populous city in the province. Vancouver is consistently named as one of the top five worldwide cities for livability and standard of life, and the Economic intelligence unit acknowledged it as the first city to rank among the top-ten of the world's most liveable cities for five successive years. Vancouver has been called a "city of neighborhoods" and it is the rightly earned reputation for being one of the most mesmerizing cities in the world. Downtown Vancouver is superbly situated on a cape in the Strait of Georgia, bounded to the south by the delta of the Fraser River and to the north by an intense fiord reaching far inland (Burrard Inlet). Also to the north, gleam the often snow-covered ranges of the Coast Mountains.With its large parks and relatively equable climate keeping temperatures mild throughout the year, Vancouver is a paradise for holiday activities. But it also owns a busy cultural life, and the modern Downtown is easily explored on foot.
