INVITATION

Dear Attendees,

We are delightful to welcome you to the **2nd Annual Biotechnology Congress** which is scheduled in the month of **July 29-30, 2019** at **Chicago, USA** organized by Conference Series LLC Ltd in collaboration with generous support and cooperation from enthusiastic academicians and editorial Board Members.

Annual Biotechnology 2019 invites people all over the world invariable of age to discuss the wonders happening in the ever-growing field of Biotechnology, Microbiology, Molecular Biology, Biochemistry, Cell science, Bioinformatics, Bioscience and Biofules. This conference is an acting stage for Researchers, University Professors, Students, Healthcare professionals, Heads from Industries, Organizations and Societies, Health Services, Research laboratories, Manufacturing Medical Devices Companies, Business Entrepreneurs etc., to showcase their innovations and new ideas.

The main theme of the conference is "**Explore the diverse uses of Biotechnology**" which will ignite young minds in searching a novel approach towards the marvels of sustainable future.

Knowledge is Application. This Knowledge gathering initiative focuses on Knowledge accumulation but also helps in practical approach towards future aspects in the fascinating arena of Life Sciences.

We look forward to personally welcoming you to **Chicago** this **July**.

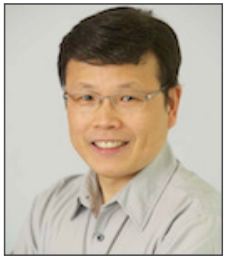

Sincerely,

Annual Biotechnology 2019 | Organizing Committee

Market Analysis

Biotechnology is a biology-based technology revolutionizing fields like agriculture, medicine and food, and bringing new changes everyday, making it difficult to stay updated.

In recent years, the biotechnology industry has been defined by a number of mergers and acquisitions as well as several companies going public. Biotechnology draws from biomolecular and cellular processes to formulate products ranging from drugs to industrial enzymes. The global biotechnology industry currently features over 250 products for healthcare alone. Likewise, biotechnology also increasingly finds uses in the agriculture sector to protect crops against pests and insects. The use biotechnology in formulating new grades of biobased fuels is currently an area witnessing considerable attention.

On the basis of geographical regions, global biotechnology market is segmented into North America, Europe, Latin America, Asia-Pacific, and MEA. North America accounted for the largest share of the overall industry in 2013, accounting for over 42.30% of the revenue share, as a result of increasing initiatives in R&D by various pharmaceutical companies.

The global market for biotechnology is expected to reach USD 604.40 billion by 2020. Increasing application scope coupled with the rising demand for effective vaccines and drugs in an attempt to improve healthcare access to patients with unmet medical needs is expected to drive market demand over the next six years. In addition, the need to enhance agricultural productivity via the use of genetically engineered seeds is expected to serve this market as a driver.

The USA biotechnology market size was valued at USD 270.5 billion in 2013 and is expected to grow at a CAGR of 12.3% owing to the increasing demand for diagnostics and therapeutics solutions such as recombinant technology, red biotechnology, and DNA sequencing. The increasing prevalence of diseases such as cancer, hepatitis B, and other orphan disorders is expected to serve as a high-impact rendering driver for this industry in recent period. Rising government initiatives owing to high significance towards growth of the economy are expected to boost the biotechnology market growth over the forecast period.
