INVITATION FOR CONFERENCE

DEAR
COLLEAGUES,

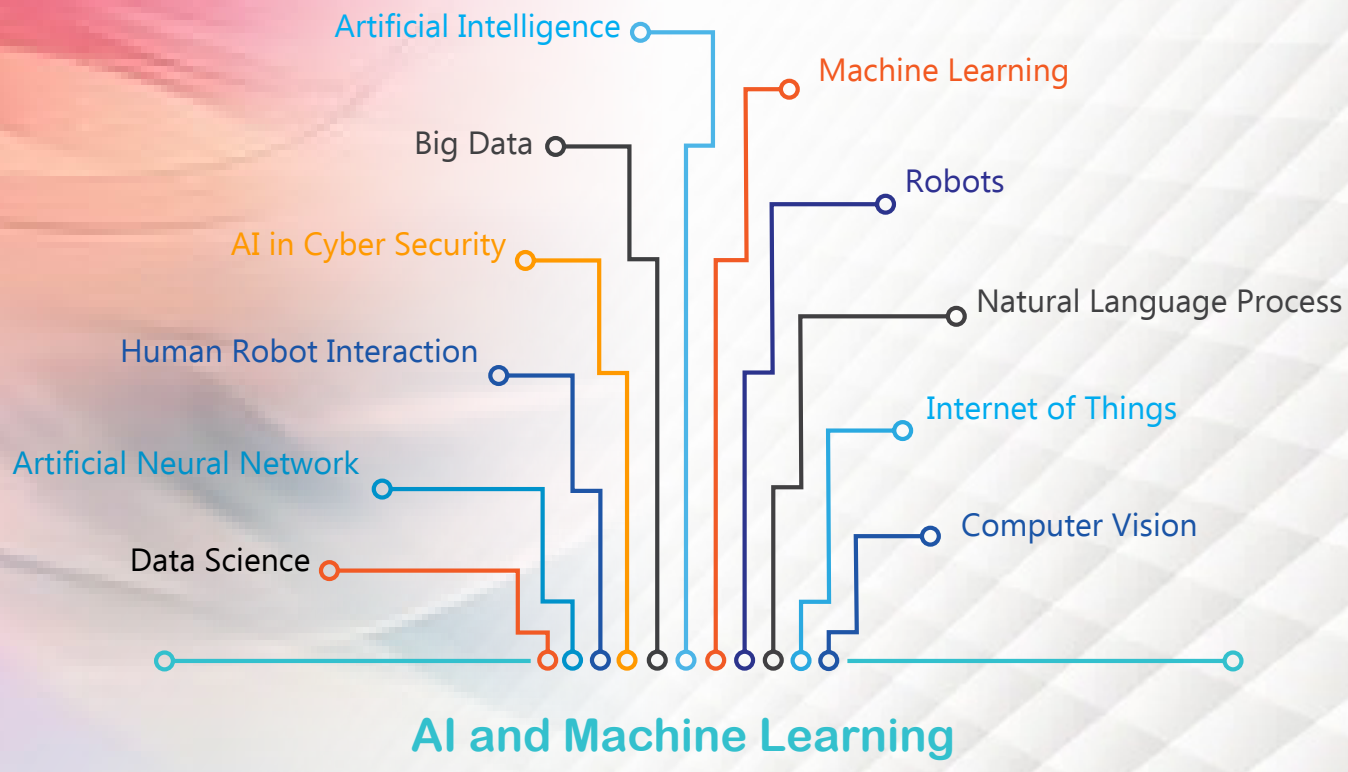

You're invited to join us at the **5th International Congress on AI and Machine Learning**, set to take place in **Paris, France** on **October 14-15, 2024**. With our theme, "Unleashing the power of data through AI and Machine Learning." the congress promises a deep dive into the transformative potential of these technologies. Join us for engaging discussions, insightful presentations, and networking opportunities with experts and enthusiasts from around the globe.

Artificial Intelligence 2024 is an International platform to adverse and study about the latest technology, innovations, applications, and intense research to share complete knowledge. The conference contains significant international experts, professor, specialists, research scholars and Student Delegates and Exhibitors form all over the world. Conference will be featuring oral presentations, poster presentations, keynote talks, workshops and many more.

What's in store for 2024?

Renowned Speakers 2024

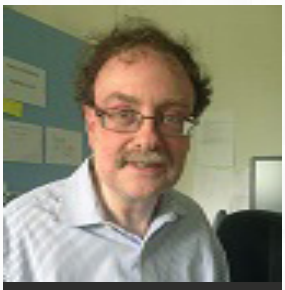

Makoto Naruse

The University of Tokyo, Japan

Md Rahatul Islam

Advance Robotics Research Center, CEO & Vice-president, Bangladesh

Fionn Murtagh

Professor University of Derby,

Alexander Waibel

Assistant professor of Computer Science, Spain

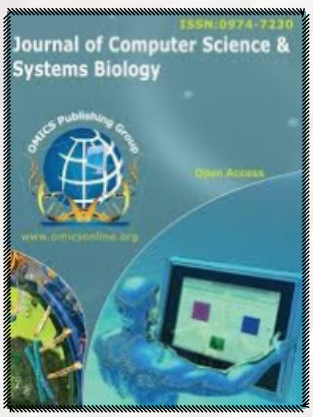

Selected contributions will be published in following Conference Series Journals Supported By

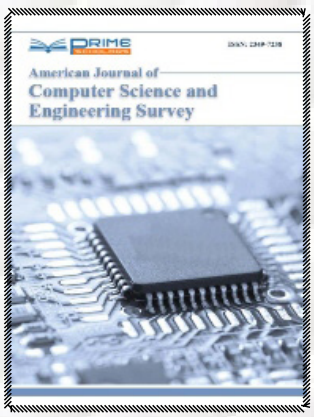

→ Journal of information technology & Software Engineering

→ Journal of Computer Science & System Biology

→ Computer Science nad Engineering Survey

Venue & Accommodation

Paris, France

Paris, France

Paris, city and capital of France, situated in the north-central part of the country. People were living on the site of the present-day city, located along the Seine River some 233 miles (375 km) upstream from the river's mouth on the English Channel (La Manche), by about 7600 BCE. The modern city has spread from the island (the Île de la Cité) and far beyond both banks of the Seine. Paris's site at a crossroads of both water and land routes significant not only to France but also to Europe has had a continuing influence on its growth. Under Roman administration, in the 1st century BCE, the original site on the Île de la Cité was designated the capital of the Parisii tribe and territory. The Frankish king Clovis I had taken Paris from the Gauls by 494 CE and later made his capital there. Under Hugh Capet (ruled 987–996) and the Capetian dynasty the preeminence of Paris was firmly established, and Paris became the political and cultural hub as modern France took shape. France has long been a highly centralized country, and Paris has come to be identified with a powerful central state, drawing to itself much of the talent and vitality of the provinces. The three main parts of historical Paris are defined by the Seine. At its centre is the Île de la Cité, which is the seat of religious and temporal authority (the word cité connotes the nucleus of the ancient city).
