Tentative Program

Annual Conference on
Microbes and Beneficial Microbes

(10 Plenary Forums 2 days 1 Event)
October 16-17, 2017 Baltimore, Maryland, USA

Program at A Glance

Day 1

Morning Sessions

Reception/Registration	08.00-09.00
	Time	**General Session**
Least of 3 Keynote/Plenary Talks	09.00-09.15	Inaugural Address
	09.15-09.45	Keynote/Plenary Talk 1
	09.45-10.15	Keynote/Plenary Talk 2
	10.15-10.45	Keynote/Plenary Talk 3
Panel Discussions/Group Photo	
Coffee/Tea Break 10.45-11.00 (Networking)	
11.00-12.40	Microbes and Beneficial Microbes

Evening Sessions

Lunch Break 12.40-13.30
13.30-15.30 — Microbes in Human welfare & Host-Microbe Interactions
Coffee/Tea Break 15.30-15.45 (Networking)
15.45-17.25 — Microbes in Pharma & Microbial Antibiotics

Day 2

Morning Sessions

	Time	**Session 1**	**Session 2**
	09.00-10.40	Keynote Forum	Potential Use of Beneficial Microbes & Microbial Biofuels
Coffee/Tea Break 10.40-10.55 (Networking)			
	10.55-12.35	Probiotics-Prebiotics Research	Soil and Agricultural Microbiology

Evening Sessions

Lunch Break 12.35-13.25
13.25-15.05 — Microbial Ecology & Environmental — Microbial Diversity & Microbes in Aqua
Coffee/Tea Break 15.05-15.20 (Networking)
15.20-17.00 — Microbial Diseases & Microbial Genomes — Industrial Use of Microbes
Awards & Closing Ceremony

NOTE: Program Schedule is subject to change with final allotment of the speaker slots

Major Scientific Sessions

- Environmental Microbes
- Microbes in Food
- Microbes in Pharma
- Microbes in Aqua
- Microbes in Beverages Industries
- Field of Probiotics
- Microbes in Agriculture
- Microbial Biofuels
- Microbial Antibiotics
- Industrial Applications of Microbes
- Microbial Genomes
- Microbial Ecology
- Microbes in Human welfare
- Microbial Enzymes
- Pathogenic Microbes

Best Poster Award

- You will be given about 5-7 minutes to present your poster including questions and answers. Judges may pose questions during the evaluation of the poster
- Judges will even evaluate the student's enthusiasm towards their study, interest and knowledge in the area of their research
- The winners will be announced at the closing ceremony of the conference. The decision of the winner will be withdrawn if the winner/winners is/are not present at the time of announcement
- Apart from the judging time you may also be present at the poster to share your research with interested delegates

Young Researchers Forum

- Present your research through oral presentations
- Learn about career development and the latest research tools and technologies in your field
- This forum will give pertinent and timely information to those who conduct research and those who use and benefit from research
- Develop a foundation for collaboration among young researchers
- The forum will provide an opportunity for collegial interaction with other young investigators and established senior investigators across the globe
- Interact and share ideas with both peers and mentors

Microbiology 2016 Conference Glimpses

Beneficial Microbes 2016 Conference Glimpses

About Baltimore, Maryland, USA

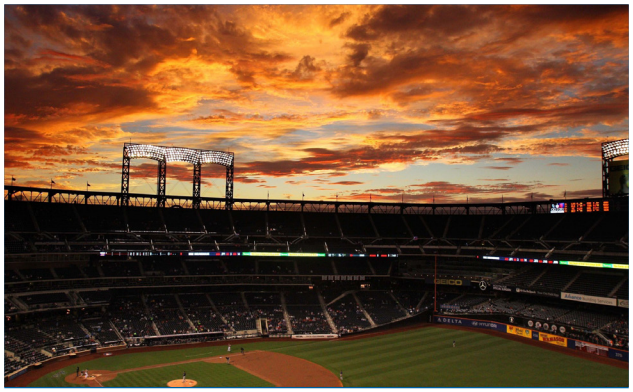

Founded in 1729, Baltimore is the second largest seaport in the Mid-Atlantic. Baltimore's Inner Harbor was once the second leading port of entry for immigrants to the United States and a major manufacturing center. After a decline in major manufacturing, industrialization and rail transportation, Baltimore shifted to a service-oriented economy, with the Johns Hopkins Hospital (founded 1889), and Johns Hopkins University (founded 1876), now the city's top two employers. Baltimore is in north-central Maryland on the Patapsco River close to where it empties into the Chesapeake Bay. The city is also located on the fall line between the Piedmont Plateau and the Atlantic Coastal Plain, which divides Baltimore into "lower city" and "upper city". The city's elevation ranges from sea level at the harbor to 480 feet (150 m) in the northwest corner near Pimlico. The city is rich in architecturally significant buildings in a variety of styles. The Baltimore Basilica (1806–1821) is a neoclassical design by Benjamin Latrobe, and also the oldest Catholic cathedral in the United States. In 1813 Robert Cary Long, Sr., built for Rembrandt Peale the first substantial structure in the United States designed expressly as a museum. Restored, it is now the Municipal Museum of Baltimore, or popularly the Peale Museum. The streets of Baltimore are organized in a grid pattern, lined with tens of thousands of brick and formstone-faced rowhouses. In The Baltimore Rowhouse, Mary Ellen Hayward and Charles Belfoure considered the rowhouse as the architectural form defining Baltimore as "perhaps no other American city. In the mid-1790s, developers began building entire neighborhoods of the British-style rowhouses, which became the dominant house type of the city early in the 19th century. Under the Köppen classification, Baltimore lies within the humid subtropical climate zone (Cfa), with four distinct seasons, and is part of USDA plant hardiness zones 7b and 8a. Winters are chilly but variable, with sporadic snowfall: January has a daily average of 35.8 °F (2.1 °C),though temperatures reach 50 °F (10 °C) rather often and drop below 20 °F (–7 °C) when Arctic air masses affect the area.

Opening Ceremony

Keynote Forum

Introduction

Title: Evolutionary genetics of microbe-plant symbioses: A conduit for constructing the sustainable crop production systems

Provorov Nikolai, All-Russia Research Institute for Agricultural Microbiology, Russia

Coffee Break

Workshop

Title: Diversity, evolution and application of microbe-plant interactions in sustainable agriculture

Organizer: Dr.Provorov Nikolai, Deputy Director in research of All-Russia Research Institute for Agricultural Microbiology

Title: Molecular evolution of paralogous symbiotic receptor kinase genes in pea (*Pisum sativum* L)

Vladimir A Zhukov, All-Russia Research Institute for Agricultural Microbiology, Russia

Title: The role of plant growth promoting microbes in the maintenance of the mysterious fairy circles of Namibia

Jacobus Johannes Marion Meyer, University of Pretoria, South Africa

Title: Biodiversity of naturally transgenic Linaria plants

Tatiana V Matveeva, St. Petersburg State University, Russia

Title: Application of biosurfactant for general welfare of economically important crops with special reference to management of phytopathogenic fungi

Suresh Deka, Institute of Advanced Study in Science and Technology, India

Lunch Break

Title: The pea (*Pisum sativum* L) selectivity towards nitrogen-fixing microsymbiont caused by receptor-like kinase gene *LykX*

Anton Sulima, All-Russia Research Institute for Agricultural Microbiology, Russia

Title: Evolutionary genetics of microbe-plant symbioses: A conduit for constructing the sustainable crop production systems

Provorov Nikolai, All-Russia Research Institute for Agricultural Microbiology, Russia

Title: Bacterial endophytes of grapevine (*Vitis vinifera* L.) as beneficial partners for the effective plant-microbial systems

Vladimir Kuzmich Chebotar, All-Russia Research Institute for Agricultural Microbiology, Russia

Video Presentation

Title: Bioprocess optimization and purification of highly stable protease from a novel thermophilic strain of *Streptomyces* sp. MST-3

Maryam Shafique, Federal Urdu University of Arts, Science and Technology, Pakistan

Coffee Break

Day 2 September 23, 2016

Buckhorn

Keynote Forum

Title: An Overview of Thermophilic Bioprocessing of Solid Wastes to Biofuels
Rajesh Sani, South Dakota School of Mines and Technology, USA

Coffee Break

Session 1: Microbes Potential Uses | Industrial Applications of Microbes | Environmental Microbiology | Applications of Extremophiles

Session Chair: Choong-Min Kang, California State University, USA
Session Co-Chair: Eman M Khalaf, University of Guelph, Canada

Session Introduction

Title: Reduction of feedback inhibition in homoserine kinase (ThrB) enhances the L-threonine biosynthesis
Choong-Min Kang, California State University, USA
Title: Extremophiles in biofuel synthesis from solid wastes
Rajesh Sani, South Dakota School of Mines and Technology, USA
Title: Taxonomic diversity of cucurbit seed associated endophytes
Eman M Khalaf, University of Guelph, Canada

Lunch Break

Poster Presentations

P01 **Title: Study of sequences in *Nicotiana* genomes acquired from *Agrobacterium* by horizontal gene transfer**
Galina Khafizova, Saint-Petersburg State University, Russia

P02 **Title: Physiological functions of the CreBC two-component regulatory system in *Stenotrophomonas maltophilia***
Tsuey-Ching Yang, National Yang-Ming University, Taiwan
