

OMICS Group Conferences
Accelerating Scientific Discovery

International Conference and Exhibition on

Cancer Science & Therapy

15-17 August 2011, Las Vegas, USA

Program

Conference Venue

Renaissance Las Vegas Hotel
3400 Paradise Road, Las Vegas, Nevada
89169-2770 USA
Main (702) 784-5700
Reservations (800) 750-0980
Meetings (702) 784-5751

Conference Secretariat

5716 Corsa Ave., Suite 110, Westlake, Los Angeles, CA 91362-7354, USA
Phone: +1- 650-268-9744, Fax: +1-650-618-1414, Toll free: +1-800-216-6499
Email: cancerscience2011@omicsonline.org

Renaissance II & III

18:00-19:00 Registrations — 14th August 2011

Day 1-15 Aug 2011

07:00-08:30 Registrations

07:30-08:00 Breakfast

08:30-08:55 Opening Ceremony

Keynote Forum

08:55-09:00 **Introduction**

09:00-09:25 Dr. Michael Mlngzhao Xing, Johns Hopkins University School of Medicine, USA

09:25-09:50 Dr. Mahin Khatami , National Cancer Institute, USA

09:50-10:15 Dr. Francois M. Vallete, INSERM and Universite de Nantes, France

Coffee Break: 10:15-10:30

10:30-10:55 Dr. Stephen W. J. Wang, Millennium Pharmaceuticals Inc, USA

10:55-11:20 Dr. Jimmy T. Efird, Brody School of Medicine, USA

11:20-11:45 Dr. Eugene P. Goldberg, University of Florida, USA

11:45-12:10 Dr. John Thompson, University of Waterloo, Canada. Senesco Technologies Inc., USA

12:10-12:35 Dr. Shyamal Dilip Desai, LSU Health Sciences Center, USA

12:35-13:00 Dr. Sudhakar Akul Yakkanti, Boys Town National Research Hospital, USA

Lunch: 13:00-13:40

Track 1-1: Cancer Stem Cells and Metastatic Growth
Track 1.2: Cell Signaling and Membrane Proteins; Inflammation and Inflammatory Factors in Cancer Development
Track 1.3: Metastatic Cell Growth & Adhesion; Apoptosis & Cell Division

Session Introduction

13:40 - 14:00 **Title: Blocking cancer metastasis with TGF-beta antagonists**

Dr. Lu Zhe Sun, University of Texas Health Science Center at San Antonio USA

14:00 - 14:20 **Title: Molecular targeting of cancer stem cells by the small molecule dichloroacetate (DCA) through the disruption of the OCT4/PKM2 complex**

Dr. Francois M. Vallette, INSERM and Universite de Nantes, France

14:20 - 14:40 **Title: Matrix metalloproteinases in crosstalk between cancer cells and osteoblasts in the bone invasion of oral squamous cell carcinoma**

Dr. Jin Gao, James Cook University, Australia

14:40 - 15:00 **Title: Cancer stem cells**

Dr. Caterina La Porta, University of Milan, Italy

15:00 - 15:20 **Title: Deconstructing cancer progression: Cancer stem cells and dedifferentiation**

Dr. Carlos F. D. Rodrigues, University of Coimbra, Portugal

15:20 - 15:40 **Title: Stat5: From lactogenesis to tumorigenesis**

Dr. Itamar Barash, Institute of Animal Science, Israel

15:40 - 16:00 **Title: Inflammatory chemokines in breast cancer: Regulation by genetic and host factors**

Dr. Adit Ben-Baruch, Tel Aviv University, Israel

Coffee Break: 16:00-16:15

16:15 - 16:35 **Title: The ESCRT pathway and ubiquitin-binding ability of Tsg101 are required for dynamic Src trafficking and v-Src-mediated invadopodia formation and invasion**

Dr. Chun Tu, University of Nebraska Medical Center, USA

16:35 - 16:55 **Title: Individual chemosensitivity test for personalized therapy in cancer patients**

Dr. Jianping Gong, Huazhong University of Science and Technology, P. R. China

16:55 - 17:15 **Title: Tanshinone IIA on apoptosis via SAPK/JNK signal transduction in pancreatic cancer cells**

Dr. Peihao Yin, Shanghai University of Traditional Chinese Medicine, China

17:15 - 17:35 **Title: The anti-tumor effect of fermented curcumin**

Dr. Ha-rim Choi, Nambu University, Republic of Korea

17:35 - 17:55 **Title: Involvement of extracellular proteases ADAM17 and ADAM10 in germ cell apoptosis induced by etoposide.**

Dr. Ricardo D Moreno, Pontificia Universidad Católica de Chile, Chile

17:55 - 18:15 **Title: Polypeptide N acetylgalactosaminyl transferases expression in Pancreatic cancer**

Dr. Prakash Radhakrishnan, University of Nebraska Medical Center, USA

Capital Room

Track 2-1: Biomarkers in Cancer Therapy & Molecular Diagnostics
Track 2-2: DNA Methylation and Mutation based biomarkers

Session Introduction

13:40 - 14:00 **Title: Prognostic utility of BRAF mutation in thyroid cancer**

Dr. Michael Mingzhao Xing, Johns Hopkins University School of Medicine, USA

14:00 - 14:20 **Title: New biomarkers for cancer vaccine research**

Dr. Jeff Gildersleeve, National Cancer Institute, USA

14:20 - 14:40 **Title: Signature molecular biomarkers of prognosis of gastric adenocarcinoma: A study of 114 cases using genome-wide technique and FISH**

Dr. Dongfeng Tan, University of Texas MD Anderson Cancer Center, USA

14:40 - 15:00 **Title: Biomarkers for therapy with the EGFR inhibitors**

Dr. Helmout Modjtahedi, Kingston University London, UK

15:00 - 15:20	**Title: Tumor specific oligomeric forms of protein b23/nucleophosmin** **Dr. Natalia Vladimirova,** Russian Academy of Sciences, Russia
15:20 - 15:40	**Title: A biomarker and immunomarkers approach for the diagnosis of poorly differentiated neuroendocrine carcinoma** **Dr. M. H. Bukhari,** King Edward Medical University, Pakistan
15:40 - 16:00	**Title: Methylation array analysis of tissue DNA in oral squamous cell cancer patients in Taiwan** **Dr.Yu Fen Li,** China Medical University, Taiwan
	Coffee Break: 16:00-16:15
16:15 - 16:35	**Title: Proximity Ligation for visualization of protein-protein interactions in cancer cell signaling and early cancer detection through novel blood based biomarkers** **Dr. Simon Fredriksson,** Olink Bioscience AB, Sweden
16:35 - 16:55	**Title: Methylation biomarkers – From discovery to clinical use** **Dr. Tomasz K Wojdacz,** University Hospital of Aarhus, Denmark
16:55 - 17:15	**Title: Molecular and biochemical evaluation of anti-proliferative effect of (*Cichorium endivia, L.*) phenolic extracts** **Dr. Ali S. Alshehri,** King Khalid University, Saudi Arabia

Track 2.3: Prognostic biomarkers
Track 2.4: Biomarkers based on Cancer Types

Session Introduction

17:15 - 17:35	**Title: Season-of-Birth as a prognostic factor of survival time follow a diagnosis of cancer** **Dr. Jimmy Efird,** Brody School of Medicine, USA
17:35 - 17:55	**Title: Molecular screening for Lynch syndrome population based approach using immunohistochemistry and methylation analysis** **Dr. Lars Henrik Jensen,** University of Southern Denmark, Denmark
17:55 - 18:15	**Title: Gold nanoparticles and nanotechnology for cancer biomarker discovery and research** **Dr. Qun Huo,** University of Central Florida, USA
18:15- 18:35	**Title: Combination of Notch1 and Notch2 as prognostic marker on Patients with colorectal cancer** **Dr. Dake Chu,** The Fourth Military Medical University, China
18:35- 18:55	**Title: Novel Role for orphan receptor PXR in Cancer** **Dr. Sridhar Mani,** Albert Einstein College of Medicine, Bronx, NY

Place: Renaissance Room I

Dinner

Sponsored by:
Journal of Cancer Science & Therapy

DAY 2-16 Aug 2011

Capital Room

07:30-08:00 **Breakfast**

Track 3: Advances in cancer detection and imaging

Session Introduction

08:30 - 08:50	**Title: Imaging of exogenous gene expression for personalizing therapy** **Dr. Vikas Kundra,** University of Texas M.D. Anderson Cancer Center, USA
08:50 - 09:10	**Title: DynaCT as a new tool for onsite and realtime navigation in the lung** **Dr. Wolfgang Hohenforst-Schmidt,** Klinikum Coburg GmbH, Germany
09:10 - 09:30	**Title: Individualized chemo-radiation therapy based on quantitative functional imaging** **Dr. Dag Rune Olsen,** University of Bergen, Norway
09:30 - 09:50	**Title: Targeting EGFR for fluorescence optical imaging of cancer** **Dr. Haibio Gong,** LI-COR Biosciences Inc., USA
09:50 - 10:10	**Title: Squamous cell cancer of the head and neck - preoperative TNM staging with functional computed tomography imaging** **Dr. Agnieszka Trojanowska,** Medical University of Lublin, Poland
10:10 - 10:30	**Title: Digital imaging in mammography helping enhancing the detection & diagnosis of breast lesions** **Dr. Bhawna Dev,** Sri Ramachandra University, India

Cofeebreak: 10:30-10:45

Track 4:Cancer: Management & Prevention

Track 4-1: Diet & Physical Exercise
Track 4-3: Environmental Factors

Session Introduction

10:45 - 11:05	**Title: "PACThe": Programme of accompanying women after breast Cancer treatment completion in thermal resorts: Preliminary results on 125 patients at one-year follow-up** **Dr. Y J. Bignon,** Centre Jean Perrin, France
11:05 - 11:25	**Title: Patient advocate perspectives on integrative oncology – Diet & physical exercise, managing unwanted effects, environmental factors** **Dr. Ann Fonfa,** The Annie Appleseed Project, USA
11:25 - 11:45	**Title: Preventive medicine: Hope or Hype?** **Dr. Amr Amin,** UAE University, U.A.E
11:45 - 12:05	**Title: Cancer and palliative care in Africa: case of Cameroon** **Dr. Koanga Mogtomo M. L,** University of Douala, Cameroon
12:05 - 12:25	**Title: Level of physical leisure and daily living activities in cancer patients undergoing radiotherapy** **Dr. Anna Enblom,** Karolinska Institute, Sweden

Lunch: 12:25-13:00

Track 4-2: Chemoprevention

13:00- 13:20 — **Title: Mechanistic studies of the bioavailability barrier network (BBN) and its negative impact on the disposition and chemopreventative efficacy of dietary phytochemicals**
Dr. Stephen W.J. Wang, Millennium Pharmaceuticals Inc., USA

13:20 - 13:40 — **Title: Bioreactive compounds for cancer chemoprevention**
Dr. Jaime A. Yáñez, Alcon Laboratories Inc., USA

13:40 - 14:00 — **Title: Beyond the pyramid: Diet and alternative compounds for cancer prevention**
Dr. Jeffery G. Herman, University of California San Francisco, USA

14:00 - 14:20 — **Title: What do you mean I can't take my vitamins anymore? A qualitative review of nutritional supplement use during cancer treatment**
Dr. Alina Barnett, University of California San Francisco, USA

Track 5-5: Cancer: Gene expression & Protein Profiling; Surgery & Laparoscopy

Session Introduction

14:30 - 14:50 — **Title: Novel Anti-microRNA strategies for Glioblastoma treatment without cognitive side effects**
Dr. Da Zhi Liu, University of California at Davis, USA

14:50 - 15:10 — **Title: New tissue acquisition tools for translational research**
Dr. Jaak Ph. Janssens, European Cancer Prevention Organization, Belgium

15:10 - 15:30 — **Title: Prediction of survival and response to adjuvant therapy in pancreatic cancer**
Dr. Robert Grützmann, University hospital Carl Gustav Carus, Germany

15:30 - 15:50 — **Title: Current advances in rectal cancer surgery**
Dr. Manish Chand, Royal Marsden Hospital, UK

15:50 - 16:10 — **Title: Laparoscopic total mesorectal excision: Experience with 74 patients**
Dr. Hosseini SV, Shiraz University of Medical Sciences, Iran

Coffee Break: 16:10-16:30

16:30 - 18:00 — **Poster Presentation**

Rainbow Room

Track 5: Cancer Therapy

Track 5-1(a): Radiotherapy & Chemotherapy

Session Introduction

08:30 - 08:50 — **Title: Magnetic resonance imaging guided thermal ablation for cancer**
Dr. Sherif G. Nour, Emory University School of Medicine, USA

08:50 - 09:10 — **Title: Molecular cancer therapy via modulating autophagy**
Dr. Liang Xu, University of Kansas Cancer Center, USA

09:10 - 09:30 — **Title: Pathobiology and prevention of bone Loss caused by cancer chemotherapy**
Dr. Cory J Xian, University of South Australia, Australia

09:30 - 09:50 — **Title: What is the optimal treatment for metastatic colorectal cancer?**
Dr. Esther Una Cidon, Clinical University Hospital, Spain

09:50 - 10:10 — **Title: Biomarkers in relation to response of preoperative radiotherapy in rectal cancer patients- A Swedish rectal cancer clinical trial of preoperative radiotherapy**
Dr. Xiao-Feng Sun, University of Linköping, Sweden

10:10 - 10:30 — **Title: Adenovirus Library for Novel Transductional Targeting**
Dr. Yamamoto Masato, University of Minnesota, USA

Cofeebreak: 10:30-10:45

10:45 - 11:05 — **Title: The effect of preoperative chemoradiotherapy on lymph nodes harvested in laparoscopic TME for rectal cancer**
Dr. Stefano Scabini, Salita Della Adonnetta, Italy

11:05 - 11:25 — **Title: Intensity modulated radiotherapy in chemoreduced retinoblastoma**
Dr. Aman Sharma, All India Institute of Medical Sciences, India

Track 5-1(b): Radiotherapy & Chemotherapy

Session Introduction

11:25 - 11:45 — **Title: Acute or subacute cor pulmonale: When should we look for malignancies?**
Dr. Raniero Di Giovambattista, Hospital of Avezzano, Italy

11:45 - 12:05 — **Title: Different expression of ERK1/2 and pERK proteins in MDA-231 and MCF7 cells after chemotherapy with doxorubicin or docetaxel**
Dr. Aliakbar Taherian, Kashan University of Medical Science, Iran

12:05 - 12:25 — **Title: Treatment with AS101 sensitizes acute myeloid leukemia cells (AML) to chemotherapy by disrupting the interaction between the integrin VLA-4 and Fibronectin: Mechanisms of action and clinical applications**
Dr. Benjamin Sredni, Bar-Ilan University, Israel

Lunch: 12:25-13:00

Track 5-3: Hormone Replacement Therapy
Track 5-4: Molecular-Targeted Therapies

Session Introduction

13:00- 13:20 — **Title: Expression of the p53 target SERPINE1 (PAI-1) gene is required for human tumor cell migration upon plastic conversion to a Stem Cell- like phenotype in response to TGF-ı1+EGF**
Dr. Paul J. Higgins, Albany Medical College, USA

13:20 - 13:40 — **Title: Molecular targets of cardiac hormones in cancers**
Dr. David Vesely, University of South Florida Medical School, USA

13:40 - 14:00	**Title: Beta-glucans as anticancer agents** **Dr. Anshu Agrawal**, University of California, USA
14:00 - 14:20	**Title: Mechanical blocking of cancer cell division by Progerin** **Dr. Olga Moiseeva**, University of Montreal, Canada
14:20 - 14:40	**Title: The transcriptional landscape of nasopharyngeal carcinoma defined by RNA-seq** **Dr. MU Sheng Zheng**, Sun Yat-sen University Cancer Center, China
14:40 - 15:00	**Title: Nanoformulated nanocarriers with modified lactoferrin for cancer and bio-distribution through MRI** **Dr. Jagat R. Kanwar**, Deakin University, Australia
15:00 - 15:20	**Title: Alternative splicing of Kruppel-like factor 4 plays a role in colorectal tumorigenesis** **Dr. Seung Joon Baek**, University of Tennessee, USA
15:20 - 15:40	**Title: Inhibition of adenoid cystic carcinoma cell growth and metastasis by knockdown of ADAM 10 expression via RNA interference** **Dr. Qin Xu**, Ninth people's Hospital, China
15:40 - 16:00	**Title: Peptide-targeted chemotherapy for breast cancer** **Dr. Chin-Tarng Lin**, National Taiwan University Hospital, Taiwan
	Cofeebreak: 16:00-16:15
16:15 - 16:35	**Title: Targeting the BCR-ABL tyrosine kinase in chronic Myeloid Leukemia as a model of rational drug design in cancer** **Dr. Adriana Zamecnikova**, Kuwait Cancer Control Center, Kuwait
16:35 - 16:55	**Title: Microtubule: A target for withaferin-a induced cell death** **Dr. Kamalini Ghosh**, University of Calcutta, India
16:55 - 17:15	**Title: Molecular basis of anti-inflamatory strategies in cancer cachexia** **Dr. Marilia Seelaender**, University of Sao Paulo, Brazil

Paramount Room

Track 6-1: Clinical Medicine

	Session Introduction
08:30 - 08:50	**Title: Intratumoral chemotherapy (ITC) as adjunct to standard therapy in NSCLC iiia-iv prolongs life** **Dr. Wolfgang Hohenforst-Schmidt**, Klinikum Coburg GmbH, Germany
08:50 - 09:10	**Title: Endobronchial Intratumoral Chemotherapy (EITC): A new modality for palliation and potential curative therapy of NSC lung cancer** **Dr. Eugene P. Goldberg**, University of Florida, USA
09:10 - 09:30	**Title: Extra cellular matrix derived endogenous angioinhibitor tumstatin and its mechanism(s) of action** **Dr. Sudhakar Akul Yakkanti**, Boys Town National Research Hospital, USA
09:30 - 09:50	**Title: The association between Charlson Comorbidity Index(CCI) and the burden of cancer** **Dr. Eun-Jung Kim**, Cheju Halla University, Republic of Korea
09:50 - 10:10	**Title: Therapeutics and toxicology of lLiposome based anticancer drugs** **Dr. Alberto Gabizon**, Shaare Zedek Oncology Institute, Israel
10:10 - 10:30	**Title: High-risk human papillomavirus (HPV) screening and detection in normal, healthy patient saliva samples: a pilot cluster randomized study** **Dr. Karl Kingsley**, University of Nevada, USA
	Cofeebreak: 10:30-10:45
10:45 - 11:05	**Title: Molecular basis of anti-inflamatory strategies in cancer cachexia** **Dr. Martins Thomas**, University of Lagos College of Medicine, Nigeria
11:05 - 11:25	**Title: Nose bleed gone wild: Extramedullary plasmacytoma of the right nasal septum** **Dr. Erwin Jannino O. Ybanez**, Davao Doctors Hospital, Philippines
11:25 - 11:45	**Title: Evaluation of dendritic cells and RANTES in patients suffering from ovarian cancer** **Dr. Jan Kotarski**, Medical University of Lublin, Poland
11:45 - 12:05	**Title: Sam-Pointed Domain Ets Transcription Factor-1 (SPDEF-1, a.k.a. PDEF-1) is a Tumor Metastasis Suppressor and its Mechanism(s) of Action** **Dr. Hari K Koul**, University of Colorado School of Medicine, Aurora

Track 6-2: Targeting anti cancer drug

	Session Introduction
12:05 - 12:25	**Title: Cancer-relevant functions of the plasma membrane receptor for thyroid hormone analogues** **Dr. Paul J. Davis**, Albany Medical College, USA
12:25 - 12:45	**Title: Ribophorin II (RPN2) as a novel therapeutic target for cancer stem cells** **Dr. Takahiro Ochiya**, National Cancer Center Research Institute, Japan
	Lunch: 12:45-13:05
13:05 - 13:25	**Title: Aquaporin 5 (AQP5) activates the epidermal growth factor receptor (EGFR) and Src, potentially through its novel kinase activity, and may be involved in Iressa resistance** **Dr. Chulso Moon**, Johns Hopkins University School of Medicine, USA
13:25 - 13:45	**Title: Analysis of miR-195 and miR-497 expression, regulation and role in breast cancer** **Dr. Lihui Lai**, East China Normal University, China

13:45 - 14:05 **Title: Cucurbitacin B enhances the cytotoxicity of doxorubicin by increasing intracellular drug accumulation**

Dr. Meixia Zhang, China Medical University, China

14:05 - 14:25 **Title: Multifunctional nanoparticles for targeted drug delivery and MRI contrast agent**

Dr. Panchanan Pramanik, Indian Institute of Technology-Kharagpur, India

Track 6-3: Therapeutic Targets in Cancer
Track 6-4: Clinical Research in Cancer Immunology

Session Introduction

14:30 - 14:50 **Title: Targeting superoxide dismutase 1 for chemosensitization of platinum resistant ovarian cancer cells**

Dr. Mu Wang, Indiana University School of Medicine, USA

14:50 - 15:10 **Title: Unresolved Inflammation: Immune dynamics of aging process and tumorigenesis**

Dr. Mahin Khatami, National Cancer Institute, USA

15:10 - 15:30 **Title: IPMN of the pancreas - evaluation of pathohistological subtypes and clinical outcome**

Dr. Marius Distler, University hospital Carl Gustav Carus, Germany

15:30 - 15:50 **Title: Using GlycoExpress for production of highly active antibodies directed against novel and existing targets**

Dr. Steffen Goletz, Glycotope GmbH, Germany

15:50 - 16:10 **Title: BiTE antibodies for cancer therapy Dr. Roman Kischel**

Dr. Roman Kischel, Micromet AG, Germany

Cofeebreak: 16:10-16:25

16:25 - 16:45 **Title: Lactobacillus casei ssp.casei could induce the Th1 cytokine production and Natural Killer cells activity in BALB/c mice bearing invasive ductal carcinoma**

Dr. Mohammad Hossein Yazdi, University of Medical Sciences, Iran

16:45 - 17:05 **Title: Clinical pharmacokinetics of cisplatin in patients with malignant tumor of limb (mal) by Hyperthermic Antiblastic Perfusion (HAP) treatment**

Dr. Jianshi Lou, Tianjin Medical University P. R. China

17:05 - 17:25 **Title: Impaired cytolytic function of natural killer (NK) cells obtained from patients with head and neck cancer can be partially restored by the triggering of toll-like receptor 3 (TLR3) expressed on NK cells**

Dr. Miroslaw J. Szczepanski, Poznan University of Medical Sciences, Poland

17:25 - 17:45 **Title: Targeted and image-guided cancer treatment using Theranostic nanoparticles**

Dr. Lily Yang, Emory University, USA

17:45 - 18:05 **Title: Novel insights into the regulation of alternative NF-kB pathway: A promising step towards understanding lymphoid malignancies**

Dr. Sivakumar Vallabhapurapu, University of Cincinnati Cincinnati, Ohio, USA

Place: Renaissance Room I

Cocktails **Sponsored by:** *Journal of Carcinogenesis & Mutagenesis*

DAY 3-17 Aug 2011

Capital Room

07:30-08:00 **Breakfast**

Track 7: Carcinogenesis & Mutagenesis
Track 7-1: Metabolism of Carcinogens
Track 7-3: Biological & External Factors for Carcinogenesis

Session Introduction

08:30 - 08:50 **Title: A high fat diet may increase colon cancer risk through the action of Deoxycholate, A carcinogenic secondary bile acid**

Dr. Carol Bernstein, University of Arizona College of Medicine, USA

08:50 - 09:10 **Title: Mutagenesis of p53 by reactive PAH and ROS**

Dr. Jeffrey Field, University of Pennsylvania, USA

09:10 - 09:30 **Title: Variability in carcinogen metabolism**

Dr. Mohamadi Sarkar, Altria Client Services, USA

09:30 - 09:50 **Title: T regulatory cells (T-regs) and vascular endothelial growth factor (VEGF): Their relation with estrogen (E2) in premenopausal breast cancer (BC)**

Dr. Francesco Recchia, Civilian Hospital, Avezzano and University of L'Aquila, Italy

09:50 - 10:10 **Title: Mutagenesis as a biomarker of risk areas for carcinogens: Human biomonitoring**

Dr. Vera Maria Ferrao, Vargas Fundacao Estadual de Protecao Ambiental- FEPAM, Brazil

10:10 - 10:30 **Title: Carcinogenic Human PapillomaVirus (HPV) in suburban U.S. female population**

Dr. Lee Sin Hang, Milford Hospital, USA

Cofeebreak: 10:30-10:45

10:45 - 11:05 **Title: The 'tether drop' hypothesis for the mechanism of chromosomal aberrations**

Dr. Leon P Bignold, Institute of Medical and Veterinary Science, Australia

11:05 - 11:25 **Title: The autophagic tumor stroma model of cancer: Role of oxidative stress and ketone production in fueling tumor cell metabolism**

Dr. Stephanos Pavlides, Paterson Institute for Cancer Research, UK

11:25 - 11:45 **Title: Helicobacter pylori promotes angiogenesis in gastric cancer cells depending on cyclooxygenase-2-mediated vascular endothelial growth factor via p38MAPK/ATF-2 pathway**

Dr. Qi Li, Shanghai University of Traditional Chinese Medicine, China

11:45 - 12:05 **Title: Over expression of 17beta hydroxysteroid dehydrogenase type 12 (HSD17B12) correlates with poor prognosis in ovarian cancer**

Dr. Marta Szajnik, Poznan University of Medical Sciences, Poland

12:05 - 12:25 **Title: The mechanism & causes of carcinogenesis and mutagenesis in eukaryotes**

Dr. Shaukat Iqbal Malik, Mohammad Ali Jinnah University, Pakistan

Lunch: 12:25-13:00

Track 8: OMICS in Cancer Research

Track 8-1: Oncogenomics
Track 8.2: Cancer Research: Clinical & Experimental
Track 8.3: Cancer: Genomics & Proteomics

Session Introduction

13:00 - 13:20 **Title: MicroRNAs induce tamoxifen sensitivity by down-regulation of estrogen receptor alpha signaling in breast cancer**

Dr. Gary Guishan Xiao, Creighton University Medical Centre, USA

13:20 - 13:40 **Title: Characterisation and impact of circulating tumor cell diversity on therapy response and metastasis formation**

Dr. Katharina Pachmann, Universitätsklinikum Jena, Germany

13:40 - 14:00 **Title: Lovastatin inhibits T cell proliferation while preserving the cytolytic function of EBV-,CMV- and MART-1-specific CTLs**

Dr. Qing Ma, University of Texas M.D. Anderson Cancer Center, USA

14:00 - 14:20 **Title: Anti-tumor effect of sFlt-1 gene therapy system mediated by Bifidobacterium Infantis on Lewis lung cancer in mice**

Dr. Hong Zhu, West China Hospital, China

14:20 - 14:40 **Title: An investigation of PD-L1 expression and its association with tumor infiltrating T cells in human cervical carcinomas**

Dr. Xu Man, Chongqing Medical University, China

14:40 - 15:00 **Title: To compare efficacy and cost effectiveness of different 5ht3 blockers in acute and delayed nausea and vomiting:a randomized study.**

Dr. Shukla Piyush, All India Institute of Medical Sciences, India

15:00 - 15:20 **Title: Functional genomics to identify cancer targets**

Dr. William C. Hahn, Dana-Farber Cancer Institute, USA

15:20 - 15:40 **Title: The anti-tumor role of gene UBTD1 and a positively regulatory**

Dr. Xiaowei Zhang, Fudan University, Shanghai Cancer Center, China

15:40 - 16:00 **Title: Inhibition of pancreatic cancer stem cell characteristics in human and KrasG12D transgenic mice by resveratrol**

Dr. Rakesh Srivastava, The University of Kansas Medical Center, USA

Cofeebreak: 16:00-16:15

Rainbow Room

Track 9: Organ-Specific Cancers

Track 9-1: Breast cancer
Track 9-2: Liver, Prostate & Kidney Cancer
Track 9.3: Blood, Lung & Leukemia Cancer
Track 9.4: Bone & Thyroid Cancer
Track 9.5: Gastrointestinal & Colorectal Cancer

Session Introduction

08:30 - 08:50 **Title: Identification of a new prognostic signatures and therapeutic targets for HER2+ and triple negative breast cancer using subtype-specific mouse models**

Dr. Eldad Zacksenhaus, University Health Network, Canada

08:50 - 09:10 **Title: Susceptibility alleles of breast cancer in high, moderate and low penetrance genes in a South American population**

Dr. Lilian Jara, School of Medicine-University of Chile, Chile

09:10 - 09:30 **Title: Pharmacogenomics predictions for breast cancer treatments´ efficacy and toxicity**

Dr. Hugo A Barrera Saldaña, University of Nuevo León, México

09:30 - 09:50 **Title: A novel feedback loop with therapeutic implications in estrogen receptor-negative breast cancer**

Dr. Ali Naderi, The University of Queensland, Australia

09:50 - 10:10 **Title: Molecular classification of breast cancer and role of immunohistochemistry for detection of cell types that predicts response to chemotherapy with Santinib (P53)**

Dr. M. H. Bukhari, King Edward Medical University, Pakistan

10:10 - 10:30 **Title: Combining biologics and cytotoxics in the treatment of inoperable cholangiocarcinoma**

Dr. Lars Henrik Jensen, Vejle Hospital and University of Southern Denmark, Denmark

Cofeebreak: 10:30-10:45

10:45 - 11:05	**Title: Stability analysis on liver cancer related miRNA in serum** **Dr. Xian-Feng Ding,** Zhejiang Sci-Tech University, China
11:05 - 11:25	**Title:** **Dr. Sumanta Kumar Pal,** City of Hope Comprehensive Cancer Center, USA
11:25 - 11:45	**Title: The status of anti-metastatic gene therapy in Patients with advanced epithelial ovarian cancer** **Dr. Samir A. Farghaly,** The Medical College of Cornell University, USA
11:45 - 12:05	**Title: Detection and quantification of circulating Melanoma cells in patients with cutaneous malignant Melanoma** **Dr. Mel Ziman,** Edith Cowan University, Western Australia
12:05 - 12:25	**Title: A high prevalence of metabolic syndrome in a group of colorectal patient's pre surgery– A pilot study** **Dr. Sissi C. Stove Lorentzen,** Oslo University Hospital, Norway

Lunch: 12:25-13:00

Track 10: Cancer Genetics

Session Introduction

13:00 - 13:20	**Title: SNS01- An eIF5A-based biologic with significant anti-tumoral activity following systemic administration in a murine model of multiple myeloma** **Dr. John E. Thompson,** University of Waterloo, Canada & Senesco Technologies Inc., USA
13:20 - 13:40	**Title: The MAGE protein family: Protein degradation, genome stability, and cancer** **Dr. P. Ryan Potts,** UT Southwestern Medical Center, USA
13:40 - 14:00	**Title: GATA4 represses ERBB2 expression in cancer cells : A new tumor suppressor?** **Dr. Jean Imbert,** Inserm - Université de la Méditerranée, France
14:00 - 14:20	**Title: GUC as potential DNA topoisomerase inhibitors to reduce the growth of cervical cancer cells** **Dr. Hassan Hadi Abdallah,** Universiti Sains Malaysia, Malaysia
14:20 - 14:40	**Title: Influence of hypoxia on signaling pathways upon treatment with CK2 inhibitors in selected human tumor cell lines** **Dr. Olaf Georg Issinger,** University of Southern Denmark, Denmark
14:40 - 15:00	**Title: The small GTPase hRAB37 acts as a metastatic suppressor via inhibition of MMP/FAK/RhoA signal in lung cancer** **Dr. Yi-Ching Wang,** National Cheng Kung University, Taiwan
15:00 - 15:20	**Title: Gene Silencing in HIV-1 Latency by Polycomb Repressive Group** **Dr. Kyung-Chang Kim,** Korea University, Seoul Korea

Cofeebreak: 15:00-15:20
