5th International Conference and Expo on

Ceramics and Composite Materials

June 03-04, 2019

London, UK

SCIENTIFIC PROGRAM

DAY 1
Monday, 3rd June

08:30-09:00 **Registrations**

09:00-09:30 **Introduction**

09:30-09:50 COFFEE BREAK

09:50-11:50 Meeting Hall 01

KEYNOTE LECTURES

11:50-13:10

MEETING HALL 01

Talks On:

- Ceramic Engineering
- Composite Materials
- Glass Engineering and Science

13:10-13:15 GROUP PHOTO

13:15-14:00 LUNCH BREAK

14:00-16:00

MEETING HALL 01

Talks On:

- Nanotechnology
- Polymer Science and Engineering
- Materials Science and Engineering

16:00-16:20 COFFEE BREAK

MEETING HALL 01 (16:20-17:00)

Young Researchers in Ceramics and Composite Materials

DAY 2
Tuesday, 4th June

09:00-10:30 Meeting Hall 01 — **KEYNOTE LECTURES**

10:30-10:50 COFFEE BREAK

10:50-12:50 — **MEETING HALL 01**

Talks On:

- Surface Engineering and Ceramic Coating
- Electro-magnetic and optical ceramics and devices
- Superconductivity

12:50-13:35 LUNCH BREAK

13:35-15:55 — **MEETING HALL 01**

Talks On:

- Ceramography
- Tissue engineering
- Ceramics in Biology and Medicine

15:55-16:15 COFFEE BREAK

MEETING HALL 01 (16:15-17:00)

Poster Presentations

Previous Organizing Committee

Michel MORTIER

Institute of Research in Chemistry of Paris France

Lukasz Witek

New York University College

USA

Abbas Amini

Western Sydney University Australia

Evangelos Kordatos

Sheffield Hallam University

UK

Hiroyuki Serizawa

Japan Atomic Energy Agency

Japan

Angelo Maligno

University of Derby

UK

Lavinia Curecheriu

Alexandru Ioan Cuza University of Iasi Romania

Edesia Sousa

Nuclear Technology Development Center

Brazil

Marina Davydova

Russian Academy of Sciences

Russia

Previous Organizing Committee

Lidija Ćurković

University of Zagreb

Croatia

Julián J. Reinosa

Ceramics and Glass Institute of the Spanish Research Council

Spain

Ilaria Cacciotti

University of Rome

Italy

Zdenek Sofer

University of Chemistry and Technology

Prague Czech Republic

Irena Žmak

University of Zagreb

Croatia

Xiaojian Mao

Chinese Academy of Sciences

China

Rosalía Poyato

Materials Science Institute of Seville

Spain

PAST AFFILIATES

PAST AFFILIATES

David G Calatayud
Instituto de Ceramica y Vidrio, Spain

Hasan Metin Tülümen
Karlsruhe Institute of Technology, Germany

Seiki Chiba
Chiba Science Institute, Japan

Nathan Newman
Arizona State University, USA

Nicolas Tessier-Doyen
SPCTS laboratory, France

Maria Vartanuan
D. Mendeleev University of Chemical Technology, Russia

Chaoying Ni
University of Delaware, USA

Giampaolo Crepaldi
Chevron Industries, UK

Julian Reinosa
Institute of Ceramics and Glass, Spain

Rosalía Poyato
CSIC-Universidad de Sevilla, Spain

Cristina López-Pernía
Cristina López-Pernía, Universidad de Sevilla, Spain

Tonle Kenfack Ignas
University of Dschang, Cameroon

Danjela Kuscer
Jozef Stefan Institute, Slovenia

Dieraert Axel
CEA, DAM, France

Nikolay Makarov
D.Mendeleev University of Chemical Technology, Russia

Satoshi Sugita
University of Guanajuato, Mexico

Fidan Tonza
Ondokuz Mayis University, Turkey

Ceren Peksen
Ondokuz Mayis University, Turkey

Jesús Ma Rincon
Instituto de Ciencias de la Construcción Eduardo Torroja, Spain

Maik Finsel
University of Hamburg, Germany

Ester Barrachina
Universitat Jaume I, Spain

Rashmi Rani
Ecole Polytechnique, France

A Poulon Quintin
Université de Bordeaux, France

Yuliia Chabak
Priazovskyi State Technical University, Ukraine

PAST AFFILIATES

PAST AFFILIATES

Piedad N de Aza
Universidad Miguel Hernández, Spain

Francoise Nardou
University of Limoges, France

Ana Sampaio
CeNTI, Portugal

Carlos García-Negrete
Universidad del Sinú, Colombia

Kwang Leong Choy
University College London, UK

Martin Amlung
INM – Leibniz-Institute for New Materials, Germany

Csaba Hegedus
University of Debrecen, Hungary

Salvatore Grasso
Queen Mary University of London, UK

Lucie Bacakova
Czech Academy of Sciences, Czech Republic

Sergei Kulkov
Institute of Strength Physics and Materials Science SB RAS, Russia

Mojtaba Biglar
Rzeszow University of Technology, Poland

Jihui Yang University of Washington
University of Washington, USA

Romain Lucas
University of Limoges, France

Alex Dommann
Swiss Federal Laboratories, Switzerland

Thomas D Benen
Microtrac GmbH, Germany

Frédéric Aguesse
CIC Energigune, Spain

Saied Elghazaly
Central Metallurgical R&D Institute, Egypt

Zih-Jyun Chen
Tunghai University, Taiwan

Wenbo Yu
Tsinghua University, China

Yan Huang
Brunel University London, UK

Sheng Lu
Jiangsu University of Science and Technology, China

Hans J Seifert
Karlsruhe Institute of Technology, Germany

Nehal Elkhoshkhany
Alexandria University, Egypt

Adam H Khan
AKHAN Semiconductor, USA

PAST AFFILIATES

PAST AFFILIATES

Anirudha V Sumant
Argonne National Laboratory, USA

Richard A Clark
Morgan Advanced Materials, USA

James C Sung
Synthetic Element Six (SES), Taiwan

Hossein Sojoudi
University of Toledo, USA

Mineo Hiramatsu
Meijo University, Japan

Larry Christner
LGC Consultants LLC, USA

Taiichi Otsuji
Tohoku University, Japan

Kun Lian
Xi'an Jiaotong University, China

Zahra Komeily Nia
Deakin University, Australia

Mohammed Alamri
The University of Kansas, USA

Rafal Abdank-Kozubski
Jagiellonian University in Krakow, Poland

Pradeep K. Rohatgi
University of Wisconsin-Milwaukee, USA

Kim Meow Liew
City University of Hong Kong, Hong Kong

Lu-Wen Zhang
Shanghai Jiao Tong University, China

Patrice Woisel
University of Lille, France

Liying Jiang
The University of Western Ontario, Canada

Nusrat Jahan
Polytechnique Montreal, Canada

Ihsan Burak Temelturk
Middle East Technical University, Turkey

Igor Y Denisyuk
ITMO University, Russia

Masahide Terazima
Kyoto University, Japan

Nathan P Salowitz
University of Wisconsin-Milwaukee, USA

An-Yi Chang
Louisiana Tech University, USA

Peng-Sheng Wei
National Sun Yat-Sen University, Taiwan

Genda Chen
Missouri University of Science and Technology, USA

Kirk J Ziegler
University of Florida, USA

Michael N. Leuenberger
University of Central Florida, USA

PAST AFFILIATES

PAST AFFILIATES

Yongmei Zheng
Beihang University, China

Satilmis Basan
University of Hittite, Turkey

Ioana Csaki
Politehnica University Bucharest, Romania

Wolfgang Sigmund
University of Florida, USA

Dimitar Dimov
University of Exeter, UK

K M Liew
City University of Hong Kong, China

Kai-Ming Ho
Iowa State University, USA

Pietro Cataldi
Italian Institute of Technology, Italy

Marko Soderžnik
Jožef Stefan Institute, Slovenia

My Ali El Khakani
Université du Québec, Canada

Aitber Bizhanov
Metal and Coal Extrusion, Russia

Väino Sammelselg
University of Tartu, Estonia

Jian MENG
Chinese Academy of Sciences, China

Davi Pessoa
Technische Universität Dresden, Germany

Addis Lemessa Jembere
Bahir Dar institute of Technology, Ethiopia

Rodrigo Poblete
Universidad Católica del Norte, Chile

Kenneth Reifsnider
University of Texas Arlington, USA

Abderrazzak Douhal
Universidad de Castilla-La Mancha, Spain

Pavel LEJČEK
Institute of Physics, Czech Republic

Jerome Labille
Aix-Marseille Université, France

Michael Chandross
Sandia National Laboratories, USA

Pedro Gómez-Romero
Catalan Institute of Nanoscience and Nanotechnology, Spain

Camelia Matei Ghimbeu
Institute of Materials Science of Mulhouse, France

5th International Conference and Expo on Ceramics and Composite Materials

JUNE 03-04, 2019 | LONDON, UK

AGENDA

Title: Glory of Piezoelectric Perovskites

Kenji Uchino
The Pennsylvania State University
USA

Kenji Uchino, the pioneer in "piezoelectric actuators", is Founding Director of International Center for Actuators and Transducers, Professor of EE and MatSE, and Distinguished Faculty of Schreyer Honors College at The Penn State University. He was Founder and Senior Vice President of Micromechatronics Inc., State College, PA from 2004 till 2010, and Associate Director at Office of Naval Research – Global from 2010 till 2014. After his Ph. D. degree from Tokyo Institute of Technology, Japan, he became Research Associate (1976) at this university. Then, he joined Sophia University, Japan as Associate Professor in 1985. He was recruited from The Penn State in 1991. Uchino is currently the IEEE UFFC Distinguished Lecturer.

Title: Novel Polymer-derived Ceramic Matrix Composite Fabrication using Additive Manufacturing for High Temperature Aerospace Applications

Spencer Dansereau
University of Colorado Boulder
USA

Spencer Dansereau studied Modern Languages and Literature and Mechanical Engineering at Montana State University. In addition to having worked under a National Science Foundation Partnership in International Research and Education fellowship at the University of Colorado Boulder and University of Padova in Italy. He has also worked for the following Laboratories at MSU: Imgaing and Chemical Analysis Laboratory (Physics), High Temperature Materials Laboratory (ChBE), Material Structure and Properties Laboratory (ME).

Title: The terahertz phonon properties of complex and hybrid materials

Alessandro Cunsolo
NSLS II, Brookhaven National Laboratory
USA

Alessandro Cunsolo has worked in university laboratories for 4 years and in national laboratories and research facilities for 16 years. He is an acknowledged expert in physics of liquids and amorphous systems, in the development of Inelastic X Ray and Neutron Scattering spectrometers in synchrotron and reactor based research facilities. His publication record includes more than 90 publications in international scientific journals.

SPEAKER SLOTS AVAILABLE

Title: Ceramics in Particle Accelerators

Charles Hetzel,
Brookhaven National Laboratory
USA

Prior to joining NSLS-II, Charles Hetzel held the title of Lead Project Engineer for a design and manufacturing organization which produced automated industrial machinery. Upon joining the NSLS-2 project Charles was responsible for the design, procurement and fabrication of the storage ring vacuum chambers including the integration of these chambers into the magnet-girder assemblies and final installation in the storage ring tunnel. Charles also managed the production of the rf shielded bellows for interconnecting the storage ring vacuum chambers as well as the photon absorbers which protect critical components. Charles took over as the vacuum group leader at NSLS-2 in 2014 and continues to resource plan and schedule major installation efforts.

Title: Sorption of colorants in ceramic systems from residual sludge from water treatment

Angela Montaño
Industrial University of Santander
Colombia

Angela Montaño research´s are related to reuse of industrial waste in order to obtaining ceramics, polymers and composite materials which, in turn can be minimize the environmental impact of some others industrial process. Strategies used to form those materials are chemical and electrochemical synthesis and thermal treatment. Analytical tools as DRX, FRX, SEM and XPS are used to stablish structural features of the new materials. BET and kinetics studies are employed to know the performance of ceramics formed.

Title: Characterization and performance of metal matrix particular nanocomposites fabricated by high shear solidification

Yan Huang
Brunel University London
UK

Dr Yan Huang leads metallic biomaterials research at Brunel, working on both traditional permanent titanium implants and novel biodegradable magnesium medical devices for orthopedic cardiovascular applications. He recently won three research grants in biomaterials research from the Royal Society, EPSRC and European Commission. He has extensive experience in process innovation for combined solidification and thermomechanical processing, solid state joining, severe plastic deformation for light alloys and light metal matrix composites.

SPEAKER SLOTS AVAILABLE

Title: The oxidation behaviour of a melt infiltrated (MI) SiC/SiC matrix composite (CMC) at high temperature in air

Nasrin Al Nasiri
Imperial College London
UK

Nasrin joined Imperial in December 2010 as a PhD student within the Department of Mechanical Engineering. She obtained BSc. and MSc. in Aerospace Engineering from Delft University of Technology, The Netherlands. After her PhD, she worked on the oxidation behavior of SiC ceramic matrix composites (CMCs) and designing new environmental barrier coatings. She has been awarded with the Imperial College Junior Research fellowship in November 2016 for a funding of 3 years. In September 2018, she has started her Royal Academy of Engineering Research Fellowship

Title: Smart Composite for Structure Health Monitoring

Klaudio Bari
University of Wolverhampton
UK

Dr. Klaudio Bari, Principal Lecturer and academic lead for research and business operation at school of Engineering. Dr. Bari is a reviewer member in EPRSC funding panel in the field of high resolution X-ray tomography imaging. He has over 25 journal and conference publications in the field of material performance under harsh environment, design and optimisation of metallic and polymeric composite, X-ray tomography and multi-scale modelling of composite mechanics.

Title: Using Pre-Ceramic Polymers in the Joining of Silicon Carbide Ceramics

Lewis J. Print
University of Strathclyde
UK

Lewis J. Print is a 2nd year PhD student studying polymer chemistry at the University of Strathclyde. Under the supervision of Dr John J. Liggat, L. Print focuses on the development of methodologies to adhere silicon carbide ceramic using polymers for high temperature applications. This includes utilising a variety of analysis technique to characterise these polymers: including thermal analysis, thermal degradation and spectroscopy techniques. He also has interests in biodegradable polymers, the mechanical and physical properties of various polymers and novel applications of IR spectroscopy.

SPEAKER SLOTS AVAILABLE

Title: Synthesis of Solution Styrene-Butadiene Rubber (SSBR) with Bifunctional Initiators and its formulation for tread

Anderson Cazumba Vieira
Senai-Cetiqt
Brazil

Anderson has his expertise in topic involving production of styrene-butadiene rubber by anionic polymerization in solution with bifunctional initiators, projects related to polyolefins, such as polysobutenes and also the development of carbon supported catalysts applied to hydrogenation reactions. Projects involving extraction and purification of vegetable oils, biodiesel synthesis and water treatment. He currently works as a researcher at the Senai Institute for Biosynthetic innovation. He has knowledge in the areas of chemical engineering with emphasis on: polymers, polyolefins, hydrogenation of glucose, heterogeneous catalysis, biodiesel.

Title: Preparation of ceramic membranes of nanofiltration by nano-deposition to be used in the purification of water with diferent contaminants

Irlanda Cruz
National School of Biological Sciences, IPN
Mexico

Irlanda Cruz has completed the master's degree studies at CIITEC in 2012-2014, I am doing pHD studies in Nanoscience and micro and Nanotechnology at ESIQIE-IPN, I have two publications in international journals, I am a member of the “Asociación Mexicana Transdisciplinaria de Nanociencia y Nanotecnología (AMEX-TNN,A.C.)”.

Title: Wood reinforced slag matrix composites activated by carbon dioxide

Infectious Diseases

Yixin Shao
McGill University
Canada

Dr Yixin Shao is a Professor of the Department of Civil Engineering at McGill University, Montreal, Canada. He received his Bachelor Degree and Master Degree from Tongji University, China and his PhD degree from Northwestern University, USA. His research is involved with low energy cement, cement chemistry, calcium silicates, carbon dioxide utilization in concrete, use of industry wastes for sustainable development.

SPEAKER SLOTS AVAILABLE

Title: Impact of temperature on cement paste additivated with nanoparticles

Nicolás Pérez
Simon Bolivar University
Venezuela

Nicolas Perez has a Degree in Materials Engineering and is in acceptance process for a Master in Science in Renewable Energy business. With two years of experience has a strong development in the studies of Energy Systems for upstream oil industry, developing technical evaluations in oil-producers Join Ventures in Venezuela. His studies in Oil and Gas business, FEA and CFD analysis and project design and development allow him to develop projects together with technical users with a very solid knowledge in efficiency of the industry in order to develop state of the art solutions.

Title: Polymer derived metal containing SiC(O)-based ceramic nanocomposites for methanation Samples

Sarabjeet Kaur
University of Bremen
Germany

Dr. Sarabjeet Kaur is a PostDoc at Department of production engineering, Universität Bremen, Germany. Currently her research is focused on the synthesize and fabrication of SiC-based ceramic nanocomposites with micro-meso-macroporosity. Her main research fields are Materials chemistry, synthesis and characterization, Polymer-derived ceramics/nanocomposites, geopolymer and geopolymeric materials and porous ceramics. She also received research scholarship by EU cost project under short-term scientific missions for a topic on synthesis of carborane based polymeric precursors for ultrahigh-temperature stable SiBC ceramics.

Title: Complex analysis of the porous structure of activated carbons prepared from biomass by activation with potassium hydroxide

Mirosław Kwiatkowski
AGH University of Science and Technology
Poland

Dr. Mirosław Kwiatkowski is working an assistant professor at the AGH University of Science and Technology, at the Faculty of Energy and Fuels. He is the editor in chief of The International Journal of System Modeling and Simulation (UAE), an associate editor of Micro & Nano Letters Journal (UK) and a member of the organizing and scientific committees many international conferences in Europe, Asia and United States of America.

SPEAKER SLOTS AVAILABLE

Title: Influence of Nitriding Process on Magnetic Properties of Steel Ball-like Samples

Slawomir M Kaczmarek West Pomeranian University of Technology Poland

Slawomir Maksymilian Kaczmarek has his expertise in evaluation and passion in materials science. For many years he was involved in optical and EPR spectroscopy of crystalline laser and scintillation materials produced by himself and other scientific centers in Poland, France and Japan. He mainly studied oxide materials such as garnets, lithium niobate and fluorides doped with transition metals and rare earths. At the same time, he was a lecturer in physics, electronics and optoelectronics at the Military University of Technology in Warsaw and the West Pomeranian University in Szczecin.

Title: Phonons in composite nanostructures: an analytic approach

Sergiu Cojocaru National Institute of Physics and Nuclear Engineering Romania

Sergiu Cojocaru is a senior researcher at the Department of Theoretical Physics of the National Institute of Physics and Nuclear Engineering, Romania. He authors over 100 scientific publications in several areas of Condensed Matter Theory (disordered systems, strong electron correlations, high-temperature superconductivity, magnetism). His current interests are in nanophysics and, in particular, the physical effects of confinement on the properties of nanostructures

Title: Eutectoids: new bioceramic materials for bone tissue engineering.

Piedad N de Aza Miguel Hernández University Spain

Piedad N de Aza received her doctoral degree in Chemistry-Ceramin 1995. She did a postdoctoral stage at the IRC in Biomaterials at the Queen Mary College, University of London (U.K.) working on in vitro and in vivo behavior of bioceramics. At this moment, she is the Chair of the Materials Science, Optic and Electronic Technology Department, Professor of Materials Science and Metallurgical Engineering and Researcher at the Bioengineering Institute at the Miguel Hernandez de Elche University.

SPEAKER SLOTS AVAILABLE

Title: The antiferroelectricity in (Pb,Ca,Sr)TiO3 ceramics

Liuyang Han
IEMN-DOAE-Universite Polytechnique Hauts
France

Liuyang Han is a PhD student in the third year of IEMN-DOAE-Universite Polytechnique Hauts-de-France and Shanghai Institute of Ceramics. She works on PCST functional ceramics and antiferroelectric-based magnetoelectric composites. She has published 2 papers in reputed journals and aims to do more interesting work.

Title: Tough composite ceramic material for aircraft: interior, cargo compartment and unit load device (fire and explosion container ULD).

Max Sardou
Sardou sas CEO St Soupplets
France

Dr. Max SARDOU is master in physic and doctor engineer: He has discovered ground effect in 1973 during his thesis work. He has worked 5 years on ARIANE LO1 rocket . He has created SARDOU SAS in 1980. Dr. Max SARDOU has: designed and produced the fastest mowing ground in the world in 1985 working for racing car manufacturers, studied ultra-low noise fans, designed composite torsions springs, designed composite "C" springs, designed composite coils springs, invented EPOSIL a high-performance epoxy, invented TOUGHCERAM a high-performance ceramic. Now he works on high performances materials and technologies.

Title: The interplay of phases, structural disorder and dielectric behavior in Al doped BiFeO3-BaTiO3 ceramics

Jiangguli Penga
Le Mans University
France

Jiangguli Peng started her Ph.D in Shanghai Institute of Ceramics of Chinese Academy of Sciences (SICCAS), China in 2015. She was selected for the French government's "Eiffel excellence scholarship" program in 2018. She is now a cooperated doctor in the Institute of Molecules at Materials in Le Mans(IMMM) of Le Mans University. Her research is focused on microstructures and properties of piezoelectric materials based on BiFeO3-BaTiO3 systems. Correlations between materials and the physical properties is analyzed for better understanding the key parameters which contributes to the high polarization of considered ceramics. The research is relevant to light on the mechanism of high piezoelectric performances.

SPEAKER SLOTS AVAILABLE

Title: Four types of electrons, each allowing matter to behave in a specific way, according to twin physics.

Anna Backerra
The Netherlands

Backerra has graduated in theoretical physics at the Eindhoven University of Technology in The Netherlands and worked for three years at Philips Research Laboratories. She continued independently, making a search for complementary physics. To develop a way of complementary thinking she studied composition at the Conservatory in Enschede and in Saint Petersburg. After that she constructed a complementary mathematical language and applied this on physics, obtaining twin physics.

Title: Strontium Aluminate based aerogel phosphors for the enhanced afterglow properties

Gaganpreet Kaur Behrh
EMPA, ETH
Switzerland

Gaganpreet Kaur Behrh is currently pursuing her Postdoc from ETH Switzerland on metal oxide based aerogels. She also has quite a good experience in both solid state and soft chemistry routes. During PhD, she synthesized rare earth based doped aluminates, silicates, gallates etc based materials via both solid state and soft chemistry routes. She has quite a good experience in characterization techniques including XRD, SEM, Photoluminescence spectroscopy, BET etc. In short, Gaganpreet Kaur has achieved quite an experience in Nanoscience and Nanomaterials and has been successfully able to publish in high impact factor journals.

Title: Ceramic Materials surface structuration with carbon nanotubes: ZnS and MgF2 Optical Ceramics

N.V.Kamanina
Vavilov State Optical Institute
Russia

N.V.Kamanina is a Head of the Lab for "Photophysics of media with nanoobjects" at Vavilov State Optical Institute St.-Petersburg, Russia and Professor of the St.-Petersburg Electrotechnical University, where she is lecturing from 2002. Under her leadership 5 young scientists have defended their PhD theses and more than 20 Masters and Bachelors have received their Degree's Diploma. Now her current interest regards to Nano- and Bio-Technology in Optics.

SPEAKER SLOTS AVAILABLE

Biography

Title: Producing Nanopowders for Functional Ceramics by Pulsed Electron Beam Evaporation Method in Vacuum

Sergey Sokovnin
Institute of Electrophysics
UB RAS
Russia

Prof. Sergey Sokovnin has his expertise in pulse power technique, radiation technology and nanotechnology. He developed a method for production of nanopowders, including evaporation of a target by a pulsed electron beam, condensation of the vapor of the material in a low-pressure gas, and deposition of nanopowders on a large cold square crystallizer.

Title: Exploring the relationship between thickness and the characteristic temperature of Mn1.56Co0.96Ni0.48O4±δ films

Wenwen Kong
Xinjiang Technical Institute of Physics & Chemistry of CAS
China

Wenwen Kong has her expertise in temperature sensitive materials and components. Her resently results have opened a way to design a desired negative temperature coefficient thermistor by adjusting the thickness and period orientation of the ceramic films.

Title: The research on antioxidaiton and mechanical property of SiC-ZrO2-MoSi2/Ni coated CF reinforced phenolic resin composites

Guangyuan Yang
China Tobacco Hubei Industrial, LLC
China

Guangyuan (David) Yang is the PhD candidate of Wuhan University of Technology, also he is working for China Tobacco Hubei Industrial, LLC as a material engineer. He is focusing on ablation materials and functional cigarette materials, especially on antioxidation coatings and flavor capsule. He uses sol-gel method and composite electroplating to make ceramic coatings to improve the oxidation resistance of CF and its reinforced composites. The mint flavor capsule in cigarette he develops has been sold in the market known as 8oC.

SPEAKER SLOTS AVAILABLE

Title: Piercing the Veil of Modern Physics. Part 3 & Superconductivity

Jian Ding
Qilu Normal University
China

Our research (including three parts of Basics and Philosophy and Superconductivity) the core of which is the philosophical part. It is from the perspective of all knowledge to describe how understand and confirm the absolute truths, as well as their attribution, characteristics and application. This philosophical principle has universality, which can provide the reliable bases for exploring or checking the various laws of natural.

Title: Effects of boron on densification of tantalum carbides and beyond: the core-shell structure

Limeng Liu
North Minzu University
China

Limeng Liu has his expertise in ceramic processing and evaluation, particularly in SiC, α-SiAlON, Si3N4 and TaC ceramics. He has developed a Si3N4 porous ceramic and successfully commercialized it. During densifying ceramics by SPS, he regulated the electric current output to demonstrate effect of large electric current density on densification and microstructural evolution of Al2O3, SiC, TaC and ZrB2 ceramics. Some research results were published in Scr Mater, J Eur Ceram Soc, J Am Ceram Soc, etc. with good recognition.

Title: Metal oxide based gas sensors and their electronic nose for air quality monitoring

Manjeet Kumar
Incheon National University

Dr. Manjeet Kumar is working as Research Professor in the Department of Electrical Engineering at Incheon National University. He received his doctoral degree from the DIAT-DRDO, Pune, India, in 2016, and Masters in Materials Engineering from Thapar University, India in 2009. From 2009 to 2010, he worked as a project associate at IIT, Delhi. He also served as assistant professor at N.C. College of Engineering (N.C.I.T.), India. He is working on the structural-property relations of nanomaterials especially advanced ceramics for various applications. He has contributed to the synthesis of engineered nanomaterials for environmental, energy, and biological applications.

SPEAKER SLOTS AVAILABLE

Title: Improving mechanical and damping properties of NiTi shape memory alloy reinforced aluminum nanocomposites (SMA-AMNCs)

R. Abdul Shakoor
Qatar University

Dr. R. A. Shakoor is currently working as Assistant Professor in the Center for Advanced Materials (CAM), Qatar University, Doha, Qatar. He holds a PhD degree in Materials Engineering. His area of research focuses on the synthesis and characterization of advance materials for various applications. He has been awarded with several academic and professional awards because of his outstanding academic, industrial and research achievements.

Title: Development of New Generation SiC Armour Ceramics Reinforced with Reduced Graphene Oxide/Graphene Oxide

Burcu Yilmaz Nurol
Technologies Inc.

Burcu Yılmaz has received her BS degree in Material Science and Nanotechnology Engineering. She has expertise in synthesis and characterization of 2D carbon nanomaterials. She has carried on studies based on graphene and graphene oxide materials and their polymer and ceramic composites. For a while now, she has been working in the field of defence industry. At this company, she has been studying on advance ceramic materials, sinter additives and binder agents. In addition, she also has been investigating the effect of nanomaterials on advanced ceramic matrix.

Title: Formation of Aluminum-Oxide Layer on the Surface of Fe-Cr-Al Fibers

Osama M. Ibrahim
Kuwait University

Dr. Ibrahim graduated from the University of Wisconsin-Madison, USA with a Ph.D. degree in Mechanical Engineering and minor in Chemical Engineering. He has held various teaching, research & development, and executive management positions at RYPOS, Inc., University of Rhode Island, and University of North Carolina-Charlotte.Currently he is a visiting Associate Professor at University of Kuwait

SPEAKER SLOTS AVAILABLE

Title: Comparative Studies on Nanocomposite Polymer Electrolyte Films and their Nanofibers {(PVA:NH4SCN):Al2O3} system for electrochemical devices efficiency

Neelesh Rai
AKS University

Dr. Neelesh Rai has completed his Ph.D. degree in theoretical & experimental Condensed Matter Physics & Nanocomposites and has been serving as an editorial board member of World Solid State Ionics Society, New Jersey, Frontiers of Mechatronical Engg., Ceramic Sciences & Engg., USA, Journal of Innovation in Applied Research. He had started his career as a Research Interns in Advanced Materials & Processes Research Institute Govt. of India and later on shifted to AKS University

Title: PANI-ZnO Nanocomposites Embedded Polyurethane Films for Antifouling Applications

Vandana A. Mooss
Savitribai Phule Pune University

Vandana A. Mooss is presently doing her doctoral degree in Chemistry at the Department of Chemistry, SPPU, Pune, Maharashtra, India. Her area of research includes Polyaniline and its modified nanocomposites for anticorrosion, antifouling and supercapacitor applications.

Title: Potassic fertilizer from Feldspar

Sourish Bhattacharya
CSIR

Sourish Bhattacharya has his expertise in Microbial leaching of Potassium Feldspar for potassium recovery for its application as biofertilizers. Sourish Bhattacharya has completed his B. Tech in Biotechnology from West Bengal University of Technology and M.Tech in Fermentation Technology from Institute of Chemical Technology, Mumbai. He worked as Research Executive at Innovative Creations Business Modules Pvt. Ltd., India for 2 years. Presently he is working as Junior Scientist at Central Salt and Marine Chemicals Research Institute, Council of Scientific and Industrial Research, India. He is currently working on various areas involving Recovery of K value from mineralogical resources through chemical/bio-chemical/electro-chemical means.

SPEAKER SLOTS AVAILABLE

Title: Electric Discharge machining of metal matrix composites

Balwinder Singh
CTIEMT

Balwinder Singh has his expertise in mechanical engineering in machining of composite materials. He has experience of more than 10 years in research,evaluation ,teaching and administration in education institutions. He has completed his PhD in Industrial Engineering and has published many research papers in international and national journals.

Title: Smart Materials for Agricultural Purpose

Balbir Singh Kaith
Dr. B.R. Ambedkar National Institute of Technology

Dr Balbir Singh Kaith is the Professor & Head, Department of Chemistry, Dr B R Ambedkar National Institute of Technology, Jalandhar (Punjab) India. He completed his PhD from University Institute of Pharmaceutical Sciences, Panjab University, Chandigarh and Post Doc from University of Horticulture and Forestry, Nauni. He has published more than 250 research papers in reputed journals. He has been conferred with many awards including ICC 2018 Award, HSCA Fellow of Year Award and Best Teacher Award. His research group has got Gold Paper Award, Young Chemist Award, Young Scientist Award and many Best Papers Awards.

Title: Study of Importance of Nanotechnology in a Cement Based Material, Concrete: Review on its Environmental Effect and Mechanical Properties

Manjinder Singh
RBIENT

Manjinder Singh has his expertise in Civil engineering in cement and concrete particles with nanotechnology advancements. He has experience of more than 5 years in research,evaluation ,teaching and administration at Rayat Bahra Institute of Engg. And Nanotechnology, Hoshiarpur. He is completing his PhD in Structural Engineering and has published many research papers in international and national journals.

SPEAKER SLOTS AVAILABLE

Title: Preparation of low cost pozzolona from locally available clay at Khyber-Pakhtunkhwa Pakistan and its use in Portland cement

Noor-ul-Amin
Abdul Wali Khan University

Dr. Noor ul Amin has completed his PhD at the age of 35 years from institute of chemical science, university of Peshawar, Pakistan. He is the chairman of the Department of Chemistry, abdul wali khan university Mardan, Pakistan. He has published 60 publication papers in well reputed international journals. Dr. Amin has presented his research in different international conferences in different countries including Czech Republic and USA

Title: Mathematical modeling of processes through experimental identification and artificial intelligence techniques for the improvement of energy and metallurgical

Deynier Montero Góngora
Metallurgical Institute of Moa

Deynier Montero Góngora has his expertise in modeling and identification of industrial processes. His model based on experiments and techniques of artificial intelligence that allow to improve the energetic and metallurgical efficiency. He has built this model after years of experience in research, evaluation, teaching, both in educational institutions and companies. The Institute guarantees the integral and continuous training of professionals; develops with quality and relevance science, technology, innovation, university extension and postgraduate studies in the mining branch; contributes to the prosperous and sustainable development of Cuban society.

Title: Influence of excess alumina on mullite synthesis with pyrophyllite-alumina by spark plasma sintering process

Rasidi Sule
University of Witwatersrand

Rasidi Sule is a young researcher whose work is focussed mainly on the spark plasma sintering of metal matrix composites and ceramics for various applications. He has developed the procedure for achieving full densification and high thermal conductivity of compacts made with submicron copper powder with angular particles, which has received less research attention and demand compared to spherical powders. He has developed a simple and efficient process of dispersing CNTs into a copper matrix without damaging the nanotubes structure.

SPEAKER SLOTS AVAILABLE

Title: The use of 3D Printing and Gelation Casting to Fabricate Complex Ceramic Parts

D.J. Whitefield
University of the Witwatersrand

I have worked in the manufacturing sector for the mining industry for 16 years. I was the technical manager responsible for plant and process improvement for BOART Longyear. I ran production for 5 years for BARAT Carbide optimizing process and streamlining the flow of materials through the plant in order to meet and improve quality standards and customer requirements. I was a Section Head at De Beers Research Laboratories responsible for research development of carbide diamond PCD drill bits for oil and gas drilling. Currently I am a senior lecturer at The University of the Witwatersrand focusing on research in ceramics, 3D printing, tape casting, bio ceramics and tungsten carbide projects.

Title: Improving Wear Performance of Multi-layer Electroless Ni-based Coating using Laser Heat Treatment

Olamilekan Rasaq Oloyede
Afe Babalola Univerity

Dr. O. R. Oloyede is a dynamic scholar and research oriented fellow with track record of publications in notable international journals, who believes in solving industrial challenges through critical thinking. He is a specialist in Materials characterization, fabrication and corrosion control with excellent practical, teaching, and supervisory skills gathered over the years. He is a senior lecturer in the Mechanical Engineering Department, Afe Babalola Univerity, Nigeria. He is dedicated to academic excellence and his focus has being to remain a bridge and catalyst to lasting legacy in sound research and innovation in Materials & Mechanical Engineering worldwide! Dr. Oloyede, is an adaptable, resourceful and efficient researcher with excellent communication skills in the field of Advanced Materials.

Title: The Effect of Temperature on Bonds Length of ZnO Wurtzite Phase Under Low and High Pressure and Temperature a Molecular Dynamics Prediction

Yahia Chergiu
Boumerdes University

Yahia CHERGUI has completed his PhD from Badji Mokhtar University in Annaba, Algeria. He is a teacher in Boumerdes University since 2012. He has published more than 8 papers in reputed journals and has been serving as a referee with condensed matter journal (IOP) and Energy journal(Elsevier).He passed 6 months in Cardiff university and Queen University for summer school.

SPEAKER SLOTS AVAILABLE

Title: Toughness and Dielectric Behavior of Polycristalline Alumina

L. Haddour
University of Science and Technology Houari Boumediene

Haddour Lillia, Doctor in metallurgy obtained at the Algiers National Polytechnic School in Algeria. She has worked on the relationships between the microstructure and mechanical and dielectric properties of polycrystalline alumina. This work was done in collaboration with the IFOS Lyon Central School and the Saint Etienne National Mining School. Currently, she is a research professor in the Materials Technology Laboratory at the University of Science and Technology HB in Algiers. She is leading a research project on thermal projection and tribology of metals and composites.

Title: Effect of the composition and the micromechanical models on Numerical modeling of functionally graded plates under high velocity impact loads

Zemani Kada Polytechnic military school

ZEMANI KADA is a doctoral graduate student in materials and structure behavior at Polytechnic military school, after receiving his master's degree in aeronautical construction from aeronautic institute of BLIDA –ALGERIA, he worked as assistant in higher school of aeronautic technics –ALGERIA, and he has worked on composites and functional materials behavior. His current work focuses on impact behavior of ceramics and FGM materials. After graduation, ZEMANI .K is looking forward to researching in the area of intelligent materials especially the piezo-ceramics.

Title: Influence of Galia (Ga2O3) Addition on the Phase Evolution and Grain Growth behavior of Voided Yttria Stabilized Zirconia (YSZ) Powder

Chen Barad
Ben-Gurion University

Chen Barad is a graduate student and has expertise in sol-gel synthesis and in the field of ceramic materials. Her previous knowledge and experience in chemistry and chemical engineering creates new pathways for research in the field of ceramic materials. She has experience in research of YSZ powders and other zirconia based powders for energy applications (solid oxide fuel cells and thermal barrier coatings), designing powder particle morphology and analyzing XRD patterns.

SPEAKER SLOTS AVAILABLE

Title: Advanced lightweight textile performs & composite materials

Abbasali Saboktakin, University of Sistan & Baluchestan

Abbasali Saboktakin received Ph.D degree in Mechanical/Aerospace engineering from Canada and now is assistant professor of mechanical engineering department at University of Sistan & Baluchestan, Iran. He has collaborated with the well-known aerospace companies in the field of production and testing aerostructures in North America & Europe.

Title: Preparation of TiO2 by Acidic leaching of ilmenite concentrate

Rehab H. Khanjar
Middle Technical University

She has completed his BSc in Production and Metallurgy from University of Technology/Baghdad. Then She get the MSc in Extraction of metals from the same university and later PhD in Metallurgy from University of Technology/ Baghdad. She worked as lecturer in the Institute of Technology in Mechanical Department. She changed her work to be the General Manager of Leetani Company for Limited General Trade and Engineering Consultations from 1999-2006. And Then returned to Institute of Technology/Baghdad which related to Middle Technical University. Now she is the Manager of Computer Center of the Institute.

Title: Structural and vibrational properties of doped Tricalcium phosphate powders prepared by solid state method

Asmaa El Khouri
Laboratory of Inorganic Materials and their Applications

El khouri asmaa phd student in laboratory of inorganic sciences and their applications at faculty of sciences semlalia Marrakech morocco, my thesis subject is on synthesis and characterization of phosphates and oxides compounds and their applications

SPEAKER SLOTS AVAILABLE

Title: Valorization of fine wastes from washing units in quarries for use in ceramics industry (Marrakesh, Morrocco)

Rachida Bouachera
Cadi Ayyad University

Rachida Bouachera, state engineer in soil and subsoil development and exploitation and PhD student in Semlalia Faculty of Sciences, Cadi Ayyad University, Marrakesh, Morroco. In the process of formulating ceramics based wash sludge generate by the crushing saturation in the region of Marrakesh.

Title: Modeling of materials heating by concentrated solar radiation and cooling of melt

Mukhammad-Sultan Paizullakhanov

Material-science Institute

Mukhammad-Sultan Payzullakhanov has completed in the 1984 at the age of 25 years from Uzbek National University and postdoctoral studies from Nuclear Physics Institute of the Uzbekistan academy of Sciences and defended PhD thesis on the effects of radiation on the structure and properties of superconducting ceramics in the 1998. The field of scientific interests is material sciences, solar energy use. He is the head of the ceramics laboratory of the Material-sciences institute of the scientific production association "Physics-Sun".

Title: Studies on the physico-mineralogical and mechanical properties of ancient and contemporary bricks of Kathmandu valley

Jagadeesh Bhattarai
Tribhuvan University

Prof. Bhattarai has completed his PhD from Institute of Materials Research (IMR), Tohoku University, Japan in 1998. He has been working more than thirty years as a Faculty member of Chemistry of Central Department of Chemistry, Tribhuvan Univ., Nepal and had promoted to full Professor of Chemistry in 2013. He had carried out research works at Tokyo Institute of Technology (1991-92) in the field of clay mineralogy and Tohoku Institute of Technology (2007-08), Japan. He has published more than 125 papers in reputed journals. Now, he is the Chief Editorial of Journal of Institute of Science & Technology (JIST)- an official journal of Institute of Science & Technology, Tribhuvan University, Nepal.
