WELCOME ADDRESS

Dear Attendees,

The Climate Change 2023 Organizing Committee is absolutely delighted to welcome you to the **12th World Conference on Climate Change** which will be held in **Dubai, UAE** on **November 20-21, 2023,** **3,** where we will be shining a spotlight on "*Assessing Impacts in Diverse Ecosystems*".

We are looking forward to providing you with a superb environment in which Earth's atmosphere to present, discuss and advance your Oncology and Hematology research. The world class scientific programme will consolidate existing knowledge while at the same time increase your awareness of leading edge and forward looking advances in the field.

The congress is to be held in one of the world's most important global cities which stands on the River Thames in southeast England, which is called as London. It exerts considerable influence on the arts, commerce, education, entertainment, fashion, finance, healthcare, media, professional services, research and development, tourism, and transportation. What better place to combine leading edge science with an unsurpassed personal experience.

We look forward to seeing/welcoming you in 2023 for an experience of a lifetime.

With Regards
Climate Change 2023

About Conference

Conference Series llc LTD takes immense pleasure to extend our warm welcome to invite all the participants from all over the world to attend 12th World Conference on Climate Change during November 20-21, 2023 Dubai, UAE which will entail lively debates, prompt keynote presentations, Oral talks, Poster presentations, Workshops and Networking opportunities around a core of plenary and concurrent sessions based on essential topics in the Climate Change. Theme : Assessing Impacts in Diverse Ecosystems

Climate Change

The Earth's atmosphere has changed all through history. Just over the most recent 650,000 years there have been seven cycles of frigid development and withdraw, with the sudden end of the last ice age around 7,000 years prior denoting the start of the cutting edge atmosphere time — and of human progress. A large portion of these atmosphere changes are ascribed to little varieties in Earth's circle that change the measure of sun based vitality our planet gets.
