ABOUT PARIS

Paris, city and capital of France, situated in the north-central part of the country. People were living on the site of the present-day city, located along the Seine River some 233 miles (375 km) upstream from the river's mouth on the English Channel (La Manche), by about 7600 BCE. The modern city has spread from the island (the Île de la Cité) and far beyond both banks of the Seine.

The three main parts of historical Paris are defined by the Seine. At its centre is the Île de la Cité, which is the seat of religious and temporal authority (the word cité connotes the nucleus of the ancient city). The Seine's Left Bank (Rive Gauche) has traditionally been the seat of intellectual life, and its Right Bank (Rive Droite) contains the heart of the city's economic life, but the distinctions have become blurred in recent decades.

City Attractions: Eiffel Tower, Louvre Museum, Versailles Palace, Latin Quarter, Seine River, Montmartre and Sacré Coeur, Musée d'Orsay, Arc de Triomphe, Pompidou Center, Luxembourg Garden and many more..
