4th International Conference on Drug Chemistry

June 19-20, 2023
London, UK

ABOUT CONFERENCE

Conference Series cordially invites all participants from across the world to our 4th International Conference on Drug Chemistry, which will be place in London, UK, on June 19–20, 2023. Future predictions and Exploding Applications in Medicinal Chemistry was the focus. The greatest gathering of participants from the pharmaceutical community will have the chance to attend this one-of-a-kind international conference, where they will be able to share thoughts and discuss recent advancements in the industry.

TARGET AUDIENCE

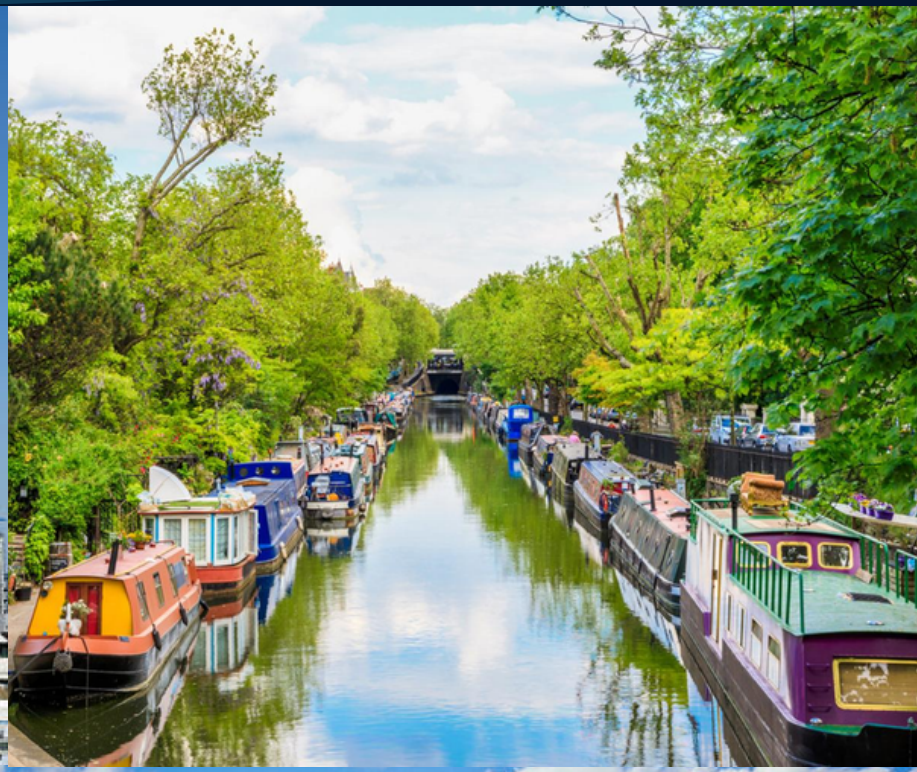

- Pharmaceutical Researchers
- Professors
- Pharmaceutical Industry Professionals (CEOs, MDs, Directors)
- Academicians (Professors, Deans, Directors)
- Drug Delivery
- Drug Designing
- Drug Testing
- Graduates and Post Graduates in Pharmaceutics
- Government healthcare departments, HTA's and drug regulators.
- Companies manufacturing medical devices
- Research and Medical Laboratories
- Pharmaceutical companies
- Students

SESSIONS/TRACKS

- Medicine Chemistry
- New Trends in Pharmacology and Drug Development
- Chemoinformatic Drug Discovery
- Proteomics & Bioinformatics Drug Discovery
- Clinical Trials and Regulatory Affairs in Pharmacy
- Medical bias for Drug Delivery
- Vaccine and medicine Delivery Systems
- Molecular Modelling in Drug Designing
- Corona Virus Drug Discovery
- Computer backed Drug Designing
- Drug Designing Methodologies
- Pharmaceutical Organic Chemistry
- Pharmaceutical Drug Discovery and Nanotechnology
- Pharmacovigilance and Drug Safety
- Drug Delivery Devices
