VENUE

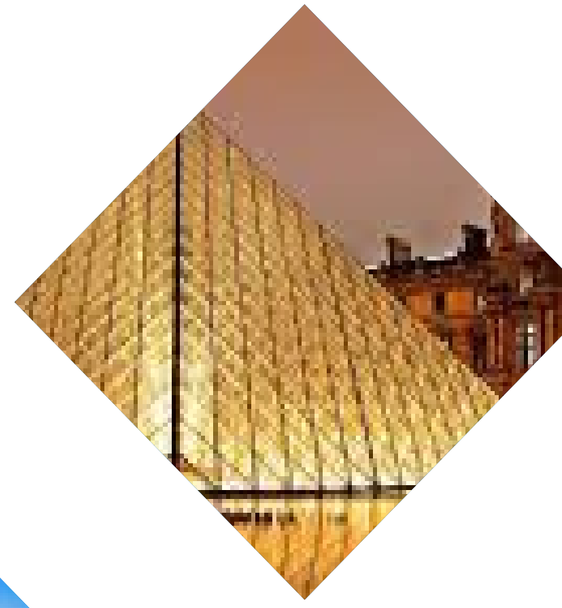

Paris is the capital city of France, situated on the River Seine, in northern France, at the heart of the Île-de-France region ("Région parisienne"). The Paris "aire urbaine" (roughly: "metropolitan area") is one of the most populated areas of its kind in Europe, with a population of roughly 12 million, including 10 million in the Paris urban area, plus the population of the commuter belt surrounding it. Paris has a population of a little over 2 million within city limits.

The Paris metropolitan area extends far beyond the city limits, forming an irregular oval with arms of urban growth extending along the Seine and Marne rivers from the city's south-east and east, and along the Seine and Oise rivers to the city's north-west and north. Further, beyond the central suburbs, population density drops sharply in the surrounding land; a mix of forest and agriculture dotted with a network of relatively evenly dispersed satellite towns, this commuter belt, when combined with the Paris agglomeration, completes a Paris aire urbaine (metropolitan area) that covers an oval 14,518 km^2 (5,605.5 mi^2) in area, or about 138 times that of Paris itself.
