About **LONDON**

London is the capital and largest city of England and the United Kingdom. The city stands on the River Thames in the south-east of England, at the head of its 50-mile (80 km) estuary leading to the North Sea. London has been a major settlement for two millennia. Lodinium was founded by the Romans. The City of London, London's ancient core and financial center – an area of just 1.12 square miles (2.9 km2) and colloquially known as the Square Mile – retains boundaries that closely follow its medieval limits. The adjacent City of Westminster is an Inner London borough and has for centuries been the location of much of the national government.
