About Kualalumpur

Malaysia is a Southeast Asian country which occupies parts of the Malay Peninsula and island of Borneo. It is known for its beaches, rainforests and mix of Malay, Chinese, Indian and European cultural influences. The capital of Malaysia is Kualalumpur which is the home to many colonial buildings, busy shopping districts such as Bukit Bunting and skyscrapers such as the iconic, 451m-tall Petronas Twin Towers. Originally a part of the Malay Kingdom, Malaysia became a part of the British Empire only in the 18th Century. It is a multi-cultured kingdom which has a strong political hold over its citizens and is basically modelled over Westminster parliamentary system with the common law ruling over its legal system. And this is one of the key factors due to which Malaysia has one of the best economic records in Asia, with GDP growing at an average 6.5% per annum for almost 50 years. Another important factor that defines the country's economy is its rich abundance in its natural resources and tourism industry. Allconferencealert.com brings in together all the important conferences that are going on around this beautiful Asian country to a single place in a perfect manner.
