About Munich

Munich is the largest city in the south of Germany and is about an hour and a half drive from the Alps. Most of the time the mountains are just a dark unclear shadow on the horizon, but with the right weather conditions - specifically a special wind called the Foehn, they become crystal and beautifully clear.

This is when the postcard pictures get taken. Munich is very close to Austria, Switzerland and after a short hop through Austria, also Italy. It is a mostly flat place and has true continental weather i.e. very warm in the summer, and very cold in the winter. The summer sees quite a few thunderstorms in the evenings, but far more beautiful sunsets. If you come in the winter, bring really warm clothes, in summer the nights are balmy but bring a small umbrella just in case.

Munich is much more than just the venue for the Oktoberfest; it's the high-tech capital of Germany with many international companies choosing to have their European headquarters here. BMW, MAN (truck maker) and MTU (aero engine maker) are also based in Munich as are countless other firms. Munich is a very culturally active city too with its orchestras, ensembles, opera houses and theatre. All the major music artists will pass through Munich on their European tours. Flick through any of Munich's events magazines to get a sense of how much is going on and if you're here for a longer stay, there are even two English cinemas as well as a number of English video libraries. Total Population in Munich 1,300,000 Area of Munich 310 sq. km (121 sq. mi)
