5th Annual Conference on Epidemiology and Public Health

May 18-19, 2022 Osaka, Japan

About Conference:

With great pleasure we welcome all the participants across the World to attend the "5th Annual Conference on Epidemiology and Public Health" going to be held on May 18-19, 2022 at Osaka, Japan

This conference provides a firm platform for scientists, researchers, professors, engineers, and directors of various companies, industrial professionals, and students in the field of epidemiology, microbiology, virology, infectious diseases, and public health and other related fields to share their knowledge. We also take massive pleasure in welcoming various professionals from distinct countries all over the world.

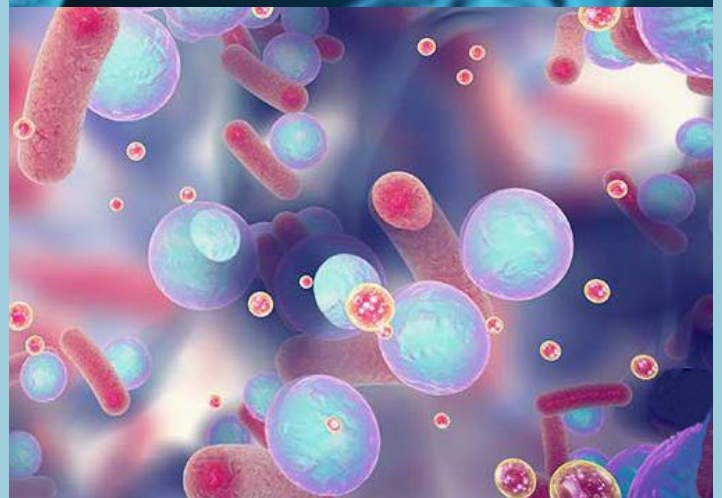

EPIDEMIOLOGY HEALTH MEET 2022 is an international platform for building research works and therapeutic findings and disorders related to microbial diseases, viruses, and infections caused by bacteria, and fungi. These types of diseases may be caused due to water-borne, food-borne, and airborne in human beings as well as in plants and animals. When it comes to microbiology and virology the microbes are characterized as the heart for most of the solution of the pressing problems in the world. It also represents the increasing importance of human mortality around the globe; thereby vaccination and vaccine development play a significant role in terms of global health.

Tracks / Sessions
