September 2019 |Volume: 09 | ISSN: 2165-7920
Journal of Clinical Case Reports

10th International Conference on

# Clinical and Medical Case Reports

September 16-17, 2019 | Amsterdam, Netherlands

**Conference Series LLC Ltd**
47 Churchfield Road, London, W36AY, UK Tel : +44 20 393 63178
Toll Free No: UK : 0-808-101-7605, USA : 1-800-985-2178

# Scientific Program

## Day 1 Sep 16, 2019

**09:30-9:50: Registrations**

### Meeting Hall -Field Meeting Room 2

**09:50-10:00** **Opening Ceremony**

| Keynote Forum | |
|---|---|
| 10:00-10:40 | **Title: New approach to dizziness with clinical method**<br>**Mohamamad Hamad,** Mediclinic Welcare Hospital, UAE |
| **Sessions** | |
| **Surgery Case Reports \| Cardiology Case Reports \| Case Reports on Ophthalmology \| Case Reports on Proctology or Colorectal Surgery \| Case Reports on Urology and Gastroenterology \| Oncology/Cancer Science Case Reports \| Neurology Case Reports \| Case Reports on Public and Mental Health \| Diabetes & Endocrinology Case Reports \| Case Reports on Vascular and Endovascular Surgery** | |
| 10:40-11:10 | **Title: Large cell neuroendocrine carcinoma of the tongue base**<br>**Andrew Tan,** John Hunter Hospital, Australia |
| **Coffee and Refreshment Break 11:10-11:30** | |
| 11:30-12:00 | **Title: Recurrent retropharyngeal collection – An unusual and challenging case of second branchial cleft cyst**<br>**Daniel Phung,** John Hunter Hospital, Australia |
| 12:00-12:30 | **Title: Non Iatrogenic of colorectal barotrauma with extraperitoneal rectal injury**<br>**Mohamed Javid R,** Rajiv Gandhi Government General Hospital, India |
| 12:30-13:00 | **Title: The impact of inadvertent high dosage of Degarelix on the patient's psychological wellbeing**<br>**Mohamed Breish,** Darent Valley Hospital, United Kingdom |
| **Lunch Break 13:00-14:00 @ Restaurant Romeo** | |
| 14:00-14:30 | **Title: Tracheostomy as a cause of late flap failure**<br>**Andrew Tan,** John Hunter Hospital, Australia |
| 14:30-15:00 | **Title: Pneumothorax post TASER activation**<br>**Daniel Phung,** John Hunter Hospital, Australia |
| 15:00-15:30 | **Title: Cogenital intestinal malrotation with midgut volvulus in adult**<br>**Mohamed Javid R,** Rajiv Gandhi Government General Hospital, India |

| | |
|---|---|
| 15:30-16:00 | **Title: The association between sarcoid-like reaction and renal cell carcinoma**<br>**Mohamed Breish,** Darent Valley Hospital, United Kingdom |
| **Networking and Refreshments Break 16:00-16:20** | |
| 16:20-16:50 | **Inverted papilloma of the External Auditory Canal with Malignant Transformation**<br>**Andrew Tan,** John Hunter Hospital, Australia |
| 16:50-17:20 | **Title: Stress oriented Pitting edema alike hypothyroid symptoms: A rarest case presentation**<br>**Niraj Khatri Sapkota,** Chitwan Medical College, Nepal |
| **Poster Presentations 17:20-17:40** | |
| PP1 | **Title: An unusual cause of adult ileoileal intussusception**<br>**Mohamed Javid R,** Rajiv Gandhi Government General Hospital, India |
| PP2 | **Title: Resistant HCV variant after cure treatment with ledipasvir/sofosbuvir in a patient with chronic hepatitis C**<br>**Masego Nelly Esendi,** Jocham Hospital, Kenya |
| PP3 | **Title: A rare case of Littre's and Richter's inguinal hernia**<br>**Jie Zhao,** John Hunter Hospital, Australia |
| PP4 | **Title: The unexpected twist – a rare case of a 67 year old female with gastrointestinal stromal tumor presenting as gastric volvulus**<br>**Joie Sheen Ayuste Bastian,** Davao Doctors Hospital, Philippines |
| PP5 | **Title: Has our nurse-led clinic helped to improve the efficiency and overall experience of urodynamic tests?**<br>**Mohamed Breish,** Darent Valley Hospital, United Kingdom |
| PP6 | **Title: Wound protector for umbilical hernia repair in a patient needing diagnostic laparoscopy**<br>**Jie Zhao,** John Hunter Hospital, Australia |
| PP7 | **Title: Laparoscopic nephrolithotomy in a horse shoe kidney**<br>**Mohamed Breish,** Darent Valley Hospital, United Kingdom |
| **Panel Discussion** | |
| **Closing Ceremony** | |
| **End of Day 1** | |
| **Day 2 (Sep 17, 2019)** | |
| **Networking & Lunch 13:00-14:00 @ Restaurant** | |

# List of Open Access Journals

## Agri, Food & Aqua

| | |
|---|---|
| Advances in Crop Science and Technology | 2329-8863 |
| Advances in Dairy Research | 2329-888X |
| Agrotechnology | 2168-9881 |
| Aquaculture Research & Development | 2155-9546 |
| Arabidopsis C. Elegans and Zebrafish | - |
| Biofertilizers & Biopesticides | 2155-6202 |
| Crop Research | 2454-1761 |
| Experimental Food Chemistry | - |
| Fisheries & Livestock Production | 2332-2608 |
| Fisheries and Aquaculture Journal | 2150-3508 |
| Fisheriessciences | 1307-234X |
| Food & Industrial Microbiology | - |
| Food & Nutritional Disorders | 2324-9323 |
| Food Processing & Technology | 2157-7110 |
| Food: Microbiology, Safety & Hygiene | - |
| Forest Research | 2168-9776 |
| Horticulture | 2376-0354 |
| International Biodiversity, Bioprospecting and Development | 2376-0214 |
| Marine Science: Research & Development | 2155-9910 |
| Medicinal & Aromatic Plants | 2167-0412 |
| Nutrition & Food Sciences | 2155-9600 |
| Plant Pathology & Microbiology | 2157-7471 |
| Poultry, Fisheries & Wildlife Sciences | 2375-446X |
| Probiotics & Health | 2329-8901 |
| Research & Reviews: Journal of Agriculture and Allied Sciences | 2347-226X |
| Research & Reviews: Journal of Food and Dairy Technology | 2321-6204 |
| Rice Research | 2375-4338 |
| Traditional Medicine and Clinical Naturopathy (Homeopathy & Ayurvedic Medicine-2167-1206) | - |

## Business & Management

| | |
|---|---|
| Accounting & Marketing | 2168-9601 |
| Arabian Journal of Business and Management Review | 2223-5833 |
| Business & Financial Affairs | 2167-0234 |
| Business & Hotel Management | 2324-9129 |
| Business and Economics Journal | 2151-6219 |
| Defense Studies & Resource Management | 2324-9314 |
| Entrepreneurship & Organization Management | 2169-026X |
| Global Economics | 2375-4389 |
| Hotel & Business Management | 2169-0286 |
| International Journal of Accounting Research | - |
| International Journal of Economics and Management Science | 2162-6359 |
| Internet Banking & Commerce | 1204-5357 |
| Review of Public Administration and Management | 2315-7844 |
| Stock & Forex Trading | 2168-9458 |
| Tourism & Hospitality | 2167-0269 |

## Chemical Engineering

| | |
|---|---|
| Advanced Chemical Engineering | 2090-4568 |
| Bioprocessing & Biotechniques | 2155-9821 |
| Chemical Engineering & Process Technology | 2157-7048 |
| Thermodynamics & Catalysis | 2157-7544 |

## Chemistry

| | |
|---|---|
| Analytical & Bioanalytical Techniques | 2155-9872 |
| Analytical & Electrochemical Insights | - |
| Bioenergetics: Open Access | 2167-7662 |
| Chemical Informatics | - |
| Chemical Sciences Journal | 2150-3494 |
| Chromatography & Separation Techniques | 2157-7064 |
| Clinical & Medical Biochemistry: Open Access | - |
| Clinical Chemistry: Open Access | - |
| Environmental & Analytical Toxicology | 2161-0525 |
| Environmental Analytical Chemistry | - |
| Glycobiology | 2168-958X |
| Herbal Medicine: Open Access | - |
| Immuno Chemistry: Open Access | - |
| Industrial Chemistry: Open Access | - |
| International Journal of Applied Biology and Pharmaceutical Technology | 0976-4550 |
| International Journal of Drug Development & Research | 0975-9344 |
| Mass Spectrometry: Open Access | - |
| Medicinal Chemistry | 2161-0444 |
| Modern Chemistry & Applications | 2329-6798 |
| Natural Products Chemistry & Research Journal | 2329-6836 |
| Neuro Chemistry: Open Access | - |
| Organic & Inorganic Chemistry | - |
| Organic Chemistry: Current Research | 2161-0401 |
| Pharmaceutical Analytical Chemistry: Open Access | - |
| Physical Chemistry & Biophysics | 2161-0398 |
| RROIJ: Medicinal Chemistry | - |
| Structural Chemsitry & Crystallography Communication | - |
| Trends in Green Chemistry | - |
| Vitamins & Minerals | 2376-1318 |

## Clinical

| | |
|---|---|
| Ageing Science | 2329-8847 |
| Ancient Diseases & Preventive Remedies | 2329-8731 |
| Anesthesia & Clinical Research | 2155-6148 |
| Annals of Clinical and Laboratory Research | 2386-5180 |
| Arrhythmia: Open Access | - |
| Atherosclerosis: Open Access | - |
| Cell Biology: Research & Therapy | 2324-9293 |
| Cellular & Molecular Pathology | - |
| Clinical & Experimental Cardiology | 2155-9880 |
| Clinical & Experimental Dermatology Research | 2155-9554 |
| Clinical & Experimental Nephrology | - |
| Clinical & Experimental Oncology | 2324-9110 |
| Clinical & Experimental Ophthalmology | 2155-9570 |
| Clinical & Experimental Orthopaedics | - |
| Clinical & Experimental Pathology | 2161-0681 |
| Clinical & Molecular Endocrinology | - |
| Clinical and Experimental Psychology | - |
| Clinical and Experimental Transplantation | - |
| Clinical Case Reports | 2165-7920 |
| Clinical Depression | - |
| Clinical Dermatology Research Journal | - |
| Clinical Diabetes & Practice | - |
| Clinical Nutrition & Dietetics | - |
| Clinical Oncology and Practice | - |
| Clinical Pediatrics | - |
| Clinical Pediatrics & Dermatology | - |
| Clinical Psychiatry | - |
| Clinical Research & Bioethics | 2155-9627 |
| Clinical Research On Foot & Ankle | 2329-910X |
| Clinical Respiratory: Open Access | - |
| Clinical Toxicology | 2161-0495 |
| Clinical Trials | 2167-0870 |
| Clinics in Mother and Child Health | 2090-7214 |
| Cosmetology & Orofacial Surgery | - |
| Cosmetology & Trichology | - |
| Dermatitis | - |
| Diabetes Case Reports | - |
| Dialysis and Clinical Practice | - |
| Drug Intoxication & Detoxification : Novel Approaches | 2327-4557 |
| Dual Diagnosis: Open Access | - |
| Eye & Cataract Refractive Surgery | - |
| Forensic Toxicology & Pharmacology | 2325-9841 |
| Glaucoma: Open Access | - |
| HIV & Retro Virus | - |
| Immunooncology | - |
| Insights in Pediatric Cardiology | - |

| | |
|---|---|
| Intensive and Critical Care | - |
| International Journal of Anesthesiology & Pain Medicine | - |
| International Journal of Cardiovascular Research | 2324-8602 |
| International Journal of Digestive Diseases | - |
| International Journal of Ophthalmic Pathology | 2324-8599 |
| Interventional Cardiology: Open Access | - |
| JBR Journal of Clinical Diagnosis and Research | 2376-0311 |
| Optometry: Open Access | - |
| Phonetics & Audiology | - |
| Speech Pathology & Therapy | - |
| Stem Cell Research & Therapy | 2157-7633 |
| Toxicology: Open Access | - |
| Vasculitis | - |

## Earth & Environmental Sciences

| | |
|---|---|
| Advances in Recycling | - |
| Astrobiology & Outreach | 2332-2519 |
| Biodiversity & Endangered Species | 2332-2543 |
| Biodiversity Management & Forestry | 2327-4417 |
| Bioremediation & Biodegradation | 2155-6199 |
| Biosafety | 2167-0331 |
| Climatology & Weather Forecasting | 2332-2594 |
| Coastal Zone Management | - |
| Earth Science & Climatic Change | 2157-7617 |
| Ecosystem & Ecography | 2157-7625 |
| Entomology, Ornithology & Herpetology | 2161-0983 |
| Expert Opinion On Environmental Biology | 2325-9655 |
| Fundamentals of Renewable Energy and Applications | 2090-4541 |
| Geography & Natural Disasters | 2167-0587 |
| Geoinformatics & Geostatistics: An Overview | 2327-4581 |
| Geology & Geosciences | 2329-6577 |
| Geophysics & Remote Sensing | 2169-0049 |
| Hydrogeology & Hydrologic Engineering | 2325-9647 |
| Hydrology: Current Research | 2157-7587 |
| Industrial Pollution Control | - |
| Innovative Energy Policies | 2090-5009 |
| International Journal of Evolution | 2324-8548 |
| International Journal of Waste Resources | 2252-5211 |
| Marine Biology & Oceanography | 2324-8661 |
| Oceanography: Open Access | 2332-2632 |
| Oil & Gas: Open Access | - |
| Petroleum & Environmental Engineering | 2157-7463 |
| Plant Physiology & Pathology | 2329-955X |
| Pollution Effects & Control | 2375-4397 |
| Research & Reviews: Journal of Ecology and Environmental Sciences | - |

## EEE

| | |
|---|---|
| Electrical & Electronic Systems | 2332-0796 |
| Electrical Engineering & Electronic Technology | 2325-9833 |

## Engineering

| | |
|---|---|
| Advances in Automobile Engineering | 2167-7670 |
| Advances in Robotics & Automation | 2168-9695 |
| Aeronautics & Aerospace Engineering | 2168-9792 |
| Applied Bioinformatics & Computational Biology | 2329-9533 |
| Applied Mechanical Engineering | 2168-9873 |
| Architectural Engineering Technology | 2168-9717 |
| Automatic Control of Physiological State and Function | 2090-5092 |
| Biochips & Tissue Chips | 2153-0777 |
| Bioengineering & Biomedical Science | 2155-9538 |
| Biomusical Engineering | 2090-2719 |
| Biosensors & Bioelectronics | 2155-6210 |
| Biosensors Journal | 2090-4967 |
| Civil & Environmental Engineering | 2165-784X |
| Computer Engineering & Information Technology | 2324-9307 |
| Computer Engineering and Information Technology | 2324-9307 |
| Defense Management | 2167-0374 |
| Fashion Technology & Textile Engineering | 2329-9568 |
| Global Journal of Technology and Optimization | 2229-8711 |
| Global Research in Computer Science | 2229-371X |
| Industrial Engineering & Management | 2169-0316 |
| Information Technology & Software Engineering | 2165-7866 |
| International Journal of Advanced Research in Electrical, Electronics and Instrumentation Engineering | 2278-8875 |
| International Journal of Advancements in Technology | 0976-4860 |
| International Journal of Biomedical Data Mining | 2090-4924 |
| International Journal of Innovative Research in Computer and Communication Engineering | 2278-1021 |
| International Journal of Innovative Research in Science, Engineering and Technology | 2319-8753 |
| International Journal of Sensor Networks and Data Communications | 2090-4886 |
| International Journal of Swarm Intelligence and Evolutionary Computation | 2090-4908 |
| Irrigation & Drainage Systems Engineering | 2168-9768 |
| Lasers, Optics & Photonics | - |
| Lovotics | 2090-9888 |
| Membrane Science & Technology | 2155-9589 |
| Molecular Imaging & Dynamics | 2155-9937 |
| Nuclear Energy Science & Power Generation Technology | 2325-9809 |
| Research & Reviews: Journal of Engineering and Technology | 2319-9873 |
| Steel Structures & Construction | - |
| Telecommunications System & Management | 2167-0919 |
| Textile Science & Engineering | 2165-8064 |

## General Science

| | |
|---|---|
| Computer Science & Systems Biology Journal | 0974-7230 |
| Ergonomics | 2165-7556 |
| Research and Development | - |
| International Journal of Advance Innovations, Thoughts & Ideas | 2277-1891 |
| Metrology | - |
| Research & Reviews: Journal of Botanical Sciences | 2320-0189 |
| Research & Reviews: Journal of Chemistry | 2319-9849 |
| Tomography | - |

## Genetics & Molecular Biology

| | |
|---|---|
| Advanced Techniques in Biology & Medicine | 2379-1764 |
| Advancements in Genetic Engineering | 2169-0111 |
| Advances in Molecular Diagnostics | - |
| Biochemistry & Analytical Biochemistry | 2161-1009 |
| Biochemistry & Molecular Biology Journal | - |
| Biochemistry & Physiology | 2329-9029 |
| Biological Systems | 2329-6577 |
| Biotechnology & Biomaterials | 2155-952X |
| Bipolar Disorder: Open Access | - |
| Cell & Developmental Biology | 2168-9296 |
| Cell Science & Therapy | 2157-7013 |
| Cell Signaling | - |
| Cellular & Molecular Medicine: Open Access | - |
| Chemical Biology & Therapeutics | - |
| Clinical Epigenetics | - |
| Cloning & Transgenesis | 2168-9849 |
| Current Synthetic and Systems Biology | 2332-0737 |
| Cytology & Histology | 2157-7099 |
| Down Syndrome & Chromosome Abnormalities | - |
| Electronic Journal of Biology | - |
| Enzyme Engineering | 2329-6674 |
| Fertilization: in Vitro | 2375-4508 |
| Fungal Genomics & Biology | 2165-8056 |
| Gene Technology | 2329-6682 |
| Genetic Syndromes & Gene Therapy | 2157-7412 |
| Hereditary Genetics: Current Research | 2161-1041 |
| Human Genetics & Embryology | 2161-0436 |
| Insights in Cell Science | - |
| Insights in Stem Cells | - |
| International Journal of Genomic Medicine | 2332-0672 |
| Metabolomics: Open Access | 2153-0769 |
| Metabonomics & Metabolites | 2325-9736 |
| Microbial & Biochemical Technology | 1948-5948 |
| Microbial Methods & Assays Open Access | - |
| Molecular and Genetic Medicine | 1747-0862 |
| Molecular Biology | 2168-9547 |
| Molecular Biomarkers & Diagnosis | 2155-9929 |
| Molecular Cloning & Genetic Recombination | 2325-9787 |
| Nanomedicine & Biotherapeutic Discovery | 2155-983X |
| Next Generation: Sequencing & Applications | - |
| Phylogenetics & Evolutionary Biology | 2329-9002 |

| | |
|---|---|
| Physiobiochemical Metabolism | 2324-8793 |
| Plant Biochemistry & Physiology | 2329-9029 |
| Proteomics & Enzymology | - |
| Single Cell Biology | 2168-9431 |
| Tissue Science & Engineering | 2157-7552 |
| Transcriptomics: Open Access | 2329-8936 |
| Translational Biomedicine | 2172-0479 |

## Health Care

| | |
|---|---|
| Diversity and Equality and Health and Care | 2049-5471 |
| Health Care: Current Reviews | 2375-4273 |
| Health Science Journal | 1791-809X |
| Pregnancy & Child Health | 2376-127X |
| Primary Health Care | 2167-1079 |
| Quality in Primary Care | 1479-1072 |
| Tropical Diseases & Public Health | 2329-891X |
| Women'S Health, Issues & Care | 2325-9795 |

## Immunology

| | |
|---|---|
| Advances in Antibiotics & Antibodies | - |
| Allergy & Therapy | 2155-6121 |
| Autoimmune Diseases: Open Access | - |
| Clinical & Cellular Immunology | 2155-9899 |
| Cytokine Biology | - |
| Immunobiology | - |
| Immunogenetics: Open Access | - |
| Immunome Research | 1745-7580 |
| Immunotherapy: Open Access | - |
| Infectious Diseases & Immunological Techniques | 2325-9752 |
| Inflammatory Bowel Diseases & Disorders | - |
| Innate Immunity & Immunological Disorders | - |
| Interdisciplinary Journal of Microinflammation | - |
| Lupus: Open Access | - |
| Molecular Immunology | - |
| Osteoarthritis | - |
| Reproductive Immunology | - |
| Rheumatology: Current Research | 2161-1149 |
| Sarcoidosis | - |
| Vaccines & Vaccination | 2157-7560 |

## Informatics

| | |
|---|---|
| Data Mining in Genomics & Proteomics | 2153-0602 |
| Glycomics and Lipidomics | 2153-0637 |
| Health & Medical Informatics | 2157-7420 |
| Proteomics & Bioinformatics | 0974-276X |
| Theoretical and Computational Science | 2376-130X |

## Materials Science

| | |
|---|---|
| Bioceramics Developments and Applications | 2090-5025 |
| Material Sciences & Engineering | 2169-0022 |
| Nano Research & Applications | - |
| Nanomaterials & Molecular Nanotechnology | 2324-8777 |
| Nanomedicine & Nanotechnology | 2157-7439 |
| Plastic & Polymer Sciences | - |
| Powder Metallurgy & Mining | 2168-9806 |
| Research & Reviews: Journal of Material Sciences | 2321-6212 |

## Mathematics

| | |
|---|---|
| Applied & Computational Mathematics | 2168-9679 |
| Biometrics & Biostatistics | 2155-6180 |
| Generalized Lie Theory and Applications | 1736-4337 |
| Physical Mathematics | 2090-0902 |
| Research & Reviews: Journal of Statistics and Mathematical Sciences | - |

## Medical

| | |
|---|---|
| Abnormal and Behavioural Psychology | - |
| Acta Psychopathologica | - |
| Acta Rheumatologica | - |
| Addictive Behaviors , Therapy & Rehabilitation | 2324-9005 |
| Adenocarcinoma | - |
| Advances in Cancer Prevention | - |
| Advances in Genetic Engineering & Biotechnology | - |
| Advances in Weight Loss Management & Medical Devices | - |
| Aerobics & Fitness | - |
| Aesthetic & Reconstructive Surgery | - |
| Aids & Clinical Research | 2155-6113 |
| Air and Water Borne Diseases | 2167-7719 |
| Alternative & Integrative Medicine | 2327-5162 |
| Analgesia & Resuscitation : Current Research | 2324-903X |
| Anaplastology | 2161-1173 |
| Anatomy & Physiology: Current Research | 2161-0940 |
| Andrology & Gynecology: Current Research | 2327-4360 |
| Andrology | 2167-0250 |
| Angiology: Open Access | 2329-9495 |
| Annals of Behavioural Science | - |
| Applied and Rehabilitation Psychology: Open Access | - |
| Archives in Cancer Research | 2254-6081 |
| Archives of Medicine | 1989-5216 |
| Archives of Surgical Oncology | - |
| Archivos De Medicina | 1698-9465 |
| Arthritis | 2167-7921 |
| Asthma and Bronchitis | - |

## Impact Factor Calculation:

Impact Factor was established by dividing the number of articles published in 2012 and 2013 with the number of times they are cited in 2014 based on Google search and the Scholar Citation Index database. If 'X' is the total number of articles published in 2012 and 2013, and 'Y' is the number of times these articles were cited in indexed journals during 2014 than, impact factor = Y/X

## KEYNOTE SESSION

10th International Conference on
Clinical and Medical Case Reports
September 16-17, 2019 | Amsterdam, Netherlands

## New approach to dizziness with clinical method

Dizziness is the most common condition or symptom to be present in emergency departments or rooms in most part of the world. It can easily be missing diagnosed as central vs peripheral vertigo if not deal with proper history and examination in EDs by emergency physicians or clinicians. Dizziness can be defined as "spinning movement in surroundings" or whirlpool like feeling. Dizziness is common among elderly age with many different reasons apart from peripheral or central causes of vertigo which includes risk of fall, trauma, dietary intake, walking aids, organic diseases, vision problems etc. Author presentation will focus on new method of diagnosing dizziness in emergency departments as quick and easy three steps which includes three clinical tests which are: nystagmus; skew test and; head thrust test.

**Muhammad Hammad**
Mediclinic Welcare Hospital, UAE

## Biography

Muhammad Hammad has completed his MBBS degree from the Hamdard University Hospital, Karachi, Pakistan and completed MRCEM (UK) in 2017. He has clinical experience in Emergency Medicine more than eight years and he is currently working in Mediclinic Welcare Hospital, Dubai, UAE since 2015 till to date. and has completed his Internship in Gen. Medicine and Gen Surgery six months in each respectively followed by work at National Institute of Cardiovascular Diseases, Karachi, Pakistan. He has worked in General ICU for about two years, and worked in Adult Emergency Medicine Department and got trained in Aga Khan University Hospital, Karachi, Pakistan, followed by continue working in A&E Department of Al Dhaid Teaching Hospital, UAE and then joined A&E Department of Mediclinic Welcare Hospital, Dubai.

September 16-17, 2019 | Amsterdam, Netherlands

## SCIENTIFIC TRACKS & ABSTRACTS

## Sessions:

Day 1 Sep 16, 2019

**Surgery Case Reports | Cardiology Case Reports | Case Reports on Ophthalmology | Case Reports on Proctology or Colorectal Surgery | Case Reports on Urology and Gastroenterology | Oncology/Cancer Science Case Reports | Neurology Case Reports | Case Reports on Public and Mental Health**

**Session Introduction**

**Title:** Large cell neuroendocrine carcinoma of the tongue base

**Andrew Tan**, John Hunter Hospital, Australia

**Title:** Recurrent retropharyngeal collection – An unusual and challenging case of second branchial cleft cyst

**Daniel Phung**, John Hunter Hospital, Australia

**Title:** Non Iatrogenic of colorectal barotrauma with extraperitoneal rectal injury

**Mohamed Javid R**, Rajiv Gandhi Government General Hospital, India

**Title:** The impact of inadvertent high dosage of Degarelix on the patient's psychological wellbeing

**Mohamed Breish**, Darent Valley Hospital, United Kingdom

**Title:** Tracheostomy as a cause of late flap failure

**Andrew Tan**, John Hunter Hospital, Australia

**Title:** Pneumothorax post TASER activation

**Daniel Phung**, John Hunter Hospital, Australia

**Title:** Cogenital intestinal malrotation with midgut volvulus in adult

**Mohamed Javid R**, Rajiv Gandhi Government General Hospital, India

**Title:** The association between sarcoid-like reaction and renal cell carcinoma

**Mohamed Breish**, Darent Valley Hospital, United Kingdom

**Title:** Inverted papilloma of the External Auditory Canal with Malignant Transformation

**Andrew Tan**, John Hunter Hospital, Australia

**Title:** Stress oriented Pitting edema alike hypothyroid symptoms: A rarest case presentation

**Niraj Khatri Sapkota**, Chitwan Medical College, Nepal

## Large cell neuroendocrine carcinoma of the tongue base

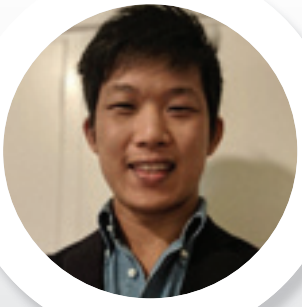

Large cell neuroendocrine carcinoma (LCNEC) is a rare entity usually arising from a pulmonary origin. Unfortunately, due to a lack of clinical trials, there is no defined approach for the treatment of these cancers. To date there have only been two reported cases of LCNEC originating from the base of tongue. In this case report we discuss the presentation, management and disposition of a patient diagnosed with LCNEC originating from the base of tongue, with a review of the current literature

### Biography

Andrew Tan has completed his Bachelor of Medicine in 2016 at the University of Newcastle, NSW, Australia. He is currently employed as an Otorhinolaryngology SRMO at John Hunter Hospital in Newcastle. Within this role he is working closely with head and neck cancer specialists for this region.

**Daniel Phung**
John Hunter Hospital, Australia

## Recurrent retropharyngeal collection–An unusual and challenging case of second branchial cleft cyst

Second branchial cleft cysts are congenital anomalies that occur due to failed obliteration of the second branchial cleft during embryogenesis. Whilst location of these anomalies commonly lies between the palatine tonsil and anterior border of sternocleidomastoid, atypical presentations are described in the literature and may prove to be a diagnostic and management challenge. We present a case of a 38-year-old gentleman who underwent multiple drainages and excisions of a recurrent retropharyngeal collection with a histological diagnosis of second branchial cleft cyst. This report documents the difficulty in clearance of a recurrent branchial cleft cyst in the retropharyngeal space and highlights the importance of suitable surgical access to prevent recurrence.

## Non-iatrogenic of colorectal barotrauma with extraperitoneal rectal injury

Barotrauma was once very rare but recent reports of such incidents across the globe suggest that advances in the usage of high pressure compressed air for various purposes in the industrial environment has led to an increase in pneumatic injuries. Colorectal barotraumas are injuries that happen due to an elevated intraluminal pressure mainly by air and these injuries can vary from simple mucosal traumas to perforation of the bowel. We present a case of a 22-year-old boy, who presented to us with abdomen discomfort with subcutaneous emphysema in the abdomen and lower chest, following a prank played by his friend who had inserted a nozzle through his anal orifice and pumped high pressure condensed air through it. Computed tomography (CT) of the abdomen and pelvis showed evidence of air pockets in ischiorectal fossa and pelvis. Intraoperatively, we found rectal tears and large bowel serosal tears with distension of small bowel and large bowel. The tears were primarily sutured and a transverse loop colostomy was fashioned to facilitate healing of rectal wounds and to relieve the distension. The colostomy was closed after eight weeks. Not many of such colorectal barotraumas have been reported and many of these injuries presented with bowel perforations and tension pneumoperitoneum. Most of these patients underwent surgery and very few patients were managed conservatively. Such variations in clinical presentations and the interventions which are done in these scenarios imply the need for further reporting of such injuries and its interventions for formulating better management protocols.

## The impact of inadvertent high dosage of Degarelix on the patients psychological wellbeing

In the UK, prostate cancer is the most common cancer in men affecting about 47,700 new patients annually. Its management depends on many factors including the patient's age and medical fitness as well as the stage and the grade of the disease. Typically, advanced prostate cancer is managed with hormonal blockade (i.e. medical androgen deprivation therapy). This is usually given is in the form of luteinizing hormone-releasing hormone (LHRH) analogues or anti-androgens. Such medications are often initiated by Urologists and continued by General practitioners. Degarelix is an LHRH antagonist commonly used to treat advanced prostate cancer and is given as a loading dose, followed by a monthly maintenance dose. This case reports on a 72-year-old male patient who was inadvertently given a second loading dose of Degarelix that resulted in acute psychosis. He presented with panic attacks, delusions, suicidal thoughts and insomnia associated with visual hallucinations for which he was admitted to a mental health hospital. Such symptoms did not settle despite of antipsychotic medications and the cause was identified. Degarelix was stopped and Bicalutamide was commenced instead of Degarelix, which resulted in a significant improvement in the patient's psychological wellbeing. As a result, his antipsychotics medications were weaned off gradually. To the authors' best knowledge, this is the first case to report on acute psychosis with the context of high dosage of Degarelix. This case highlights the importance of accurate drug dosing, with the emphasis on the effect of clear communication between secondary and primary care providers.

## Tracheostomy as a cause of late flap failure

**Introduction:** Late flap failure is a rare occurrence in reconstruction surgery. The most common cause of failure is due to vascular injury. We examine two cases where a communication between the tracheotomy and neck dissection potentially led to late flap failure.

**Method:** Medical records were examined of two patients who experienced late flap failure with tracheostomy.

**Discussion:** A literature review was performed showing the main aetiology of late flap failure. The cases were discussed with learning points from the flap failure including ensuring the two dissections do not communicate.

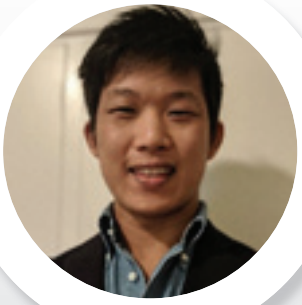

**Conclusion:** Tracheotomies need to be identified as a potential source of flap failure. Swift removal as clinically able as well as ensuring dissections are separate is the crux to avoiding late flap failure.

## Pneumothorax post TASER activation

Use of conducted electrical weapons (CEWs) is increasingly common in law enforcement worldwide. CEWs have infrequently been associated with significant injury; advocates for CEWs suggest that underlying psychiatric and substance abuse profiles are more likely to be at the root of adverse effects. Previously associated injuries from TASER use include simple superficial injuries (contusions, abrasions) to complications of fall, rhabdomyolysis, spinal fractures, testicular torsion, miscarriage and formation of cataracts. Internal visceral injury is thought less probable given the diminutive size of the taser barbs. We present a case of pneumothorax post TASER discharge.

## Cogenital intestinal maltoration with midgut volvulus in adult

Congenital intestinal malrotation is a complex gastrointestinal anomaly that occurs when there is an aberration in the normal development and rotation of the gut. Though this is commonly seen in children, it can rarely present in adults. The clinical features may be acute or chronic or sometimes patients may even remain asymptomatic throughout their lives. The majority of the patients present within their first birthday but complications due to malrotation such as volvulus and obstruction can occur at any age implying the need to consider this diagnosis when there is a dilemma in identifying the cause of intestinal obstruction in the adult population. We report a case of a 30-year-old gentleman who came to us with a clinical presentation suggestive of acute intestinal obstruction. X-ray abdomen showed dilated small bowel loops. Contrast-Enhanced CT of the abdomen showed evidence of bowel wall enhancement, fluid-filled dilated small bowel loops and the presence of pneumatosis intestinalis. These suggested the possibility of intestinal ischemia. An emergency laparotomy was done and it was found that the intestinal obstruction was due to midgut volvulus resulting from intestinal malrotation. The patient had viable bowel and so we subsequently performed a Ladd's procedure. The patient recovered well and the postoperative period was uneventful. We intend to present this case to highlight the high degree of clinical suspicion needed to diagnose this condition in adults, where an early intervention plays a crucial role in determining the final outcome.

## The association between sarcoid-like reaction and renal cell carcinoma

Renal cell carcinoma (RCC) is a highly vascular tumour which metastasise via lymphatic or haematogenous route. Classically, RCC presents as a triad of flank pain, haematuria and a palpable renal mass. Extra renal manifestations of metastatic RCC includes pulmonary, inferior vena cave, bones and liver involvement.

Sarcoid- like reaction (SLR) is a phenomenon used to describe non caseating granulomas which does not fulfil the criteria for systematic sarcoidosis. The aetiology of SLR remains unclear, however they are commonly observed in haematological malignancies such as lymphomas. Only few reports have documented the presence of non-caseating granulomas of SLR in the context of RCC.

We present a rare case of 38 old gentleman initially presented to the cardiology team with dyspnoea associated with junctional bradycardia and right bundle branch block on ECG. A CT scan revealed bilateral pulmonary nodules with reticular changes, diffuse small lesions in liver and spleen indicative of granulomatous inflammation. However, the CT scan also showed a solid lesion in the left kidney suggestive of RCC. Ten months later, radical nephrectomy was performed and G1 pT1a N0M0 renal cell carcinoma, Conventional/clear cell subtype was confirmed. The tumour showed extensive epithelioid granulomatous (sarcoid-like) reaction affecting both peritumoral and intratumoral area. Follow up images 28 months after nephrectomy demonstrated almost complete resolution of granulomatous lesions.

The remarkable resolution of granulomas after removing RCC confirms the interesting association between malignancy and SLR. Our case supports the hypothesis that non-caseating granulomas of SLR could be a manifestation of an immunologically mediated antitumor response.

## Inverted papilloma of the external auditory canal with malignant transformation

Inverted papillomas commonly occur in paranasal sinuses and is the second most common benign tumour of the sinonasal tract. There is an association with squamous cell carcinoma with a reported prevalence of between 3.4-9.7%. Inverted papillomas are suspected to have a viral aetiology with human papillomavirus being demonstrated in polymerase chain reactions (PCR). The serotypes 16 and 18 have been associated with malignant transformation histologically. We present the case of an 80 year old man who had suffered with chronic unilateral otorrhoea for 20 years and presented to an otolaryngology clinic. A biopsy was taken demonstrating an atypical papilloma favouring an inverted papilloma. He proceeded to surgical resection of the lesion confirming an inverted papilloma with malignant transformation to a squamous cell carcinoma. He proceeded to be discussed at the Head and Neck Multidisciplinary team meeting for treatmnent and elected to undergo radiotherapy. To date, there have been no reports on inverted papilloma of the external auditory canal. We discuss this patients case along with a literature review.

### Biography

## Stress oriented pitting edema alike hypothyroid symptoms: A rarest case presentation

**Niraj Khatri Sapkota**
Chitwan Medical College, Nepal

Co-Author
**Rakesh Kumar Sah**
Chitwan Medical College, Nepal

**Background:** Edema is general symptomatic feature of different organ failure or due to malnutrition or in sometimes due to long stand especially during summer with , heavy weight bearing, vasodilatation, or cardio-hepato-renal disease or in rare hypothyroidism, but in atypical case could demonstrates depression with progressive stress also shows indication of mild pitting edema.

**Case presentation:** This is a case of middle age divorced male under depression who is under medication since 10 years complained of weight gain almost 10kg in 30 days duration, less attentive to his work and always feel sleepiness during day (once get to sleep, slept more than 5 hours during day) and also late upto morning if not called to wake-up, also with diminished memory, more specific event was before 60 days of these symptoms he unexpectedly suffered family tragedy.

**Test and result:** He performed all the test that possibly could lead to diagnosis of foot edema echocardiography, ECG, Creatinine clearance, total protein, albumin and finally thyroid function test but all test were normal except high 24 hours creatinine clearance therefore no any medication were prescribed, on counseling and motivation all his symptoms slowly disappeared in 45 days duration.

**Conclusion:** This case is rarest presentation of depression led progressive stress pitting edema that got managed after appropriate counseling along with changes in his life style.

## Biography

Niraj Khatri Sapkota has completed his PhD in Molecular Physiology applications to pharmacology at the age of 32 years from Zhejiang University, China, one of the Thomson Reuters and Elsevier best ranked university of the world; he is now working as an Associate Professor in the Department of Physiology in Chitwan Medical College affiliated to Tribhuvan University, Nepal. ## An unusual cause of adult ileoileal intussusception

Intestinal intussusception in adults is not considered to be common. It is usually encountered in children, in whom, it is generally considered idiopathic. In contrast, adults presenting with intussusception generally possess a demonstrable pathological lead point; commonly a polyp, submucosal lipoma or other tumors. Clinical presentations may range from an acute presentation to a chronic one and such wide variations make it challenging to establish the diagnosis on time. But the use of computed tomography (CT) in these scenarios has considerably enhanced the diagnostic capabilities. Though a conservative approach might be preferred in some circumstances, these patients usually require surgery, especially when the viability of the involved bowel is compromised. Our patient, a 42-year-old male, presented to us with clinical features suggestive of acute intestinal obstruction. X-ray abdomen showed multiple air-fluid levels. CT of the abdomen showed diffuse dilatation of the jejunal and ileal loops and the collapse of the large bowel with a transition point probably at the terminal ileum or ileocaecal junction. Following this, he underwent an emergency laparotomy when intussusception of the ileum was noted and the involved bowel segment was resected. Histopathology showed that the lead point was due to tuberculous lesion. Further investigations showed that the patient had pulmonary tuberculosis which was unidentified till then. The patient was started on anti-tuberculous treatment thereafter. We intend to present this case to sensitize the readers to the unusual presentation of intestinal tuberculosis as intussusception which should be considered especially in countries with high tuberculosis endemicity.

## Resistant HCV Variant after cure treatment with Ledipasvir/Sofosbuvir in a patient with chronic Hepatitis C

**Masego Nelly Esendi**
Jocham Hospital, Kenya

Our patient was a 58-year-old man with HCV diagnosed four years ago. He had no co- morbidities and his brother was also diagnosed HCV. There were no risk factors. His fibrosis stage by Ishak was F5 four years ago and he was treatment- experienced with pegylated interferon- RBV. On initial evaluation, he was asymptomatic and examination was unremarkable. Laboratory testing revealed elevated transaminase levels and HCV genotype 1b with a viral load of 4.2+E6 IU/mL. The patient was treated with 12-week course of SOF (400 mg daily)/ LDV (90 mg daily) and RBV (1000 mg daily). In the first month of the therapy there was rapid normalization transaminase levels and clearance of the virus however, no side effects of therapy have found. The compliance of the treatment was certainly perfect. Three months after completing treatment, virological relapse was occurred with a HCV RNA 4.0 + E5 IU/mL and his transaminase levels were slightly elevated.

**Methods:** The patient was categorized as CHC according to the European Association for the Study of the Liver Clinical Practice Guidelines. Blood sample with K2EDTA was immediately separated by centrifugation, liquated, and kept at - 80˚C until required. The presence of anti- HCV was tested for the sample which was anti-HCV positive through ELISA testing, using a commercial kit (Cobas E 601 Analyzer Roche Diagnostic- Mannheim, Germany).

In addition, for protease inhibitors; asunaprevir, boceprevir, faldaprevir, grazoprevir, pariteprevir, simeprevir, telaprevir, for NS5A inhibitors; daclatasvir, elbasvir, ledipasvir, ombitasvir, velpatasvir, and for NS5B inhibitors; dasabuvir and sofosbuvir were analyzed in the HCV NS3, NS5A and NS5B sequencing, respectively.

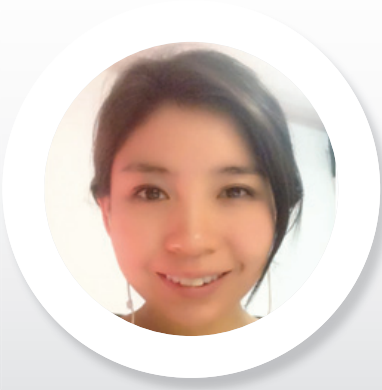

**Discussion:** Our patient was one among the rare occurrences of the cases in whom viral relapse occur after achieving end-of-treatment response with LDV/SOF. In spite of the compliance of the treatment, infected with genotype 1b and addition of RBV, with no reinfection and no comorbidity; the patient had only three poor prognostic factors: cirrhosis, male gender and treatment was experienced.

Molecular analysis demonstrated that Y93H as a cross - resistant mutation for NS5A region related resistance mutation was determined. In addition, S282G and C316S were determined as amino acid substitution for NS5B region. NS5A resistance associated mutation (Y93H) could be effective in relapse in LDV/SOF therapy. However, in Turkey, this case with Y93H mutation was the first to be reported.

## A rare case of Littre's and Richter's inguinal hernia

**Jie Zhao**
John Hunter Hospital,
Australia

Co-Author
**Brendon McManus**
John Hunter Hospital,
Australia

**Background:** A hernia is defined as the protrusion of an organ through a muscle or tissue holding it in place, Littre's hernia is a rare surgical entity, containing Meckel' diverticulum. A Richter's hernia is when bowel wall partially herniated. We present a case of an elderly lady with the rare surgical presentation of having both hernias simultaneously.

**Case Study:** The case study begins with an 84 year-old lady presented with signs and symptoms consistent with a small bowel obstruction. This is on the background of obesity, type 2 diabetes, ischaemic heart disease, and asthma. On examination she was hemodynamically stable, alert and orientated. Her abdomen was soft and non-tender with an easily reducible ventral hernia. She subsequently had a CT abdomen which showed a left side inguinal hernia which was not detected by the emergency or surgical staff due to the patient's body habitus. She underwent open inguinal hernia exploration, and on opening the sac, a Littre as well as Richter's hernia was revealed. The neck of the small bowel was deemed viable, so only a diverticulectomy of the Meckel's diverticulum was performed. The hernia was subsequently repaired with a Lichtenstein technique. There were no significant post-operative complications, and patient was discharged on day seven post operation.

**Discussion:** There is no published literature reported on combined Littre's and Richter's inguinal hernia. Given the potential high morbidity and mortality associated with Richter's hernia, this condition should be included in the list of differential diagnosis.

## The unexpected twist – A rare case of a 67 year old female with gastrointestinal stromal tumor presenting as gastric volvulus

**Joie Sheen Ayuste Bastian**
Davao Doctors Hospital, Philippines

Gastric volvulus is a clinical dilemma due to its nonspecific history and physical examination. Early diagnosis is warranted, and if left undetected, may cost the patient's life. Due to difficulty in diagnosis, most cases are unreported, which is evident by an unknown incidence and prevalence of this condition. With the advent of advanced imaging modality and ancillary procedures, patients affected with gastric volvulus may now be treated at its golden period. Surgical intervention remains the gold standard of treatment in patients with this clinical entity and has a significant effect in prognosis when addressed immediately. This is a case report of a 67 year-old female who presented with an eight-week history of abdominal pain, hematemesis and vomiting. Seen initially by a gastroenterologist, an upper GI endoscopy was performed which showed a gastric mass lesion causing difficulty of the scope to traverse the body of the stomach. CT scan of the whole abdomen revealed an organo-axial gastric volvulus. The patient was referred to general surgery service and was scheduled for exploratory laparotomy, detorsion of gastric volvulus, wide excision of gastric mass, gastrorrhaphy and gastropexy. Post-operative course was unremarkable. Further work up on histopathology and immunohistochemical staining, turned out to be positive for CD 117, revealing gastrointestinal stromal tumor as the turning point causing the volvulus.

### Biography

Joie Sheen Ayuste Bastian has completed her BS Biology degree at the University of the Philippines – Mindanao specializing in molecular biology and ecology. By the age of 24 years, she has completed her Doctorate degree in Medicine at Davao Medical School Foundation. She is currently in Residency training program at the Department of Surgery in Davao Doctors Hospital. She has published an international scientific journal in Molecular Taxonomy and presented in national interesting case presentation.

## Has our nurse-led clinic helped to improve the efficiency and overall experience of urodynamic tests?

**Mohamed Breish**
Darent Valley Hospital, UK

Co-Authors
**Tina Mitchell** and **Joseph Nariculam**
Darent Valley Hospital, UK

**Aim:** To analyse and compare the number of patients who underwent urodynamic tests before and after the introduction of nurse-led urodynamic clinic and assess staff's adherence to local policy.

**Background:** Urodynamics tests (UDT) are physiological measurements of the voiding and storage function of the lower urinary tract that are commonly performed in clinical practice to investigate bothersome lower urinary tract symptoms. Despite considerable efforts to improve UDT, standardization of the practice remains challenging. The International Continence Society (ICS) continues to urge for "Good Urodynamic Practice". Hence, we introduced a nurse-led urodynamic clinic (NLUC) to improve efficiency and patient experience.

**Methods:** Urodynamics clinic patient database was used to identify the patients who underwent UDT between October 2017 and June 2019. The first cycle included retrospective data of 82 randomly selected patients between September 2017 and September 2018. The NLUC was introduced in November 2018. The data of 86 patients who underwent UDT after the introduction of NLUC were assessed and analysed retrospectively.

**Results:** The average number of patients undergoing UDT was 25 per month with inconsistent referrals that are lacking important information such as significant comorbidities, predisposing factors, findings of the clinical examinations, and urinalysis results. 23/82 (28%) patients were not commenced on appropriate treatment and only 12/82 (≈15%) had bladder diary charts completed. Findings concluded that up to 25% of referrals were deemed inappropriate for UDT. After the introduction of NLUC the average number of patients decreased to 18.8 and 91.1 of patients had a final diagnosis or appropriate management plan after UDT.

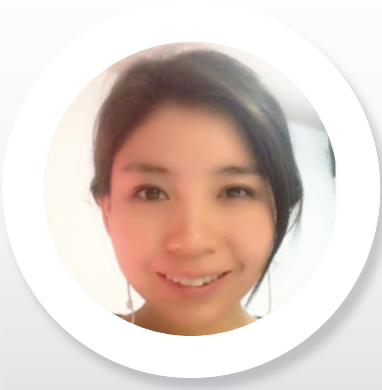

**Conclusion:** Not only has the introduction of NLUC reduces same-day cancellations in patients undergoing UDT, but also decreases the burden on our department and offers patients education, providing better overall experience.

## Wound protector for umbilical hernia repair in a patient needing diagnostic laparoscopy

**Background:** A wound protector has been recommended for hernia repairs to improve surgical exposure and to reduce the rate of surgical site infections (SSI). However, in patients needing laparoscopy, wound protectors create barriers for achieving complete seal of the abdominal cavity.

**Case Study:** A 53-year-old man presented with a two-year history of right upper quadrant pain and bloating. He was diagnosed with biliary colic and progressed to a laparoscopic cholecystectomy and open suture repair of an incidental umbilical hernia. His symptoms did not resolve and his umbilical hernia reoccurred within 12 months. He was therefore booked for another laparoscopy (diagnostic) and repairs of umbilical hernia with mesh. In order to achieve this, an Alexis was used. Subsequently, a GelPortTM was placed over the Alexis who achieved a good seal for the laparoscopy, facilitating the identification of adhesion. This was successfully divided and his umbilical hernia was fixed with mesh. His pain was subsequently resolved and to date there was no recurrence of his umbilical hernia.

**Discussion:** Umbilical/ventral hernia is common surgical presentations. With increasing prevalence of obesity, fixation of these types of hernias can be technically challenging. A wound protector such as AlexisTM has been previously demonstrated to be beneficial by increasing exposure and decreasing risk of SSI. However, it could be challenging if patients necessitate fixation of umbilical hernia and laparoscopy simultaneously. Utilizing the GelPortTM system could facilitate completing both procedures successfully concurrently, and thus, reducing the cost associated with another surgery or complications such as recurrence and infection.

## Laparoscopic nephrolithotomy in a horse shoe kidney

Horseshoe kidney (HSK) is the most common congenital renal fusion anomaly with incidence of 1/400 the majority of which are incidental findings. HSK is characterized by malrotation of kidney, altered blood supply and tendency to form pelvi-ureteric junction obstruction in 30% of the cases which can be asymptomatic. However, HSK may present with complications such as urinary tract infections (UTI), stone formation and obstruction. Nephrolithiasis which is seen in 20% of cases of HSK is considered one of the most common indications for surgery. Indeed, the anatomical abnormalities challenge the treatment of stones in HSK. For instance, due to caudal and medial location of calyces, and the abnormal anterior position of the kidney, extracorporeal shock wave lithotripsy (ESWL) fails to achieve the same success rate in HSK. Percutaneous nephrolithotomy (PCNL) is also associated with major complications in anomalous kidney. Thanks to recent advancements of laparoscopic instrumentation and techniques, laparoscopic surgery continues to emerge as a promising alternative for stone treatment in HSK. We present a case of a 61-year-old lady who presented initially with recurrent UTI irresponsive to multiple courses of antibiotics. Urine cultures confirmed positive E. coli. Ultrasound sonography showed duplex kidney with multiple stones in the right kidney. CT scan revealed HSK with multiple right renal stones (35 mm in right lower pole with eight stones of 2-4 mm in size) associated with severe hydronephrosis of the right kidney. The patient was treated successfully with laparoscopic nephrolithotomy. Our case demonstrates that laparoscopy is an effective and safe approach in treatment of greater than 2 cm renal stones in HSK.

## Looks are deceptive

Fistula in ano, one of the common conditions, which usually arises as a complication of incompletely drained perianal abscess. Our first case is a 73 year old male with complaints of purulent discharge in the perianal region for a duration of 5 years. Operated twice for perianal abscess 5 and 3 years ago.On examination, external openings noted at 6, 8 and 10 'o' clock position.Rectal examination revealed a growth arising from anorectal junction, extending for 5 centimeters upwards, confirmed by computed tomography abdomen. Colonoscopy guided biopsy revealed infiltrating adenocarcinoma which was congruent with the wedge biopsy taken from the fistulous tract. Our second case is a 60 year old male patient with complaints of purulent discharge from the perianal region since 7 years, with history of surgery for perianal abscess 7 years ago. Examination revealed external openings at 1, 2, 3 and 5'o' clock position with mucous discharge. Rectal and colonoscopic examinations was normal. Wedge biopsy revealed it to be mucinous adenocarcinoma. Following tumour board consensus, both of them were sent for neoadjuvant chemotherapy. Systemic conditions like tuberculosis and Crohn's disease are commonly associated with chronic multiple fistulae. Colorectal malignancy with implantation in a fistula and a primary malignancy arising in a fistula are extremely rare presentations, with less than 50 cases being reported. They act as a guide for an underlying solid tumour. With a high index of suspicion, mandatory colonoscopies and guided biopsies for patients with chronic fistulae is of utmost importance.

## Anal canal melanoma masquerading as hemorrhoids

Anal canal melanoma, a rare tumor, constituting 0.5-2% of all the anorectal malignancies and less than 2% of all melanomas. We present a case of a 38 year old male, who presented with mass descending per-rectum for a duration of 3 months, with occasional bleeding Per-rectum while straining for stools. He consulted in various hospitals, who diagnosed him to have hemorrhoids and advised for conservative management. On examination, he had a 4x4 centimeters bluish black mass descending per rectum which became prominent on bearing down, with no active bleeding and no lymphadenopathy. Computed tomography (CT) abdomen revealed anal canal thickening, extending to the distal rectum with peritoneal deposits. Colonoscopy revealed a growth arising from the anal verge, extending 10 centimeters upwards. Guided biopsy confirmed it to be mucosal melanoma, following the application of S-100 and HMB 45 stains. Considering the advance nature of the condition, he received chemotherapy (dacarbazine and cisplatin).Anal canal melanomas are the third most common, following cutaneous and ocular varieties. They frequently present with non-specific symptoms: rectal bleeding, tenesmus, anorectal mass, change in bowel habits and hemorrhoids. It most commonly metastasizes to inguinal lymph nodes, mesenteric lymph nodes, hypogastric lymph nodes, para –aortic lymph nodes, liver, lung, skin and brain. Surgery (WLE/APR) may be an option when presented early without distal organ involvement. Palliative chemo/radiotherapy for advanced diseases. High index of clinical suspicion, especially when the symptoms are incongruent with clinical findings is of utmost importance in diagnosing and managing aggressive conditions like this.

## Biography

Manasa Anand has completed her MBBS from Rajiv Gandhi University of Health Sciences, Karnataka, India and is currently in her final year of General Surgery residency in the prestigious Madras Medical College, Chennai, India, which is the third oldest medical college in India. She has been awarded the best paper award by the Association of Surgeons of India, Chennai city chapter. She actively participates in local surgical society meets, clinical audits, poster presentations and other academic presentations. She is known for her keen interest in medical research activities.

# Mucinous colorectal cancer presenting as Pseudomyxoma Peritonei: A case report

**Clarissa Marie Cruz**
Bulacan Medical Center, Philippines

Pseudomyxoma peritonei is a rare locoregional disease and has incidence rate of one per million per year, characterized by mucinous tumor on peritoneal surfaces producing excessive amounts of mucinous ascites.(1) It was originally applied to intraperitoneal mucinous spread originating from a cystadenoma of the appendix, which is benign, but currently was recognized that aggressiveness may exist hence, a three pathologic subtypes were proposed, disseminated peritoneal adenomucinosis, peritoneal mucinous adenocarcinoma, intermediate type PMP.(1,2)

A case of a 71y.o. female, Filipino who presented with abdominal pain, in right lower quadrant, vague in character, with increasing abdominal girth, change in bowel movements, anorexia and a pelvoabdominal mass 35x8 cm in size was noted. WAB CTscan revealed cystic pelvoabdominal mass; patient had undergone laparotomy and noted mucinous discharge covering the whole peritoneum with mesenteric cystic mass 20x20cm with mucoid discharge and perforation in cecal area. Biopsy result revealed Pseudomyxoma peritonei, CEA was elevated, a repeat CTscan was done and revealed recurrence of pelvoabdominal mass, bone scan showed possible bone metastasis. Patient was then diagnosed with Mucinous adenocarcinoma stage IV with peritoneal and bone metastasis. Patient refused to undergo colonoscopy.

Mucinous colorectal adenocarcinoma (MCA) is a subtype of colorectal carcinoma,(3,4) with different biological behavior, less common aggressiveness and prognosis than classical adenocarcinoma hence treatment approach is different. MCA is more common in female, originates more common at proximal colon, diagnosed at advanced age and at a late stage. New studies revealed that cytoreductive surgery with hyperthermic intraperitoneal chemotherapy is a potential treatment.

# Direct evidence of viral infection and mitochondrial alterations in the brain of fetuses at high risk for schizophrenia

**Segundo Mesa Castillo**
Psychiatric Hospital of Havana, Cuba

There is increasing evidences that favor the prenatal beginning of schizophrenia. These evidences point toward intra-uterine environmental factors that act specifically during the second pregnancy trimester producing a direct damage of the brain of the fetus. The current available technology doesn't allow observing what is happening at cellular level since the human brain is not exposed to a direct analysis in that stage of the life in subjects at high risk of developing schizophrenia. Methods. In 1977 we began a direct electron microscopic research of the brain of fetuses at high risk from schizophrenic mothers in order to finding differences at cellular level in relation to controls. Results. In these studies we have observed within the nuclei of neurons the presence of complete and incomplete viral particles that reacted in positive form with antibodies to herpes simplex hominis type I [HSV1] virus, and mitochondria alterations. Conclusion. The importance of these findings can have practical applications in the prevention of the illness keeping in mind its direct relation to the aetiology and physiopathology of schizophrenia. A study of the gametes or the amniotic fluid cells in women at risk of having a schizophrenic offspring is considered. Of being observed the same alterations that those observed previously in the cells of the brain of the studied foetuses, it would intend to these women in risk of having a schizophrenia descendant, previous information of the results, the voluntary medical interruption of the pregnancy or an early anti HSV1 viral treatment as preventive measure of the later development of the illness.

# "BUTO sa BATO": A Rare Case of Primary Renal Osteosarcoma

**Louie Czelline L. De Leon, Glenn P. Villanueva, Alexandre Omar Arabia, Edgardo P. Penserga and Jeffy G. Guerra**
Ospital Ng Maynila Medical Center, Philippines

Primary Renal Osteosarcoma is an extremely rare but aggressive type of tumor. To this date, only 28 cases were confirmed and reported, the last being in 2014. There are no unique clinical features of the tumor compared to other primary renal neoplasm. Due to its rarity, there are limited data for the management but a multi-modal approach is preferred to increase the survival, using resection with tumor free margins, radiotherapy and chemotherapy. This present study reports a case of a 65-year-old female who came in with fast- enlarging mass in the right abdomen which eventually caused abdominal pain. The patient underwent Radical Nephrectomy, Right with Adrenalectomy Right. Histopathologic report reveals a tumor type consistent with Extraskeletal Osteosarcoma of the Kidney. Few months after, patient's condition deteriorated and despite all efforts, various circumstances lead to the patient's demise. If there was no reported case from 2014 up to this date, this case will be the 29th case of Primary Renal Osteosarcoma in the whole world.

# Conjunctival papilloma

**Shabbir Saifuddin**
Jansons Medical Central Hospital, Dubai

57-year-old male presented with a 4-month-history of a solitary, round, dome-shaped asymptomatic nodule of 6 mm in diameter located in the limbal conjunctiva of the left eye. Clinical Presentation A 57-year-old male presented with a 4-month-history of a solitary, round, dome-shaped asymptomatic nodule of 6 mm in diameter located in the limbal conjunctiva of the left eye (Figure 1). Polarized light dermoscopy examination (Figure 2) revealed semi-translucent pinkish lesion with presence of looped and hairpin blood vessels; increased vascularity and superficial telangiectasia were noted in the beyond the periphery of the lesion. Conjunctival papillomas are benign squamous epithelial tumors with minimal propensity toward malignancy. A strong association exists between human papillomavirus (HPV) types 6 and 11 and the development of conjunctival papillomas, more frequently in young population. Limbal papillomas, as in this case, are seen commonly in older adults. A slight association exists between UV radiation and limbal conjunctival papilloma. Recurrences after surgical excision are not uncommon. This lesion recurred after 5 months, re-excision and topication with Mitomycin-C were performed in a second intervention with no recurrence after 10 months.

# Giant pleomorphic adenoma of deep lobe of parotid gland presenting as a para pharyngeal tumor

**S Shilpa Jain**
Madras Medical College, India

Pleomorphic adenoma is the most common salivary gland neoplasm. Most Tumors originate in the superficial lobe of parotid gland. Deep lobe parotid pleomorphic adenoma are rare tumors that present a diagnostic and therapeutic challenge. These tumors grow medially and occupy the parapharyngeal space. Tumors located in the parapharyngeal space are relatively rare and management is challenging due to the anatomical location. We had a case of 40yr old male presenting with an intra oral mass of 3 months duration. A firm swelling on the right side of soft palette pushing the uvula to the opposite side with normal overlying mucosa was present. CT showed a soft tissue dense lesion of 6.1cm in the right para pharyngeal space displacing the great vessels posteriorly. MRI revealed deep lobe of parotid tumor in the pre-styloid parapharyngeal space. FNAC revealed pleomorphic adenoma. Considering the benign nature of the tumor, patient was planned for a facial nerve preserving selective deep lobe parotidectomy through a submandibular approach after excision of submandibular salivary gland. Patient recovered well without any facial nerve paralysis. An exhaustive preoperative diagnostic algorithm is mandatory before approaching lesions involving parapharyngeal space. The surgical approach varies according to the location of the tumor and should provide excellent visibility with wide surgical exposure to secure local neuro-vascular structures.

# Perforated gastrointestinal stromal tumor in the jejunum – A rare presentation

**S Shilpa Jain**
Madras Medical College, India

Gastrointestinal stromal tumors are the most common sarcomatous tumors of the GI tract. Malignant GISTs constitute about 20% of malignant neoplasms of the small bowel. These tumors are more common in jejunum and ileum, diagnosed in the fifth and sixth decades of life. GISTs vary considerably in their presentation and clinical course, ranging from small benign tumors to massive lesions with necrosis, hemorrhage, and wide metastases, but rarely with perforation. Approximately 75-80% of GISTs have oncogenic, gain-of-function mutations in the receptor tyrosine kinase KIT. Complete surgical resection is the primary treatment for localized GIST. A 62yr old diabetic male, came with complaints of pain abdomen and vomiting for 2 days. No history of any similar complaints in the past. No history of melena, fever, weight loss. Abdomen was distended with diffuse tenderness and guarding. Free fluid abdomen was present, and bowel sounds absent. X ray erect abdomen revealed air under the diaphragm. CT abdomen – pneumoperitoneum with? Growth arising from bowel. Patient was resuscitated and taken up for emergency laparotomy, which revealed a dumb-bell shaped mass arising from the jejunum with perforation. Resected specimen HPE showed GIST. It is difficult to diagnose a jejunal GIST preoperatively due to the nonspecific and variable clinical symptoms, and it is also difficult to distinguish the tumor based solely on images. The definitive diagnosis of the majority of jejunal GISTs is revealed by HPE of specimen. Early intervention in a case of perforation is required due to increased risk of mortality.
