About Birmingham

Birmingham is the geographical heart of England, Birmingham started life as a sixth- century Anglo-Saxon village. It is the second largest city of the United Kingdom and a metropolitan borough in the West Midlands metropolitan county. It is one of England's principal industrial and commercial areas. Regeneration, renewal and grand-scale construction continue at a breathless pace in Britain's second-largest city. Cutting edge museums and galleries, innovative theaters and excellent shopping have contributed to Birmingham's appeal as a best break destination. Birmingham remains the chief center of Britain's light and medium industry and is still sometimes described as "the city of 1,001 different trades. The key to its economic success was the diversity of its industrial base, though it has been principally concerned with the metal and engineering trades. The largest single industry in terms of employment is the production of motor vehicles. Bicycles and motorcycles are made in the area, though the bicycle trade has declined. The city is also one of the main centres of the machine-tool industry. Within Birmingham lies the "village" of Bournville, it is home to Cadbury's Chocolate. One of the UK's first petrol-driven cars was built in Birmingham by engineer Frederick Lanchester.
